UiPath UiAAAv1 Reliable Practice Questions, UiAAAv1 Practice Test Pdf

With UiAAAv1 test training materials of Dumpexams, you can put away with disorder emotion and clean up them. UiAAAv1 test training materials of Dumpexams are the most accurate training materials in the current market. Using it, the passing rate of UiAAAv1 Exam is 100%. Choose Dumpexams is equal to choose success.

UiPath Agentic Automation Associate Sample Questions (Q25-Q30):

NEW QUESTION # 25

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- **A. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**
- B. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.
- C. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- D. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.

Answer: A

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

NEW QUESTION # 26

When a user creates a print job from a VDA-mapped network printer, how is the print job routed?

- A. Through the HDX protocol from VDA to Endpoint, and then to the print server.
- B. Printing to a network printer is not supported with HDX.
- **C. Directly from the VDA server to the print server and then to the print device for output.**
- D. Directly to the Endpoint printer, bypassing the VDA server.

Answer: C

Explanation:

When using a VDA-mapped network printer, the print job is processed on the VDA and sent directly to the network print server, which then forwards it to the physical printer. This avoids unnecessary routing through the client endpoint and ensures efficient printing.

NEW QUESTION # 27

When the Local Host Cache (LHC) is enabled, during a Site database outage _____ will reference _____ to broker new sessions. (Choose the correct option to complete the sentence.)

- **A. all Delivery Controllers; their local database**
- B. all Delivery Controllers; their local XML file
- C. the principal Delivery Controller; its local XML file
- D. the principal Delivery Controller; its local database

Answer: A

Explanation:

With Local Host Cache (LHC) enabled, each Delivery Controller maintains a synchronized local copy of the Site database. During a database outage, all Delivery Controllers reference their local database to continue brokering new sessions, ensuring high availability.

NEW QUESTION # 28

Scenario: A Citrix Administrator is investigating an instability in the system that is causing the Print Spooler service to stop frequently on the Virtual Delivery Agent (VDA) machine. The administrator finds printer driver conflicts in the environment and needs to remove the problem drivers while still maintaining printing functionality. Which policy setting can the administrator use to resolve this issue on the VDA machine?

- A. Use only printer model specific drivers
- **B. Use universal printing only**
- C. Automatic installation of in-box printer drivers
- D. Auto-create all client printers

Answer: B

Explanation:

By enabling the "Use universal printing only" policy, the VDA will rely exclusively on the Citrix Universal Print Driver instead of loading multiple printer model-specific drivers. This resolves driver conflicts, stabilizes the Print Spooler service, and maintains printing functionality.

NEW QUESTION # 29

A Delivery Group has been created to publish APP_A, APP_B, and APP_C to an AD Group called "HR." There are 10 users in the AD group (HR1-HR10). It was found that a specific user, HR10, should not have access APP_A. What must be done to make sure the HR group can access the applications, but HR10 does not have access to APP_A?

- A. Remove APP_A from the Delivery Group
- B. Limit Visibility on APP_A to HR10
- C. Remove HR10 from the Delivery Group
- **D. Limit Visibility on APP_A to HR1-HR9**

Answer: D

Explanation:

Application visibility controls in Citrix Studio allow administrators to restrict which users or groups can see and launch specific applications. By limiting APP_A's visibility to HR1-HR9, all HR users except HR10 retain access, ensuring the Delivery Group setup remains intact while excluding only the specified user.

NEW QUESTION # 30

.....

The exam questions and answers of general UiPath certification exams are produced by the UiPath specialist professional experience. Dumpexams just have these UiPath experts to provide you with practice questions and answers of the exam to help you pass the exam successfully. Our Dumpexams's practice questions and answers have 100% accuracy. Purchasing products of Dumpexams you can easily obtain UiPath certification and so that you will have a very great improvement in UiAAv1 area.
