

H12-841_V1.5 Latest Dumps Ppt | Reliable Exam H12-841_V1.5 Pass4sure

For candidates who prefer a more flexible and convenient option, Huawei provides the H12-841_V1.5 PDF file, which can be easily printed and studied at any time. The PDF file contains the latest real HCIP-Datacom-Campus Network Planning and Deployment V1.5 (H12-841_V1.5) questions, and H12-841_V1.5 ensures that the file is regularly updated to keep up with any changes in the exam's content.

Huawei H12-841_V1.5 Exam Syllabus Topics:

Section	Weight	Objectives
VXLAN Campus Network	20%	- VXLAN Campus Network Design - VXLAN Concepts and Principles - VXLAN Gateway - BGP EVPN
Campus Network Security	10%	- Network Security Policy - Portal Authentication - 802.1X and MAC Authentication - BFD
Campus Network Reliability	15%	- Eth-Trunk - VRRP - Stack (iStack / CSS)
Campus Network Basics	15%	- VXLAN Technology Basics - Campus Network Overview - Campus Network Architecture and Design
Campus Network Management and O&M	10%	- Network O&M Tools - Configuration Management - NCE-Campus (iMaster NCE) - Wireless Access Technology
Key Technologies of Campus Networks	30%	• 1. WLAN Networking (AC + AP) • 2. WLAN Basics - Wired Access Technology • 1. STP/RSTP/MSTP • 2. MAC Address Table • 3. VLAN Principles • 4. Eth-Trunk and Link Aggregation

Pass H12-841_V1.5 Exam with Huawei's Exam Questions and Achieve 100% Success on Your First Try

As we all know, famous companies use certificates as an important criterion for evaluating a person when recruiting. The number of certificates you have means the level of your ability. H12-841_V1.5 practice materials are an effective tool to help you reflect your abilities. With our study materials, you do not need to have a high IQ, you do not need to spend a lot of time to learn, you only need to follow the method H12-841_V1.5 Real Questions provide to you, and then you can easily pass the exam. Our study material is like a tutor helping you learn, but unlike a tutor who make you spend too much money and time on learning.

Huawei HCIP-Datacom-Campus Network Planning and Deployment V1.5 Sample Questions (Q281-Q286):

NEW QUESTION # 281

In Huawei's WAN solution, regarding the issue of "blurry and stuttering video conferencing across regions," which of the following troubleshooting steps should be performed first?

- A. Check if the memory usage of the branch equipment is too high.
- B. Check if the DNS configuration of the CE device is correct.
- **C. Check if the video conferencing traffic is configured with the DSCP EF flag (high priority).**
- D. Check if public internet services are consuming excessive bandwidth.

Answer: C

NEW QUESTION # 282

(Which of the following is not an advantage of Huawei CloudCampus solution?)

- A. Supports plug-and-play of devices
- B. Supports automatic deployment of physical networks
- **C. Unified management of Huawei switches, routers, and storage servers**
- D. Supports free mobility

Answer: C

Explanation:

Huawei CloudCampus is an intelligent campus network solution designed to simplify deployment, improve O&M efficiency, and enhance user experience through cloud-based and automated technologies. Its advantages mainly focus on network automation, unified management of campus network devices, and intelligent services, rather than full IT infrastructure management.

Option A is a core advantage of CloudCampus. Through cloud-based controllers and automation technologies, CloudCampus supports automatic deployment of physical networks, reducing manual configuration and shortening service rollout time.

Option B is also an important advantage. CloudCampus supports plug-and-play of devices, where network devices can automatically go online, download configurations, and complete provisioning after being powered on and connected, significantly reducing on-site workload.

Option D is another key feature. Cloud Campus supports free mobility, allowing users to roam across different access points or areas while maintaining consistent network access policies and service experience, which is especially important in modern wireless campus environments.

Option C is not an advantage of the Huawei Cloud Campus solution. Cloud Campus focuses on unified management of campus network devices such as switches, routers, and wireless devices. It does not provide unified management for storage servers, which fall outside the scope of campus network management and belong to data center or IT infrastructure management solutions.

Therefore, unified management of Huawei switches, routers, and storage servers is not an advantage of the Cloud Campus solution.

NEW QUESTION # 283

In an MPLS VPN network, which of the following descriptions best reflects the core role of the MPLS LDP protocol?

- A. Used for transmitting VPNv4 routing information between PE devices.
- B. Used for forwarding VPN packets between P devices and identifying VPN instances.
- C. Used for transmitting user routes between CE and PE devices.
- **D. Used for assigning public network labels between PE/P devices and establishing label forwarding paths (LSPs).**

Answer: D

NEW QUESTION # 284

(When configuring access authentication, you need to define the items authorized to users in the authorization result. Which of the following items does not need to be defined?)

- A. ACL
- **B. IP address**
- C. VLAN
- D. Security group

Answer: B

Explanation:

In Huawei campus networks, access authentication and authorization are implemented based on the AAA framework. After a user is successfully authenticated, the network enforces an authorization result, which defines what network resources the user is allowed to access and how traffic is controlled. These authorization results are typically delivered by the authentication server or configured locally on network devices.

According to HCIP Datacom Campus Network documentation, authorization results focus on policy and access control attributes, not basic network parameter assignment. Common authorization items include VLAN assignment, security group assignment, and ACL application. VLANs determine the user's logical network location, security groups enable group-based policy control, and ACLs restrict or permit traffic based on predefined rules. These elements directly affect access permissions and security enforcement.

An IP address, however, does not need to be defined in the authorization result. In campus networks, IP addresses are usually assigned dynamically through DHCP, either by a DHCP server or a DHCP relay function on network devices. The IP address allocation process is independent of user authorization and does not represent an access control policy.

Separating IP address assignment from authorization simplifies network design and improves scalability. It allows users to obtain IP addresses automatically while access rights are enforced consistently through identity-based policies. Therefore, among the given options, IP address is not an item that must be defined in the authorization result.

Hence, the correct answer is B.

NEW QUESTION # 285

After the failure of the OSPF protocol in wide area networks, what is the core function of Type 6 LSA (Group Membership LSA)?

- A. Used to describe external routes to the AS, propagating throughout the AS.
- **B. Used for OSPF multicast routing to transmit multicast membership information.**
- C. Used to describe router information within the network, propagated within the area.
- D. Used to describe summarized routes between areas, reducing routing table entries.

Answer: B

NEW QUESTION # 286

.....

As is known to us, internet will hurt their eyes to see the computer time to read long, the eyes will be tired, over time will be short-sighted. In order to help customers solve the problem, our HCIP-Datacom-Campus Network Planning and Deployment V1.5 test torrent support the printing of page. We will provide you with three different versions, the PDF version allow you to switch our H12-841_V1.5 study torrent on paper. You just need to download the PDF version of our H12-841_V1.5 Exam Prep, and then you will have the right to switch study materials on paper. We believe it will be more convenient for you to make notes. Our website is very secure and regular platform, you can be assured to download the version of our H12-841_V1.5 study torrent.
