## HP HPE7-J02 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • HPE Storage Portfolio and Strategy: This domain measures the knowledge of Solution Advisors in positioning HPE's Storage portfolio within enterprise infrastructure. Candidates must understand HPE Storage hardware, procurement options, available tools, and the overarching storage strategy, including its relevance to enterprise-scale solutions. |
| Topic 2 | • Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively. |
| Topic 3 | • Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues. |
| Topic 4 | • Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations. |

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q37-Q42):

**NEW QUESTION # 37**
A company needs to replicate critical storage volumes to a secondary site for disaster recovery purposes.
Which capability is required?

- A. Wireless network optimization for remote offices
- B. Remote replication between production storage arrays
- C. Local snapshot scheduling on individual servers only
- D. Standard desktop antivirus protection configuration

**Answer: B**

Explanation:
Remote replication copies data between storage arrays at separate locations, supporting disaster recovery objectives. If the primary site fails, workloads can be recovered from replicated storage at the secondary location.

**NEW QUESTION # 38**
An enterprise plans to integrate containerized workloads with persistent enterprise storage resources.
Which technology should be implemented?

- A. Dedicated tape libraries for container application logs
- B. Container Storage Interface integration with storage systems
- C. Manual file copy operations between cluster nodes

- D. Local workstation disks for Kubernetes production clusters

**Answer: B**

Explanation:
Container Storage Interface (CSI) integration enables Kubernetes and container platforms to provision and manage enterprise storage dynamically. This provides persistent storage for containerized applications while simplifying administration.

**NEW QUESTION # 39**
A customer is replacing their HPE 3PAR 8200 Peer Persistence setup with Alletra 6000. In a recent audit, they were warned that the Quorum Witness VM was missing security updates.
How would you respond regarding the new setup?

- A. Quorum witness is installed as a service on a supported Linux server, which can be updated as needed.
- B. Quorum witness appliance security patch updates follow the array release train updates.
- C. Quorum witness appliance can be set to automatically download and apply available updates.
- D. Quorum witness is deployed as a SaaS option, and security updates are applied automatically.

**Answer: D**

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
With Alletra and Primera Peer Persistence, the Quorum Witness is no longer a self-hosted VM. It is delivered as a cloud-based SaaS service managed by HPE. This eliminates customer responsibility for patching and ensures HPE automatically applies updates and security fixes. This resolves the audit concern.
Distractors:
A: Applies to older 3PAR environments, not Alletra/Primera.
C/D: Quorum Witness is no longer an appliance - it is SaaS managed, so these don't apply.
Key Concept: Alletra Quorum Witness is SaaS-managed, removing patching responsibility.

**NEW QUESTION # 40**
A customer wants to reduce storage provisioning time for VMware administrators without requiring storage team intervention for every request.
Which technology best addresses this need?

- A. Storage policies with VMware VVol integration
- B. Static VLAN assignment for management traffic
- C. Offline tape backup rotation scheduling process
- D. Manual LUN creation from command-line interface only

**Answer: A**

Explanation:
VMware Virtual Volumes (VVols) allow storage policies to automate provisioning and management directly from vCenter. Administrators can request storage resources based on predefined service levels without depending on manual intervention from the storage team.

**NEW QUESTION # 41**
Which statement is true regarding HPE's SAP HANA solutions?

- A. About 40% of HANA infrastructure runs on HPE.
- B. Customers can reduce licensing costs with Alletra MP Block.
- C. 77% of customers prefer SAP HANA solutions on HPE.
- D. HPE supplies custom HANA licenses exclusive for HPE appliances.

**Answer: A**
