NSE5_FNC_AD-7.6 exam dumps are famous for high-quality, since we have a professional team to collect and research the first-hand information. We have reliable channel to ensure you that NSE5_FNC_AD-7.6 exam braindumps you receive is the latest information of the exam. We are strict with the quality and answers of NSE5_FNC_AD-7.6 Exam Materials, we can guarantee you that what you receive are the best and most effective. In addition, online and offline chat service stuff are available, and if you have any questions for NSE5_FNC_AD-7.6 exam dumps, you can consult us.

our NSE5_FNC_AD-7.6 actual exam has won thousands of people's support. All of them have passed the exam and got the certificate. They live a better life now. Our NSE5_FNC_AD-7.6 study guide can release your stress of preparation for the test. Our NSE5_FNC_AD-7.6 Exam Engine is professional, which can help you pass the exam for the first time. If you can't wait getting the certificate, you are supposed to choose our NSE5_FNC_AD-7.6 study guide.

>> NSE5_FNC_AD-7.6 Exam Learning <<

Providing You Professional NSE5_FNC_AD-7.6 Exam Learning with 100% Passing Guarantee

Our NSE5_FNC_AD-7.6 simulating exam is perfect for they come a long way on their quality. On one hand, we have engaged in this career for over ten years and have become the leader in this market. On the other hand, we never stop developing our NSE5_FNC_AD-7.6 study guide. And our NSE5_FNC_AD-7.6 Training Materials have the function to remember and correct your errors. If you commit any errors, Our NSE5_FNC_AD-7.6 learning questions can correct your errors with accuracy rate more than 98 percent.

Fortinet NSE 5 - FortiNAC-F 7.6 Administrator Sample Questions (Q24-Q29):

NEW QUESTION # 24

An administrator wants FortiNAC-F to pass firewall tags to FortiGate to leverage dynamic address groups used in firewall policies. On FortiNAC-F, what determines the values that are passed?

- A. Model configuration
- **B. Security rule**
- C. RADIUS group attribute
- D. Device profiling rule

Answer: B

Explanation:

The values of firewall tags sent from FortiNAC-F to FortiGate are defined within the security rule.

The security rule determines the action applied to a host or user, including which tags are assigned and passed to FortiGate for use in dynamic address groups and associated firewall policies.

NEW QUESTION # 25

Refer to the exhibit. If a host is connected to a port in the Building 1 First Floor Ports group, what must also be true to match this

user/host profile?

FortiNAC-F Administrator Guide

- A. The host must have a role value of contractor or an installed persistent agent and a security access value of contractor, and be connected between 6 AM and 5 PM.
- B. The host must have a role value of contractor or an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.
- C. The host must have a role value of contractor or an installed persistent agent, a security access value of contractor, and be connected between 9 AM and 5 PM.
- D. The host must have a role value of contractor, an installed persistent agent or a security access value of contractor, and be connected between 6 AM and 5 PM.

Answer: A

Explanation:

The User/Host Profile in FortiNAC-F is the fundamental logic engine used to categorize endpoints for policy assignment. As seen in the exhibit, the configuration uses a combination of Boolean logic operators (OR and AND) to define the "Who/What" attributes. According to the FortiNAC-F Administrator Guide, attributes grouped together within the same bracket or connected by an OR operator require only one of those conditions to be met. In the exhibit, the first two attributes are "Host Role = Contractor" OR "Host Persistent Agent = Yes".

This forms a single logical block. This block is then joined to the third attribute ("Host Security Access Value = Contractor") by an AND operator. Consequently, a host must satisfy at least one of the first two conditions AND satisfy the third condition to match the "Who/What" section.

Furthermore, the profile includes Location and When (time) constraints. The exhibit shows the location is restricted to the "Building 1 First Floor Ports" group. The "When" schedule is explicitly set to Mon-Fri 6:00 AM - 5:00 PM. For a profile to match, all enabled sections (Who/What, Locations, and When) must be satisfied simultaneously. Therefore, the host must meet the conditional contractor/agent criteria, possess the specific security access value, and connect during the defined 6 AM to 5 PM window.

