

# Practical New 1Z1-771 Test Fee & Leader in Qualification Exams & Hot 1Z1-771: Oracle APEX Cloud Developer Professional

BTW, DOWNLOAD part of Actual4dump 1Z1-771 dumps from Cloud Storage: <https://drive.google.com/open?id=1qW1ih5rRzTXw4vj6KfIKbItvO5yIp3Qq>

1Z1-771 test dumps are aiming at helping you to pass the exam in the shortest time and with the least amount of effort. As the saying goes, an inch of gold is an inch of time. Whether you are an office worker or a student or even a housewife, time is your most important resource. With 1Z1-771 study materials, you may only need to spend half of your time that you will need if you don't use our 1Z1-771 test answers on successfully passing a professional qualification exam. In this way, you will have more time to travel, go to parties and even prepare for another exam. The benefits of 1Z1-771 Study Materials for you are far from being measured by money. 1Z1-771 test answers have a first-rate team of experts, advanced learning concepts and a complete learning model. The time saved for you is the greatest return to us.

## Oracle 1Z1-771 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Leveraging Generative AI in Oracle APEX: This section tests the knowledge of AI Developers in integrating AI-powered features within APEX applications. It involves using APEX Assistant for code generation, creating AI-driven data models, and implementing AI-powered text generation using dynamic actions.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Extending Application Capabilities:</b> This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Managing Pages and Regions:</b> This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Creating Application Page Controls:</b> This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Creating and Using Dynamic Actions and Plug-ins:</b> This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• <b>Implementing Navigation in Your Application:</b> This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• <b>Managing Application Data:</b> This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• <b>Using SQL Workshop:</b> This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• <b>Using Themes and Theme Styles:</b> This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• <b>Migrating Application Development Between Environments:</b> This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• <b>Creating and Using Forms:</b> This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• <b>Managing Workflows and Tasks:</b> This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• <b>Creating an APEX Application:</b> This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• <b>Creating Progressive Web Apps:</b> This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>• <b>Getting Started with Oracle APEX on the Oracle Autonomous Database:</b> This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li> </ul>

## Perfect Oracle New 1Z1-771 Test Fee | Try Free Demo before Purchase

The Actual4dump is committed to presenting the excellent viable observe cloth to prevail within the Oracle 1Z1-771 examination. With actual PDF questions, customizable exercise checks, and 24/7 guide, customers can be assured that they're getting the fine possible prep cloth. The 1Z1-771 is a fantastic choice for absolutely everyone looking to increase their profession with the 1Z1-771 certification. Purchase Now.

### Oracle APEX Cloud Developer Professional Sample Questions (Q31-Q36):

#### NEW QUESTION # 31

Which two Query Source types can be used to create a dynamic LOV?

- A. Select List
- B. Procedure
- C. SQL Query
- D. Function Returning SQL Query

**Answer: C,D**

Explanation:

A dynamic List of Values (LOV) in APEX populates options based on a query source. The supported types include:

Function Returning SQL Query: A PL/SQL function that returns a SQL query string (e.g., RETURN 'SELECT ename, empno FROM emp;'). This offers flexibility for dynamic conditions or complex logic.

SQL Query: A direct SQL statement (e.g., SELECT ename, empno FROM emp) executed at runtime to fetch LOV values. It's the simplest and most common approach.

Procedure: Procedures execute logic but don't return query results in the format required for an LOV (they don't produce a result set directly).

Select List: This is a UI component, not a query source type for defining an LOV.

Dynamic LOVs enhance user interaction by providing real-time, data-driven options, critical for forms and filters.

#### NEW QUESTION # 32

You need to ensure that "How may I help you today?" is the first message displayed by the AI assistant. Which attribute of the Show AI Assistant Dynamic Action should be configured in the Property Editor to achieve this?

