SPLK-1005 Exam Questions of Dumpcollection are ideal for the students who are willing to prepare for the exam in a short time. The Splunk Cloud Certified Admin (SPLK-1005) professionals have worked hard on making this product one of the most successful and user-friendly. This Splunk Cloud Certified Admin (SPLK-1005) exam prep material came into existence after talking to many Splunk professionals and getting their positive feedback. The Dumpcollection guarantees the customers that if they fail to pass the Splunk Cloud Certified Admin (SPLK-1005) exam despite all their efforts they can claim a refund according to some terms and conditions.

Splunk SPLK-1005 Certification Exam is an excellent way for IT professionals to demonstrate their expertise in managing and maintaining Splunk Cloud environments. Obtaining this certification can lead to better job opportunities and higher salaries. With proper preparation and dedication, candidates can pass the exam and become certified Splunk Cloud administrators.

Splunk Cloud Certified Admin Sample Questions (Q69-Q74):

NEW QUESTION # 69

In which file can the SHOULD_LINEMERCE setting be modified?

- A. props.conf
- B. transforms.conf
- C. inputs.conf
- D. outputs.conf

Answer: A

Explanation:

The SHOULD_LINEMERGE setting is used in Splunk to control whether or not multiple lines of an event should be combined into a single event. This setting is configured in the props.conf file, where Splunk handles data parsing and field extraction. Setting SHOULD_LINEMERGE = true merges lines together based on specific rules.

Splunk Documentation Reference: props.conf - SHOULD_LINEMERGE

NEW QUESTION # 70

Which Splunk Cloud feature primarily provides centralized operational dashboards for distributed infrastructure monitoring activities?

- A. Monitoring Console displays deployment health metrics and distributed search performance information centrally.
- B. Search Head clustering authenticates users and distributes application packages toward enterprise endpoints continuously.
- C. Deployment Server permanently stores archived security logs for forensic investigations across enterprises globally.
- D. Universal Forwarders synchronize indexed events and retention settings across cloud storage infrastructures automatically.

Answer: A

Explanation:

Monitoring Console centralizes operational metrics including indexing throughput, resource utilization, and search latency.

Administrators rely on its dashboards to proactively monitor distributed deployments and quickly identify infrastructure bottlenecks or performance degradation issues.

NEW QUESTION # 71

Which statement best describes the primary purpose of sourcetypes during Splunk event processing operations?

- A. Sourcetypes permanently determine retention policies and storage allocation for indexed enterprise datasets globally.
- B. Sourcetypes authenticate users and assign administrative permissions within distributed search infrastructures securely.
- C. Sourcetypes identify event formats and control parsing behavior during ingestion processing automatically.
- D. Sourcetypes replace indexes entirely when organizing searchable historical event storage repositories permanently.

Answer: C

NEW QUESTION # 72

Which type of forwarder is a full Splunk Enterprise instance that can run apps and add-ons?

- A. Universal forwarder
- B. Heavy forwarder
- C. Search head
- D. Deployment server

Answer: B

NEW QUESTION # 73

Which of the following is an accurate statement about the delete command?

- A. By default, only admins can run the delete command.
- B. Events are virtually deleted by marking them as deleted.
- C. The delete command removes events from disk.
- D. Deleting events reclaims disk space.

Answer: B

The delete command in Splunk does not remove events from disk but rather marks them as "deleted" in the index. This means the events are not accessible via searches, but they still occupy space on disk. Only users with the can_delete capability (typically admins) can use the delete command.

NEW QUESTION # 74
