Realistic OGEA-103 Exam Question & Guaranteed The Open Group OGEA-103 Exam Success with Top Exam OGEA-103 Preview

BONUS!!! Download part of PrepAwayExam OGEA-103 dumps for free: https://drive.google.com/open?id=1fep6856qPCnUBJhM-Dbt8AEF8DCjhz3a

If you are a child's mother, with OGEA-103 test answers, you will have more time to stay with your if you are a student, with OGEA-103 exam torrent, you will have more time to travel to comprehend the wonders of the world. In the other worlds, with OGEA-103 guide tests, learning will no longer be a burden in your life. You can save much time and money to do other things what meaningful. You will no longer feel tired because of your studies, if you decide to choose and practice our OGEA-103 Test Answers. Your life will be even more exciting.

It is of no exaggeration to say that sometimes OGEA-103 certification is exactly a stepping-stone to success, especially when you are hunting for a job. The OGEA-103 study materials are of great help in this sense. With the OGEA-103 test training, you can both have the confidence and gumption to ask for better treatment. To earn such a material, you can spend some time to study our OGEA-103 study torrent. No study can be done successfully without a specific goal and a powerful drive, and here to earn a better living by getting promotion is a good one.

>> OGEA-103 Exam Question <<

Exam OGEA-103 Preview, OGEA-103 Braindump Free

Our OGEA-103 test questions are compiled by domestic first-rate experts and senior lecturer and the contents of them contain all the important information about the test and all the possible answers of the questions which maybe appear in the test. Our OGEA-103 test practice guide' self-learning and self-evaluation functions, the statistics report function, the timing function and the function of stimulating the test could assist you to find your weak links and have a warming up for the Real OGEA-103 Exam. You will feel your choice to buy OGEA-103 reliable exam torrent is too right.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49
Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Governance Log
- B. Reference Library
- C. Architecture Metamodel
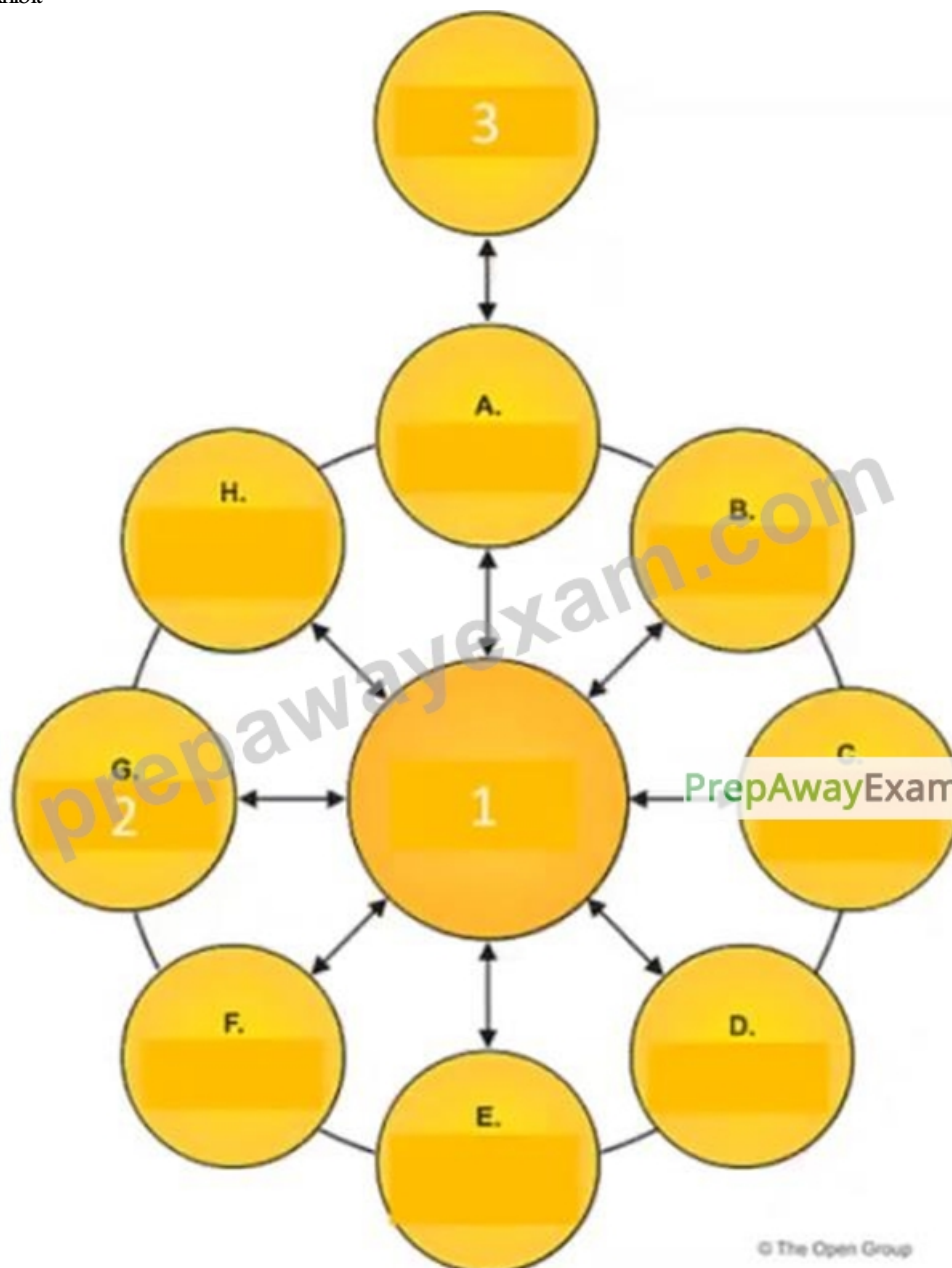

