Pass Guaranteed Quiz 2026 Nokia 4A0-113: Updated Nokia OSPF Routing Protocol Exam Valid Test Duration

It is an important process that filling in the correct mail address in order that it is easier for us to send our 4A0-113 study guide to you after purchase, therefore, this personal message is particularly important. We are selling virtual 4A0-113 learning dumps, and the order of our 4A0-113 training materials will be immediately automatically sent to each purchaser's mailbox according to our system. It is very fast and convenient to have our 4A0-113 practice questions.

Nokia OSPF Routing Protocol Exam Sample Questions (Q69-Q74):

NEW QUESTION # 69

An OSPF ASBR must have at least one interface in the backbone area (area 0)

- A. True
- B. False

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF ASBR Behavior):

An ASBR can exist in any OSPF area - including stub or NSSA areas.

There is no requirement that an ASBR be directly connected to area 0.

Thus, correct answer: B (False).

NEW QUESTION # 70

Select the answer below that correctly lists the 5 different OSPF packet types.

- A. Link State Update, Link State Refresh, Link State Acknowledgement, Database Descriptor, Notification
- **B. Hello, Link State Update, Link State Request, Link State Acknowledgement, Database Descriptor**
- C. Hello, Link State Update, Link State Packet, Link State Acknowledgement, Database Descriptor
- D. Hello, Link State Refresh, Link State Update, Link State Acknowledgement, Link State Authentication

Answer: B

NEW QUESTION # 71

Which of the following statements describe the major features of OSPF? Choose two answers.

- A. Control traffic prioritization
- **B. Route redistribution**
- C. Fast reroute capability
- D. Cut through forwarding
- **E. Traffic engineering extensions**

Answer: B,E

NEW QUESTION # 72

What must be configured on the Nokia 7750 SR for RIP to advertise locally attached links?

- A. Access-lists denoting what is to be advertised
- **B. A policy statement within the router identifying what is to be advertised**
- C. Default metrics for each link
- D. A group and neighbor statement for each peer

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (RIP Route Export Configuration):

"RIP on the Nokia 7750 SR does not automatically advertise locally attached routes. A route policy must be used to export locally learned routes into RIP." Route policies control what routes are exported from the local routing table into RIP advertisements.

No access-list or neighbor configuration is required for this.

Thus, correct answer is A.

-

NEW QUESTION # 73

If a Router originates a type 1 router LSA with the E bit set, what types of areas can it belong to? Select all that apply.

- **A. Standard Area**
- **B. Backbone Area**
- C. Stub Area
- **D. Not So Stubby Area**

Answer: A,B,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

From Nokia 7750 SR OS Routing Protocols Guide (OSPF LSA Type 1 - Router LSAs):

The E-bit indicates that external LSAs (Type 5) are allowed in the area.

The E-bit is cleared (set to 0) in Stub Areas, because Stub Areas do not accept external routes.

In Standard Areas (Normal Areas) and Backbone Areas, the E-bit remains set.

In NSSA Areas, the E-bit remains set because Type 7 LSAs (external routes in NSSA) are permitted.

Thus, correct answers: A, C, D.
