Essential Guide for Complete Review of 1z0-1104-25 Valid Braindumps Book

DOWNLOAD the newest Actual4Exams 1z0-1104-25 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1OhDwenX4CrQNyOsnWEAx3Gy-Nab92lMG

You can use your smart phones, laptops, the tablet computers or other equipment to download and learn our 1z0-1104-25 study materials. Moreover, our customer service team will reply the clients' questions patiently and in detail at any time and the clients can contact the online customer service even in the midnight. The clients at home and abroad can purchase our 1z0-1104-25 Study Materials online. Our service covers all around the world and the clients can receive our 1z0-1104-25 study materials as quickly as possible.

Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Implementing OS and Workload Protection: This section of the exam measures the skills of OCI Administrators and looks at securing workloads and operating systems. It includes the use of OCI Bastion for time-limited access, vulnerability scanning of hosts and containers, and the use of OS management for automated updates. The goal is to ensure that workloads remain resilient and well-protected.
Topic 2	• OCI Security Introduction: This section of the exam measures the skills of Cloud Security Professionals and covers the basics of security in Oracle Cloud Infrastructure. It introduces the shared security responsibility model, the core principles of security design, and the use of foundational security services to secure deployments on OCI.
Topic 3	• Protecting Data: This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.

1z0-1104-25 Testking Learning Materials & New 1z0-1104-25 Test Price

Earning the Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam credential is undoubtedly a big achievement. No matter how hard the Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) test of this certification is, it serves the important purpose to validate skills in the Oracle industry. Once you crack the Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam, a whole new career scope opens up for you. Candidates for the Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam dumps usually don't have enough time to study for the test. To prepare successfully in a short time, you need a trusted platform of real and updated Oracle Cloud Infrastructure 2025 Security Professional (1z0-1104-25) exam dumps.

Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q35-Q40):

NEW QUESTION # 35
In Oracle Cloud Infrastructure (OCI), bare metal instances provide customers with direct access to the underlying hardware. To mitigate security risks when a customer terminates a bare metal instance, OCI utilizes Root-of-Trust hardware.
What is the primary function of the Root-of-Trust hardware in this context?

- A. It eliminates the need for hypervisors, reducing the potential attack surface.
- B. It guarantees complete isolation between customer workloads on different instances.
- C. It automatically encrypts data at rest on the bare metal instance.
- D. It ensures all non-volatile memory on the terminated instance is securely wiped before reuse.

Answer: D

NEW QUESTION # 36
You are a security architect at your organization and have noticed an increase in cyberattacks on your applications, including Cross-Site Scripting (XSS) and SQL Injection. To mitigate these threats, you decide to use OCI Web Application Firewall (WAF).
Which type of OCI WAF rule should you configure to protect against these attacks?

- A. Rate Limiting rule
- B. Access control rule
- C. Protection rule
- D. Encryption rule

Answer: C

NEW QUESTION # 37
"Your company is building a highly available and secure web application on OCI. Because of increasing malicious web-based attacks, the security team has mandated that web servers should not be exposed directly to the Internet.
How should you architect the solution while ensuring fault tolerance and security?

- A. Deploy at least three web servers in different fault domains within a private subnet. Place a public load balancer in a public subnet, but skip WAF configuration.
- B. Deploy at least three web servers in different fault domains within a private subnet. Place a public load balancer in a public subnet and configure a back-end set for all web servers. Deploy Web Application Firewall (WAF) and set the load balancer public IP address as the origin.
- C. Deploy at least three web servers in different fault domains within a public subnet. Use OCI Traffic Management service for DNS-based load balancing."
- D. Deploy at least three web servers in different fault domains within a public subnet, each with a public IP address. Deploy Web Application Firewall (WAF), and configure an origin for each public IP.

Answer: B

NEW QUESTION # 38

"A business has a hybrid cloud infrastructure with Oracle Linux instances running in OCI and on-premises.
They want to reduce the amount of bandwidth used when patching systems.
Which component of OS Management Hub can help to reduce the bandwidth usage for patching?

