Supporting Material
• 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1 System Architecture	
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2 System Pre-Installation and Installation	
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3 System Configuration	
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

Exam HQT-4160 Papers - 100% 100% Pass-Rate Questions Pool

Our HQT-4160 exam questions are based on the actual situation to stimulate exam circumstance in order to provide you a high-quality and high-efficiency user experience. In addition, the HQT-4160 exam guide function as a time-counter, and you can set fixed time to fulfill your task, so that promote your efficiency in real test. The key strong-point of our HQT-4160 Test Guide is that we impart more important knowledge with fewer questions and answers, with those easily understandable HQT-4160 study braindumps, you will find more interests in them and experience an easy learning process.

The Hitachi HQT-4160 Exam is intended for IT professionals, system administrators, and technical experts who have experience with Hitachi storage systems and are capable of deploying, configuring, and managing VSP 5000 series. Successful candidates are awarded the Hitachi Vantara Qualified Professional certification, which is recognized globally as a demonstration of expert-level technical proficiency.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q46-Q51):

NEW QUESTION # 46

You are installing a new VSP 5500 storage system. Which tool is used to install the initial license keys?

- A. Webconsole
- B. Maintenance Utility
- C. SVP application
- **D. Storage Navigator**

Answer: D

Explanation:

Storage Navigator is the tool used to install the initial license keys on a new VSP 5500 storage system. It provides the necessary interface for license management and activation.

NEW QUESTION # 47

What is the primary function of management software in VSP 5000 storage systems?

- A. To enhance the cooling efficiency of the system
- B. To increase the storage capacity automatically
- **C. To manage and configure storage resources**
- D. To physically secure the storage system

Answer: C

Explanation:

Management software for the Hitachi VSP 5000 is used to administer, monitor, and configure the storage environment.

Common management tools include platforms from Hitachi Vantara such as storage management suites that allow administrators to:

Create and manage storage volumes (LUNs)

Configure RAID groups and storage pools

Assign storage to hosts

Monitor system health and performance

Manage replication and data protection

Perform firmware updates and system configuration

These tools provide a centralized interface to control and optimize the storage system.

NEW QUESTION # 48

The process of 'sparing' in VSP 5000 storage systems is designed to:

- A. Serve as a backup for the storage management software
- **B. Automatically replace failing drives to prevent data loss**
- C. Increase the processing power of the storage controllers
- D. Provide additional storage for user data

Answer: B

NEW QUESTION # 49

You need to create Parity Groups on a VSP 5100. Which three actions must you perform?

(Choose three.)

- A. Use Storage Navigator to create the Parity Groups.
- B. Mount the drives in the appropriate slots of the Disk Unit (DKU).
- C. Use the Web Console to select the appropriate drive type.
- D. Use the Maintenance Utility to choose the drive allocation method (Manual or Automatic).
- E. Use the Maintenance Utility to add the drives that you want to allocate to these Parity Groups.

Answer: A,B,D

Explanation:

Use Storage Navigator to create the Parity Groups.

Parity Groups are created and managed through the Storage Navigator interface.

Use the Maintenance Utility to choose the drive allocation method (Manual or Automatic).

The Maintenance Utility allows you to specify how drives will be allocated to Parity Groups, either manually or automatically.

Mount the drives in the appropriate slots of the Disk Unit (DKU).

Drives must be physically installed in the correct DKU slots before they can be assigned to Parity Groups.

NEW QUESTION # 50

What is the first step in troubleshooting incidents on VSP 5000 storage systems?

- A. Checking the log files
- B. Upgrading the firmware
- C. Rebooting the system
- D. Contacting customer support

Answer: A

Explanation:

In the Hitachi VSP 5000 storage system, log files are the first source of information when troubleshooting any incident.

Reasons to start with log files:

Identify error messages related to hardware, connectivity, or software issues.

Determine the exact time and nature of failures.

Assist in diagnosing problems without disrupting operations.

Provide detailed information for support escalation if needed.

NEW QUESTION # 51

.....

Maybe you have set a series of to-do list, but it's hard to put into practice for there are always unexpected changes during the HQT-4160 exam. Here we recommend our HQT-4160 test prep to you. With innovative science and technology, our study materials have grown into a powerful and favorable product that brings great benefits to all customers. We are committed to designing a kind of scientific study material to balance your business and study schedule. With our HQT-4160 Exam Guide, all your learning process includes 20-30 hours.
