H3C Deploy and Manage the H3C CAS virtualization platform V3.0 Sample Questions (Q44-Q49):

NEW QUESTION # 44

The following statements about link aggregation are correct:

- A. In an aggregation group, even if a member port has different attribute configurations and protocol configurations from the corresponding aggregation interface, it will not affect the member port from becoming the selected port.
- B. The aggregation group and the aggregation interface have the same number.
- C. Link aggregation can provide link redundancy and increase link bandwidth.
- D. In the same aggregation group, all selected ports do not necessarily need to have the same operation key

Answer: B,C

NEW QUESTION # 45

Which of the following statements about virtual machine templates is correct?

- A. The number of CPUs, memory size, and capacity in the virtual machine template cannot be modified
- B. Make sure the CD-ROM drive is disconnected before creating the template
- C. There are two ways to create a virtual machine template: converting to a template and cloning. Cloning to a template must be done when the virtual machine is shut down.
- D. A virtual machine template is a copy of a virtual machine that is used to easily create and configure multiple new virtual machines.

Answer: B,D

NEW QUESTION # 46

Set the virtual machine startup priority. Which of the following statements is correct?

- A. If the virtual machine startup priority is set to default, the startup priority set in the cluster will be used.
- B. The virtual machine startup priority can be set to: default, low, medium, high
- C. The virtual machine startup priority can be configured on the virtual machine or on the cluster
- D. If both the virtual machine and the cluster set the startup priority (the virtual machine is set to non-default), the startup priority set in the cluster will take precedence.

Answer: A,B,C

NEW QUESTION # 47

Which of the following statements about virtual electronic flow management is correct?

- A. If an organization has no available storage space, users in that organization cannot successfully apply for the virtual machine group.
- B. Only organization administrators can approve
- C. Users can only apply for virtual machines using virtual machine templates
- D. Electronic flow is initiated by organizational users

Answer: A,D

NEW QUESTION # 48

Which of the following descriptions about virtual machine high availability (HA) is correct?

- A. After the HA function is enabled, CVM will continuously monitor the operating status of all server hosts and virtual machines in the cluster. When a host or virtual machine fails, CVM will immediately respond and start all affected virtual machines on other available hosts in the cluster.
- B. After the cluster enables the HA function, all hosts in the cluster are required to mount the system shared storage
- C. HA functionality provides easy-to-use, cost-effective high availability for applications running on all virtual machines in the cluster.
- D. After the cluster enables the HA function, all virtual machines in the cluster have HA turned on, and the HA function of a single virtual machine cannot be turned off.

Answer: A,B,C

NEW QUESTION # 49

.....

Studying for attending Deploy and Manage the H3C CAS virtualization platform V3.0 exam pays attention to the method. The good method often can bring the result with half the effort, therefore we in the examination time, and also should know some test-taking skill.