- A. Management agents
- B. Profiles"
- C. Management stations
- D. Dynamic groups

Answer: B

NEW QUESTION # 39

Challenge 2 -Task 1
In deploying a new application, a cloud customer needs to reflect different security postures. If a security zone is enabled with the Maximum Security Zone recipe, the customer will be unable to create or update a resource in the security zone if the action violates the attached Maximum Security Zone policy.
As an application requirement, the customer requires a compute instance in the public subnet. You therefore, need to configure Custom Security Zones that allow the creation of compute instances in the public subnet.
Review the architecture diagram, which outlines the resoures you'll need to address the requirement:
Preconfigured
To complete this requirement, you are provided with the following:
Access to an OCI tenancy, an assigned compartment, and OCI credentials
Required IAM policies
Task 1: Create a Custom Security Zone Recipe
Create a Custom Security Zone Recipe named IAD-SP-PBT-CSP-01 that allows the provisioning of compute instances in the public subnet.
Enter the OCID of the created custom security zone recipe in the text box below.

Answer:

Explanation:
See the solution below in Explanation.
Explanation:
To create a Custom Security Zone Recipe named IAD-SP-PBT-CSP-01 that allows the provisioning of compute instances in a public subnet, we will follow the steps outlined in the Oracle Cloud Infrastructure (OCI) Security Zones documentation. These steps are based on verified procedures from the OCI Security Zone Guide and related resources.
Step-by-Step Solution for Task 1: Create a Custom Security Zone Recipe
* Log in to the OCI Console:
* Use your OCI credentials to log in to the OCI Console (https://console.us-ashburn-1.oraclecloud.
com).
* Ensure you have access to the assigned compartment provided in the tenancy.
* Navigate to Security Zones:
* From the OCI Console, go to the navigation menu (hamburger icon) on the top left.
* UnderGovernance and Administration, selectSecurity Zones.
* Create a New Security Zone Recipe:
* In the Security Zones dashboard, click on theRecipestab.
* Click theCreate Recipebutton.
* Configure the Recipe Details:
* Name:Enter IAD-SP-PBT-CSP-01.
* Description:(Optional) Add a description, e.g., "Custom recipe to allow compute instances in public subnet."
* Leave theCompartmentas the assigned compartment provided.
* Define the Security Zone Policy:
* In the policy editor, start with a base policy. Since the Maximum Security Zone recipe restricts public subnet usage, you need to customize it.
* Add the following policy statement to allow compute instances in a public subnet:
Allow service compute to use virtual-network-family in compartment <compartment-name> where ALL { target.resource.type = 'Instance', target.vcn.cidr_block = '10.0.0.0/16', target.subnet.cidr_block = '10.0.10.0/24'
}
* Replace <compartment-name> with the name of your assigned compartment.

* This policy allows the Compute service to provision instances in the public subnet (10.0.10.0/24) within the VCN (10.0.0.0/16).
* Adjust Restrictions:
* Ensure the recipe does not inherit the Maximum Security Zone recipe's default restrictions that block public subnet usage.
Explicitly allow the public subnet by including the subnet CIDR block (10.0.10.0/24) in the policy.
* Remove or modify any conflicting default rules that prohibit public subnet usage (e.g., rules blocking internet access or public IP assignment).
* Save the Recipe:
* ClickCreateto save the custom security zone recipe.
* Once created, note theOCIDof the recipe from the recipe details page. The OCID will be a unique identifier starting with ocid1.securityzonerecipe.
* Verify the Recipe:
* Go to theRecipestab and locate IAD-SP-PBT-CSP-01.
* Ensure the policy reflects the allowance for compute instances in the public subnet by reviewing the policy statement.
OCID of the Created Custom Security Zone Recipe
* The exact OCID will be generated upon creation (e.g., ocid1.securityzonerecipe.oc1..unique_string).
Please enter the OCID displayed in the OCI Console after completing Step 7.
Notes
* Ensure IAM policies are correctly configured to grant you permissions to create and manage security zone recipes in the compartment.
* The policy assumes the public subnet CIDR (10.0.10.0/24) matches the diagram. Adjust if the actual subnet CIDR differs.
* Test the recipe by associating it with a security zone and attempting to launch a compute instance to confirm compliance.

NEW QUESTION # 40

......

In the process of using the 1z0-1104-25 study training materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our 1z0-1104-25 Latest Questions already have three different kinds of learning materials, what is the most suitable 1z0-1104-25 test guide for you? You can just follow the instructions for 1z0-1104-25 study guide on the web or ask our services about it.
