**NEW QUESTION # 48**

Which of the following are responsibilities of the SAP Project Manager during the Explore phase of an S/4HANA Cloud Private Edition implementation? Note: There are 3 correct answers to this question.

- A. Monitor completion of the Business Driven Configuration Questionnaire
- B. Conduct fit-to-standard workshops
- C. Develop a detailed technical architecture design
- D. Establish the Solution Standardization Board
- E. Develop detailed technical specifications for custom development

**Answer: A,B,D**

Explanation:

Step 1 - Understanding the Question

The Explore phase of the SAP Activate methodology focuses on confirming scope, validating SAP Best Practice processes, and finalizing solution design decisions through Fit-to-Standard workshops.

The SAP Project Manager plays a leadership and coordination role - ensuring workshops are executed, project governance is active, and the configuration approach remains aligned with standard SAP practices.

Step 2 - Evaluate Each Option

A). Monitor completion of the Business Driven Configuration Questionnaire

\* The Business-Driven Configuration Questionnaire (BDCQ) captures key requirements and process-specific decisions from the customer.

\* During the Explore phase, the SAP Project Manager ensures the questionnaire is completed accurately to support Fit-to-Standard discussions.

\* Monitoring completion of this document is a formal responsibility of the Project Manager.

Result: Correct - It is a key management activity during Explore.

B). Develop detailed technical specifications for custom development

\* This activity is owned by technical consultants or developers, not the Project Manager.

\* The Project Manager's role is to oversee progress and governance, not to write or develop technical designs.

Result: Incorrect - Outside the PM's direct responsibilities.

C). Develop a detailed technical architecture design

\* Architecture design is the responsibility of technical architects, finalized in the Prepare phase before workshops begin.

\* The Project Manager reviews and monitors this work but does not develop it.

Result: Incorrect - Managed, but not developed by the Project Manager.

D). Conduct fit-to-standard workshops

\* The Project Manager coordinates and ensures Fit-to-Standard workshops are completed according to plan.

\* The PM's role includes scheduling, logistics, resource allocation, and monitoring outcomes.

\* While consultants lead the content of workshops, the PM ensures they are conducted effectively and documented.

Result: Correct - Conducting and managing workshops is part of the Project Manager's Explore responsibilities.

E). Establish the Solution Standardization Board

\* The Solution Standardization Board (SSB) is established during Explore to govern deviation requests from SAP Best Practices.

\* The Project Manager facilitates the setup of this board and ensures that change requests are reviewed and approved in line with the clean-core principle.

Result: Correct - Establishing and managing the SSB is part of the Project Manager's Explore phase tasks.

#### NEW QUESTION # 50

When doing a new implementation on premise or private cloud, which system is recommended to demonstrate standard functionality in the Explore phase?

- A. Trial

- B. Sandbox
- C. Development
- D. Starter

**Answer: D**

Explanation:

During a new implementation project of SAP S/4HANA-whether on-premise or in a private cloud environment-the Explore Phase of the SAP Activate methodology focuses on validating standard SAP Best Practices processes through Fit-to-Standard workshops. The system used to demonstrate these standard processes should contain activated best practice content and be preconfigured for demonstration.

D). Starter system

The Starter system is specifically designed for this purpose. It comes preloaded with SAP Best Practices content, including configuration, sample master data, and transactional data. It allows project teams to explore standard functionality, perform Fit-to-Standard workshops, and validate requirements before system configuration begins.

Other options:

- \* A. Trial system: Used for learning and exploration but not suitable for formal project phases.
- \* B. Development system: Used later during configuration and realization, not for initial demonstrations.