- D. Architecture Landscape

Answer: D

Explanation:
The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture. Reference: : The TOGAF Standard, Version 9.2, Part IV: Architecture Content Framework, Chapter 34: Architecture Landscape : The TOGAF Standard, Version 9.2, Part VI: Architecture Capability Framework, Chapter 47: Architecture Repository

NEW QUESTION # 50
Exhibit

Consider the illustration showing an architecture development cycle Which description matches the phase of the ADM labeled as item 2?

- A. Conducts implementation planning for the architecture defined in previous phases

- B. Operates the process of managing architecture requirements
- C. Provides architectural oversight for the implementation
- D. Establishes procedures for managing change to the new architecture

Answer: C

Explanation:
Based on the illustration, the phase of the ADM labeled as item 2 is the Implementation Governance phase. This phase provides architectural oversight for the implementation. It ensures that the implementation project conforms to the architecture. It also provides a framework for monitoring and managing the implementation.
The Implementation Governance phase involves the following activities:
Finalizing the Architecture Roadmap and the supporting Implementation and Migration Plan Assigning an Architecture Board to oversee the implementation Establishing Architecture Contracts with the implementation partners Reviewing and approving the implementation project plans and deliverables Performing Architecture Compliance reviews to ensure alignment with the architecture Performing Architecture Audit reviews to ensure quality and performance of the architecture Resolving any architecture issues or change requests that arise during the implementation Maintaining the architecture lifecycle and ensuring its continuity The Implementation Governance phase is essential for ensuring that the architecture is realized as intended and that it delivers the expected business value and outcomes.

NEW QUESTION # 51
Which one of the following classes of information within the Architecture Repository would typically contain a list of the applications in use within the enterprise?

- A. Governance Log
- B. Reference Library
- C. Architecture Metamodel
- D. Architecture Landscape

Answer: D

Explanation:
The Architecture Landscape is a class of information within the Architecture Repository that shows an architectural view of the building blocks that are in use within the organization today (the Baseline Architecture), as well as those that are planned for the future (the Target Architecture). The Architecture Landscape typically contains a list of the applications in use within the enterprise, along with their relationships and dependencies, as well as other relevant architectural information. The Architecture Landscape helps to identify opportunities for re-use, consolidation, or retirement of existing applications, as well as gaps or overlaps in the current or future architecture.

NEW QUESTION # 52
Which of the following is included as part of Architecture Governance1?

