

Valid H12-323_V2.0 Test Review, H12-323_V2.0 Latest Braindumps Questions

[Download Huawei H12-323_V2.0-ENU Exam Dumps for best preparation](#)

1. The CloudCampus APP mainly includes two functional modules: network and tools.

Which of the following descriptions of the functions under the tool module is wrong?

- A. Check terminal: obtain information about illegally accessed terminals
- B. Wi-Fi status: You can view the current Wi-Fi status information, such as signal strength, channel, negotiation rate, etc.
- C. Game test: Test network jitter and packet loss rate
- D. Test network speed: only supports Internet speed test

Answer: D

2. A user views the domain management template information on WAC as follows. Which of the following descriptions is wrong?

- A. The current 4.9G frequency band is not enabled
- B. The current country code is China's country code. If you want to change it, you can use the command country-code to configure it.
- C. The current 5G RF tuning bandwidth is 20 MHZ
- D. The current channel loading mode is outdoor mode

Answer: A

3. When there are many users in the WLAN network, such as in high-density scenarios, as the number of online users increases, the fierce competition for channels between users leads to poor Internet access quality for each user. In order to ensure the Internet access experience of online users, the user connection admission control (CAC) function can be deployed.

Which of the following descriptions about the user CAC function is wrong?

- A. CAC uses two thresholds to control the access of new users and roaming users respectively.
- B. When a roaming user accesses the radio, the roaming user can access the radio as long as the roaming user threshold is not reached.
- C. When most users use the same service type and the service traffic is average, it is recommended to use the user CAC function based on terminal SNR
- D. When a new user accesses, the AP checks whether the current number of users or the terminal signal-to-noise ratio reaches the threshold for new users. If so, the new user's access is denied and the SSID can be hidden.

Answer: C

4. CampusInsight supports application analysis, monitors network-wide applications, and visualizes overview data such as application numbers and traffic. This function relies on the device reporting traffic statistics to CampusInsight, which supports two types of traffic statistics reporting: NetStream-based reporting and application-based reporting.

When selecting application-based reporting, which of the following functions needs to be enabled on the wireless controller?

- A. DFI
- B. RF Tuning
- C. SAC
- D. DA channel scan

Answer: C
