Salesforce PDII Free Brain Dumps - Valid PDII Exam Dumps

Life is beset with all different obstacles that are not easily overcome. For instance, PDII exams may be insurmountable barriers for the majority of population. However, with the help of our PDIIexam questions, exams are no longer problems for you. The reason why our PDII Training Materials outweigh other PDII study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version.

There are a lot of excellent experts and professors in our company. In the past years, these experts and professors have tried their best to design the PDII exam questions for all customers. More importantly, we believe once you finally gain the PDII certification with our PDII exam questions and you will find enormous benefits: more enjoyment of life and better relationships and less stress and a better quality of life overall. So it is very significant for you to do everything in your power to pass the PDII Exam and get the related certification.

- A. Username and Password
- B. Security Token
- C. Organization Id
- D. Session Id

Answer: A,B

NEW QUESTION # 111
A developer is working on a set of custom Aura components that can be Individually added to a home page.
One of the components, c:searchAccounts, allows users to search for an Account and then select a specific found Account. Once selected, the other components.
Should get other information related to the selected Account and display it Which event should the c: 2eazchRccounta component fire to make it known that an Account is selected?

- A. An application event
- B. A refrestiview event
- C. A publish event
- D. A component event

Answer: D

NEW QUESTION # 112
How should a developer assert that a trigger with an asynchronous process has successfully run?

- A. Insert records into Salesforce, use seeAllData=true, then perform assertions.
- B. Create all test data, use future in the rest class, then perform assertions.
- C. Create all test data in the test class, invoke Test.startTest{} and Test.etopTaat {} and then perform assertions.
- D. Create all test data in the test class, use system. runs {} to invoke the trigger, then perform assertions.

Answer: C

Explanation:
Use Test.startTest() and Test.stopTest(). These methods ensure asynchronous code runs within test execution and allows for accurate assertions.
