offered to SAP Certification Exam candidates.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q64-Q69):

NEW QUESTION # 64

What can you use to speed up the creation of new service contracts by reusing existing information?

- A. Product bundles
- **B. Service contract templates**
- C. Service contract quotations
- D. Service order templates

Answer: B

Explanation:

Creating service contracts in SAP S/4HANA Cloud Private Edition, Service can be time-consuming if done from scratch. To streamline this process, SAP provides tools to reuse existing data. The correct answer is service contract templates (Option D). A service contract template is a predefined structure that includes standard data such as items, pricing conditions, billing plans, and service objects. When creating a new service contract, you can select a template and adapt it to the specific customer or scenario, significantly reducing manual entry and ensuring consistency.

* Service contract quotations (A): These are preliminary documents used to propose a contract to a customer, but they are not designed for reuse as templates for contract creation.

* Service order templates (B): These are used to standardize service orders, not service contracts, and thus do not apply here.

* Product bundles (C): These group products or services together but are not templates for creating contracts; they are more relevant to sales or service items.

"Service contract templates enable the rapid creation of new contracts by providing reusable structures with predefined data, such as items and conditions, which can be adjusted as needed."

NEW QUESTION # 65

What is the purpose of creating maintenance planner groups?

- A. Mapping a group of persons planning maintenance capacities
- B. Mapping a group of persons creating maintenance task lists
- C. Mapping a group of persons performing maintenance work
- **D. Mapping a group of persons planning maintenance activities for technical assets**

Answer: D

Explanation:

Maintenance planner groups in SAP S/4HANA Service (and Plant Maintenance):

* Mapping a group of persons planning maintenance activities for technical assets: Planner groups (e.g., defined in transaction IP02) organize planners responsible for scheduling and managing maintenance plans and orders for technical objects.

* Performing maintenance work: Handled by work centers, not planner groups.

* Creating task lists: A design task, not the planner group's role.

* Planning capacities: Managed via capacity planning, not planner groups. This is part of maintenance planning setup. "Maintenance planner groups map persons responsible for planning maintenance activities for technical assets." (SAP Help Portal, Maintenance Planning).

NEW QUESTION # 66

What happens when you execute the step "Release for Billing" in an in-house repair process?

- A. Billing due list entries are created for each repair object.
- B. A billing document is created for each repair order item.
- **C. The system creates a billing document request for each selected repair confirmation item.**
- D. The repair confirmation items are automatically set to completed.

Answer: C

Explanation:

In in-house repair processing in SAP S/4HANA Cloud Private Edition, Service, the "Release for Billing" step initiates the billing process for repair activities. The correct answer is C: "The system creates a billing document request for each selected repair confirmation item." A repair confirmation (e.g., transaction type REPC) records the work done, and when released for billing, the system generates a billing document request (BDR) for each confirmed item that is billable. The BDR is a preliminary document that can later be converted into a billing document (e.g., an invoice) via the billing due list.

* A: Billing due list entries are an outcome of BDRs, not directly created per repair object.

* B: Billing documents are not created immediately; BDRs are created first.

* D: Completion status is separate from billing release.

"Upon executing 'Release for Billing' in an in-house repair process, the system generates a billing document request for each selected repair confirmation item, enabling subsequent invoicing."

NEW QUESTION # 67

What are features of the app Service Actuals? Note: There are 3 correct answers to this question.

- A. Navigation to related SAP Fiori apps
- B. Dynamic adjustment of dimensions
- C. Creation of variants
- D. Upload of Microsoft Excel file
- E. Creation of SAP Analytics Cloud stories

Answer: A,B,C

Explanation:

The Service Actuals app in SAP S/4HANA Cloud Private Edition, Service is a Fiori app for analyzing service-related financial data (e.g., costs, revenues). The correct answers are creation of variants (A), dynamic adjustment of dimensions (B), and navigation to related SAP Fiori apps (E). Let's break this down.

App Purpose:

Service Actuals provides insights into actual costs and revenues from service orders, contracts, and confirmations, supporting profitability analysis.

* Creation of variants (A): Users can save custom filter settings (e.g., specific plants, periods) as variants for reuse. In the app, you select filters (e.g., Plant 1000, 2025-Q1), save as "Variant1," and recall it later, streamlining reporting.

* Dynamic adjustment of dimensions (B): The app allows real-time changes to analysis dimensions (e.g., by cost center, order type). You can drag and drop fields (e.g., switch from "Order" to "Customer") to pivot data dynamically, enhancing flexibility.

* Navigation to related SAP Fiori apps (E): From Service Actuals, you can navigate to apps like

"Manage Service Orders" or "Event-Based Revenue Recognition" via links or context menus, improving workflow efficiency.

Why Not the Others?

* Upload of Microsoft Excel file (C): This app is for viewing data, not uploading; Excel uploads are for data entry apps.

* Creation of SAP Analytics Cloud stories (D): SAC stories are built in SAP Analytics Cloud, not this app, though data might feed into SAC.

Example Use Case:

A manager creates a variant for 2025 service costs, adjusts dimensions to view by customer, and navigates to a service order for details.

"The Service Actuals app features variant creation, dynamic dimension adjustment, and navigation to related Fiori apps."

NEW QUESTION # 68

Which information do you maintain for each line item of an ad hoc billing plan? Note: There are 3 correct answers to this question.

- A. Description
- B. Billing value
- C. Billing document request ID
- D. Attachment
- E. Billing date

Answer: A,B,E

Explanation:

Ad hoc billing plan in a service contract allows flexible billing without fixed periodicity. The correct answers are B, C, E. Let's explore.

* Billing value (B): The amount to be billed (e.g., \$500) is mandatory for each line item.

* Description (C): A text field (e.g., "Q1 Service Fee") describes the billing purpose.

* Billing date (E): The date when billing occurs (e.g., 2025-03-31) drives the billing document request.

Why Not the Others?

* Attachment (A): Optional, not required.

* Billing document request ID (D): Generated by the system, not maintained manually.

Example:

Line 1: \$200, "Inspection Fee," 2025-04-01.

"Ad hoc billing plan line items include billing value, description, and billing date."

NEW QUESTION # 69

.....

The Prep4SureReview is one of the leading SAP exam preparation study material providers in the market.