- A. Interacting with the CxO level on Enterprise Architecture
- B. Managing Stakeholders and their requirements
- C. Creating and maintaining the Statement of Architecture Work though out the ADM cycle
- D. Ensuring compliance with internal and external standards and regulatory obligations

Answer: D

Explanation:
Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

NEW QUESTION # 53

You are working as an Enterprise Architect at a large company. The company runs many retail stores as well as an online marketplace that allows hundreds of brands to partner with the company. The company has a mature Enterprise Architecture (EA) practice and uses the TOGAF standard for its architecture development method. The EA practice is involved in all aspects of the business, with oversight provided by an Architecture Board with representatives from different parts of the business. The EA program is sponsored by the Chief Information Officer (CIO).

Many of the stores remain open all day and night. Each store uses a standard method to track sales and inventory, which involves sending accurate, timely sales data to a central AI-based inventory management system that can predict demand, adjust stock levels, and automate reordering. The central inventory management system is housed at the company's central data center.

The company has acquired a major rival. The Chief Executive Officer (CEO) believes that the merger will enable growth through combined offerings and cost savings. The decision has been made to fully integrate the two organizations, including merging retail operations and systems. Duplicated systems will be replaced with one standard retail management system. The CIO expects significant savings from these changes across the newly merged company.

The rival company has successfully implemented the use of hand-held devices within stores for both customers and staff, which has increased satisfaction due to time savings. The CIO has approved the rollout of these devices to all stores but has stated that training should be brief, as there are many part-time employees.

You have been asked to confirm the most relevant architecture principles for this transformation. Based on the TOGAF Standard, which of the following is the best answer?

- A. Maximize Benefit to the Enterprise, Common Use Applications, Data is an Asset, Responsive Change Management, Technology Independence
- B. Control Technical Diversity, Interoperability, Data is an Asset, Data is Shared, Business Continuity
- C. Common Vocabulary and Data Definitions, Compliance with the Law, Requirements Based Change, Responsive Change Management, Data Security
- D. Common Use Applications, Data is an Asset, Data is Accessible, Ease of Use, Business Continuity

Answer: A

Explanation:
In this scenario, the enterprise is undergoing significant transformation due to a merger and the adoption of new technology (hand-held devices). Several key principles from TOGAF's ADM Techniques-particularly those focused on promoting enterprise-wide standardization, adaptability, and data utilization-are pertinent here:

Maximize Benefit to the Enterprise:This principle emphasizes that all architectural decisions should deliver maximum business value. Given that the company is integrating systems to cut costs and improve offerings, maximizing the benefit is crucial. Ensuring that the EA efforts align with enterprise-wide benefits supports the goal of optimizing costs and enhancing offerings, which aligns with the CEO's vision for the merger.

Common Use Applications:Standardizing applications across the merged entity will be essential to achieve cost savings and to simplify operations. The goal of reducing the number of applications fits with this principle, ensuring that reusable and widely adopted applications support business functions across the organization. Adopting this principle will also aid in harmonizing the systems from both organizations and avoiding unnecessary diversity.

Data is an Asset:Data plays a central role in the company's operations, especially with the use of AI-driven inventory management and the integration of systems. Treating data as an asset is essential for reliable and accurate decision-making. This principle ensures that data is viewed as a critical enterprise resource and is managed with care, maintaining integrity, accuracy, and value.

Responsive Change Management:The organization's ability to adapt quickly and effectively to changes, such as integrating new handheld devices and merging systems, is essential. This principle will facilitate the smooth transition required for integrating the new handheld devices and the merger-related system updates while minimizing disruption to store operations.

Technology Independence:Since the enterprise will likely encounter varied technologies from the merger, it is crucial to maintain flexibility. This principle advocates for using technology solutions that are adaptable and not bound to a single vendor or specific technology. This ensures that the enterprise can integrate various technological components from both organizations and evolve with minimal constraints.

These principles align well with TOGAF's broader recommendations for guiding architectural changes, as found in Section 2.6 of the TOGAF ADM Techniques. They ensure that the EA practice is aligned with business objectives while maintaining flexibility, data integrity, and a focus on enterprise-wide benefits. These guiding principles are critical for the successful execution of the integration and adoption of new technologies while achieving cost efficiencies and improving service delivery.

For reference, TOGAF's ADM Techniques highlight the importance of architectural principles in guiding transformational initiatives, ensuring that decisions are made consistently across the enterprise. Each principle supports organizational agility, system integration, and the efficient use of technology resources, all of which are vital for the enterprise's stated objectives.