- A. Welcome Message
- B. Initial Prompt
- C. AI Assistant Name

**Answer: A**

Explanation:

The Show AI Assistant Dynamic Action in Oracle APEX triggers the display of the AI Assistant interface. To customize the first message users see:

Welcome Message: This attribute in the Property Editor defines the initial text displayed when the AI Assistant appears. Setting it to "How may I help you today?" ensures this exact phrase greets users, enhancing user experience by setting a friendly tone. It's a static, developer-defined string, distinct from AI-generated responses.

Initial Prompt: This attribute defines the starting input or context sent to the AI model, not the visible message shown to users. It's typically hidden and used to guide the AI's behavior (e.g., "Act as a support agent").

AI Assistant Name: This sets the assistant's identity (e.g., "Alex"), displayed in the UI, but it's not the greeting message.

This configuration is critical for branding or guiding user interaction from the outset, and it's adjustable per dynamic action instance, offering flexibility across pages.

#### NEW QUESTION # 33

Which two statements are true about faceted search pages?

- A. Multiple charts are not visible in the same region.
- B. A facet's chart can be seen only in a nonmodal dialog.
- C. Faceted Search supports the ability to filter columns storing multiple values.
- D. Facets map to specific database columns.

**Answer: C,D**

Explanation:

Faceted search pages in APEX provide dynamic filtering. The true statements are:

Faceted Search supports the ability to filter columns storing multiple values: Facets can handle multi-value columns (e.g., comma-separated lists or JSON arrays) using appropriate SQL (e.g., INSTR or JSON\_TABLE), enabling complex filtering scenarios like tags or categories.

Facets map to specific database columns: Each facet is tied to a column in the underlying query (e.g., DEPTNO or JOB), ensuring data-driven filtering.

Multiple charts are not visible in the same region: False; multiple facets can display charts within the same region, depending on settings.

A facet's chart can be seen only in a nonmodal dialog: False; charts can appear inline or in dialogs, configurable via facet attributes. This functionality makes faceted search ideal for exploratory data analysis.

#### NEW QUESTION # 34

You have defined a REST Data Source with ORDS as the REST Data Source Type. The Source is being used as source for an editable Interactive Grid. When a user updates an employee record in this Interactive Grid, which operation is performed on the Database?

- A. PUT
- B. GET
- C. POST

**Answer: A**

Explanation:

An editable Interactive Grid synced with a REST Data Source (ORDS) maps CRUD operations to HTTP methods:

C . PUT: Updates an existing resource. When a user edits a row (e.g., changes SALARY), the grid sends a PUT request to the ORDS endpoint (e.g., /employees/101), updating the corresponding record.

A . POST: Creates new records, used for inserts, not updates.

B . GET: Retrieves data, used for initial grid population, not updates.

Technical note: ORDS maps PUT to an update operation on the underlying table, requiring the REST endpoint to support this method.

#### NEW QUESTION # 35

In which two formats can the GetCurrentPosition Dynamic Action in Oracle APEX return coordinates?

- A. GeoJSON
- B. Function Body returning SQL Query
- C. Latitude and Longitude
- D. State and Pincode

**Answer: A,C**

Explanation:

The GetCurrentPosition Dynamic Action retrieves geolocation data from the user's device. It supports:

Latitude and Longitude: Returns coordinates as separate numeric values (e.g., lat: 37.7749, lon: -122.4194).

GeoJSON: Returns coordinates in a structured JSON format compliant with the GeoJSON standard (e.g., { "type": "Point", "coordinates": [-122.4194, 37.7749] }).

Function Body returning SQL Query is a dynamic action type, not a coordinate format, and State and Pincode is unrelated to geolocation coordinates.

#### NEW QUESTION # 36

.....

There are many other advantages of our 1Z1-771 exam questions. To gain a full understanding of our 1Z1-771 learning guide, please firstly look at the introduction of the features and the functions of our 1Z1-771 exam torrent. The page of our product provide the demo to let the you understand part of our titles before their purchase and see what form the software is after the you open it. The client can visit the page of our product on the website. So the client can understand our 1Z1-771 Quiz torrent well and decide whether to buy our 1Z1-771 exam questions or not at their wishes.
