Salesforce Health Cloud Accredited Professional Sample Questions (Q64-Q69):

NEW QUESTION # 64

An administrator at Bloomington Caregivers has received a change request to alter the appearance of the timeline so that it displays vertically instead of horizontally.

Which step should the administrator take when implementing this change request?

- A. Enable Timeline in Salesforce Setup, then configure and activate new timeline and add to the relevant Lightning record
- B. Enable Timeline in Salesforce Setup, then set the toggle for vertical orientation to true to set all timeline orientations as vertical.
- C. Find the Timeline Orientation setting in Custom Metadata, which controls the orientation of all timelines, and change the value to vertical.
- D. Find the Timeline View Configuration for each relevant timeline in the Health Cloud - Lightning Admin app and change the orientation to vertical.

Answer: D

NEW QUESTION # 65

Bloomington Caregivers needs to migrate Health Condition records from its previous org with International Classification of Diseases (ICD) information.

Which two objects should an administrator load with data prior to migrating this information, to ensure a successful data load?

Choose 2 answers

- A. Account
- B. code set
- C. Healthcare Diagnosis
- D. Clinical Encounter

Answer: A,B

NEW QUESTION # 66

A customer is looking to implement Discovery Framework to manage their intake and clinical assessments.

Which three capabilities should a consultant configure with Health Cloud out-of-the-box to enhance their assessment functionality?

Choose 3 answers

- A. Adding a QR Code
- B. SMS Assessment Completion
- C. FHIR Question Bank
- D. Digital Signature Capture
- E. Using Previously Submitted Responses

Answer: C,D,E

Explanation:

Step 1: Understanding the Discovery Framework in Health Cloud

The Discovery Framework in Salesforce Health Cloud is designed to streamline intake and clinical assessments by providing reusable, modular, and compliant tools for healthcare organizations. It enables organizations to collect, store, and reuse responses to assessment questions efficiently and securely.

Reference:

"Discovery Framework provides a way to design, distribute, and reuse forms and assessments for clinical and non-clinical scenarios. It leverages reusable question banks, digital data capture, and integration with Health Cloud objects." Administer Health Cloud - Assessments and Discovery Framework Step 2: FHIR Question Bank Capability: The use of a FHIR-based Question Bank allows healthcare organizations to standardize questions and reuse them across multiple assessments. This ensures consistency and regulatory compliance in data collection.

Extract:

"The Question Bank leverages the FHIR Questionnaire resource, making it easy to define, store, and reuse question sets for various clinical assessments." Administer Health Cloud - Discovery Framework: Question Bank Step 3: Digital Signature Capture

Capability: Digital Signature Capture is supported natively in Health Cloud assessments, ensuring consent, authenticity, and regulatory compliance.

Extract:

"Out-of-the-box support for digital signature capture in assessment forms allows for secure, auditable consent capture, which is often required for clinical or legal compliance." Administer Health Cloud - Discovery Framework Features Step 4: Using Previously Submitted Responses Capability: The ability to use previously submitted responses enhances user experience and speeds up the intake process by pre-populating assessments with earlier responses where relevant.

Extract:

"You can configure assessments to pre-fill questions with responses from prior assessments, supporting both efficiency and patient engagement." Administer Health Cloud - Reuse of Data in Assessments Step 5: Options Not Natively Supported Out-of-the-Box A . Adding a QR Code: Not natively supported in Health Cloud Discovery Framework out-of-the-box for assessments. This would require custom development or external integrations.

B . SMS Assessment Completion: Not supported out-of-the-box; may require integration with Marketing Cloud or external SMS services and customization.

Reference for non-supported features:

"Features such as QR code generation or SMS completion notifications are not available out of the box and would require customizations or integrations." Administer Health Cloud

NEW QUESTION # 67

Bloomington Caregivers wants to show its end users highlighted information about its providers that work at specific facilities, in one place. This would include provider contact details and the provider's specialty at a given facility.

Which Health Cloud feature should a consultant implement to fulfill this requirement?

- **A. Provider Relationship Card**
- B. Facility Relationship Center
- C. HCPProvider360 FlexCard
- D. Provider Network Management

Answer: A

NEW QUESTION # 68

A provider is looking to view a patient's insurance coverage, including co-pay and deductible information, prior to their appointment. Using Health Cloud, which two steps should a consultant take to access this information in the Benefit Verification component?

Choose 2 answers

- **A. Create a named credential to support authenticated callouts.**
- B. Create a new record for the HCBenVerConnect custom setting.
- C. Configure the link to the clearinghouse's endpoint using a Uniform Resource Identifier (URI) path.
- **D. Configure the Connection Label with the source system's API details.**

Answer: A,D

Explanation:

To access a patient's insurance coverage, co-pay, and deductible information in the Benefit Verification component of Health Cloud, you need to integrate with external systems (e.g., payers or clearinghouses). Health Cloud provides the Benefit Verification component, which relies on secure API integrations for real-time eligibility and benefits checks.

Step-by-Step Reference:

Configure the Connection Label with the source system's API details:

Extract:

"In Benefit Verification setup, specify the Connection Label and configure the external endpoint and API details to connect to the benefit verification source system." (Source: Administer Health Cloud - Benefit Verification Setup) Create a named credential to support authenticated callouts:

Extract:

"Use Named Credentials to securely store authentication settings and endpoint information for callouts to external services (such as clearinghouses or payers) required for benefit verification." (Source: Salesforce Security Guide and Administer Health Cloud - Benefit Verification) Why not A or B?

The HCBenVerConnect custom setting is not part of the standard configuration for the out-of-the-box Benefit Verification component.

Configuring a URI path alone (without API details and credentials) does not enable secure, authenticated communication.

NEW QUESTION # 69

.....

With the Salesforce AP-211 Certification Exam, you can demonstrate your skills and upgrade your knowledge. The Salesforce AP-211 certification exam will provide you with many personal and professional benefits such as more career opportunities, updated and in demands expertise, an increase in salary, instant promotion, and recognition of skills across the world.
