

# Splunk SPLK-3002 Reliable Torrent | New SPLK-3002 Exam Labs

P.S. Free 2026 Splunk SPLK-3002 dumps are available on Google Drive shared by DumpsActual: [https://drive.google.com/open?id=1NF7U\\_76fyDowLgNLEpUhYBzGIYgu8Dy6](https://drive.google.com/open?id=1NF7U_76fyDowLgNLEpUhYBzGIYgu8Dy6)

You don't need to worry about network problems either. You only need to use SPLK-3002 exam questions for the first time in a network environment, after which you can be free from network restrictions. I know that many people like to write their own notes. The PDF version of SPLK-3002 training guide is for you. The PDF version of our SPLK-3002 study materials can be printed and you can carry it with you. If you have any of your own ideas, you can write it above. This can help you learn better.

Splunk SPLK-3002: Splunk IT Service Intelligence Certified Admin exam is a certification exam that aims to test the skills and knowledge of IT professionals in using Splunk IT Service Intelligence (ITSI) to manage and monitor their IT services. SPLK-3002 Exam is designed to test the candidate's ability to configure and deploy ITSI, create service models, set up KPIs, and build dashboards to monitor the performance of IT services.

## New SPLK-3002 Exam Labs - SPLK-3002 Valid Exam Bootcamp

Considering all customers' sincere requirements, SPLK-3002 test question persist in the principle of "Quality First and Clients Supreme" all along and promise to our candidates with plenty of high-quality products, considerate after-sale services as well as progressive management ideas. Numerous advantages of SPLK-3002 training materials are well-recognized, such as 99% pass rate in the exam, free trial before purchasing, secure privacy protection and so forth. From the customers' point of view, our SPLK-3002 Test Question put all candidates' demands as the top priority. We treasure every customer' reliance and feedback to the optimal SPLK-3002 practice test.

To prepare for the Splunk SPLK-3002 exam, candidates can enroll in various training courses offered by Splunk. These courses provide hands-on experience and practical knowledge of Splunk IT service intelligence concepts, tools, and applications. Moreover, Splunk provides online resources, such as study guides, practice exams, and community forums, to help candidates prepare for the exam.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q62-Q67):

### NEW QUESTION # 62

Which of the following items describe ITSI teams? (select all that apply)

- A. By default, all services are owned by the built-in 'global' team and administered by the 'itua\_admin' role.
- B. Teams should have itua admin roles added with read-only permissions for services and entities.
- C. Services should be assigned to the 'global' team if all users need access to it.
- D. A new team admin role should be created for each team. The new role should inherit the 'itua\_team\_admin' role.

**Answer: A,C,D**

Explanation:

In Splunk IT Service Intelligence (ITSI), teams are used to organize services, KPIs, and other objects within ITSI to facilitate access control and management:

B).Services should be assigned to the 'global' team if all users need access to it:The 'global' team in ITSI is a built-in concept that denotes universal accessibility. Assigning services to the 'global' team makes them accessible to all ITSI users, irrespective of their specific team memberships. This is useful for services that are relevant across the entire organization.

C).By default, all services are owned by the built-in 'global' team and administered by the 'itua\_admin' role:This default setting ensures that upon creation, services are accessible to administrators and can be further re-assigned or refined for access by specific teams as needed.

D).A new team admin role should be created for each team. The new role should inherit the 'itua\_team\_admin' role:This best practice allows for granular access control and management within teams.

Each team can have its own administrators with the appropriate level of access and permissions tailored to the needs of that team, derived from the capabilities of the 'itua\_team\_admin' role.

The concept of adding 'itua admin roles' with read-only permissions contradicts the typical use case for administrative roles, which usually require more than read-only access to manage services and entities effectively.

### NEW QUESTION # 63

Which of the following is a good use case for creating a custom module?

- A. Modules are required to create entity and service import searches.
- B. Making it easy to migrate KPI base searches and related visualizations to other ITSI installations.
- C. Creating a service template to make it easy to automatically create new services during service and entity import.
- D. Modules are required to be able to create custom visualizations for deep dives.

**Answer: B**

Explanation:

Creating a custom module in Splunk IT Service Intelligence (ITSI) is particularly beneficial for the purpose of migrating KPI base searches and related visualizations to other ITSI installations. Custom modules can encapsulate a set of configurations, searches, and visualizations that are tailored to specific monitoring needs or environments. By packaging these elements into a module, it becomes easier to transfer, deploy, and maintain consistency across different ITSI instances. This modularity supports the reuse of developed components, simplifying the process of scaling and replicating monitoring setups in diverse operational contexts. The ability to migrate these components seamlessly enhances operational efficiency and ensures that best practices and custom configurations can be shared across an organization's ITSI deployments.

### NEW QUESTION # 64

Which of the following is a problem requiring correction in ITSI?

- A. Two or more entities with the same service ID.
- B. Two or more entities with the same value in a single alias field.
- C. Two or more entities with the same entity key value in any info field.
- D. Two or more entities with the same entity ID.

**Answer: B**

Explanation:

In Splunk IT Service Intelligence (ITSI), entities represent infrastructure components, applications, or other elements that are monitored. Each entity is uniquely identified by its entity ID, and entities can be associated with one or more services through the concept of aliases. A problem arises when two or more entities have the same value in a single alias field because aliases are used to match events to entities in ITSI. If multiple entities share the same alias value, ITSI might incorrectly associate data with the wrong entity, leading to inaccurate monitoring and analytics. This scenario requires correction to ensure that each alias uniquely identifies a single entity, thereby maintaining the integrity of the monitoring and analysis process within ITSI. The uniqueness of service IDs, entity IDs, and entity key values in info fields is also important but does not typically present the same level of issue as duplicate values in an alias field.

#### NEW QUESTION # 65

Anomaly detection can be enabled on which one of the following?

- A. Service
- B. Multi-KPI alert
- **C. KPI**
- D. Entity

**Answer: C**

Explanation:

Explanation

Enable anomaly detection to identify trends and outliers in KPI search results that might indicate an issue with your system.

#### NEW QUESTION # 66

For which ITSI function is it a best practice to use a 15-30 minute time buffer?

- **A. Adaptive thresholding.**
- B. Correlation searches.
- C. Maintenance windows
- D. Anomaly detection.

**Answer: A**

Explanation:

B is the correct answer because adaptive thresholding is a feature of ITSI that allows you to dynamically adjust KPI thresholds based on historical patterns and trends. Adaptive thresholding requires a time buffer of at least 15 minutes to calculate the thresholds based on the previous data points. The time buffer ensures that there is enough data to perform the calculations and avoid false positives or negatives. Reference: Configure adaptive thresholding for a KPI in ITSI

#### NEW QUESTION # 67