"User/Host Profiles use a combination of attributes to identify a match. Attributes joined by OR require any one to be true, while attributes joined by AND must all be true. If a Schedule (When) is applied, the host must also connect within the specified timeframe for the profile to be considered a match. All criteria in the Who/What, Where, and When sections are cumulative."

NEW QUESTION # 26

A healthcare organization is integrating FortiNAC-F with its existing MDM. Communication is failing between the systems. What could be a probable cause?

- A. Security Fabric traffic is failing
- B. REST API communication is failing
- C. SOAP API communication is failing
- D. SSH communication is failing

Answer: B

Explanation:

The integration between FortiNAC-F and Mobile Device Management (MDM) platforms (such as Microsoft Intune, VMware Workspace ONE, or Jamf) is a critical component for providing visibility into mobile assets that do not connect directly to the managed infrastructure via standard wired or wireless protocols.

According to the FortiNAC-F MDM Integration Guide, the communication between the FortiNAC-F appliance and the MDM server is handled through REST API calls. FortiNAC-F acts as an API client, periodically polling the MDM server to retrieve device metadata, compliance status, and ownership information. If communication is failing, it is most likely because the API credentials (Client ID/Secret) are incorrect, the MDM's API endpoint is unreachable from the FortiNAC-F service port, or the SSL certificate presented by the MDM is not trusted by the FortiNAC-F root store.

NEW QUESTION # 27

An organization wants to add a FortiNAC-F Manager to simplify their large FortiNAC-F deployment.

Which two policy types can be managed globally? (Choose two.)

- **A. Authentication**
- B. Supplicant EasyConnect
- C. Endpoint Compliance
- **D. Network Access**

Answer: A,D

Explanation:

A FortiNAC-F Manager allows centralized management of authentication policies so user and device authentication behavior is consistent across all managed CAs. It also supports global network access policies, enabling uniform access control and enforcement logic to be applied throughout the entire deployment from a single management point.

NEW QUESTION # 28

An administrator manages a corporate environment where all users log into the corporate domain each time they connect to the network. The administrator wants to leverage login scripts to use a FortiNAC-F agent to enhance endpoint visibility. Which agent can be deployed as part of a login script?

- A. Passive
- B. Persistent
- **C. Dissolvable**
- D. Mobile

Answer: C

Explanation:

The dissolvable agent is designed to be executed at user login and does not require permanent installation on the endpoint. This makes it suitable for deployment through domain login scripts, where it can run temporarily to collect endpoint posture and visibility information and then remove itself after execution.

NEW QUESTION # 29

.....

You must have felt the changes in the labor market. Today's businesses require us to have more skills and require us to do more in the shortest possible time. We are really burdened with too much pressure. NSE5_FNC_AD-7.6 simulating exam may give us some help. With our NSE5_FNC_AD-7.6 Study Materials, we can get the NSE5_FNC_AD-7.6 certificate in the shortest possible time. And our pass rate is high as 98% to 100% which is unbeatable in the market.

NSE5_FNC_AD-7.6 Latest Dump: https://www.examcollectionpass.com/Fortinet/NSE5_FNC_AD-7.6-practice-exam-dumps.html

Together with our excellent NSE5_FNC_AD-7.6 learning guide, the after-sale service staffs in our company share a passion for our customers on our NSE5_FNC_AD-7.6 exam questions, an intense focus on teamwork, speed and agility, and a commitment to

trust and respect for all individuals, But as if NSE5_FNC_AD-7.6 Latest Dump - Fortinet NSE 5 - FortiNAC-F 7.6 Administrator exam certification has been of great value, it's hard to prepare for this exam and if you fail to pass it unfortunately, it will be a great loss for you to register for it again, Fortinet NSE5_FNC_AD-7.6 Exam Learning Therefore, to save your valuable time and money, we keep a close eye on the latest updates.
