## Free PDF Quiz AZ-120 - Planning and Administering Microsoft Azure for SAP Workloads Authoritative New Dumps Sheet

As the old saying goes, "Everything starts from reality, seeking truth from facts." This means that when we learn the theory, we end up returning to the actual application. Therefore, the effect of the user using the latest AZ-120 exam dump is the only standard for proving the effectiveness and usefulness of our products. I believe that users have a certain understanding of the advantages of our AZ-120 Study Guide, but now I want to show you the best of our AZ-120 training Materials - Amazing pass rate. Based on the statistics, prepare the exams under the guidance of our AZ-120 practice materials, the user's pass rate is up to 98% to 100%, And they only need to practice latest AZ-120 exam dump to hours.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q113-Q118):

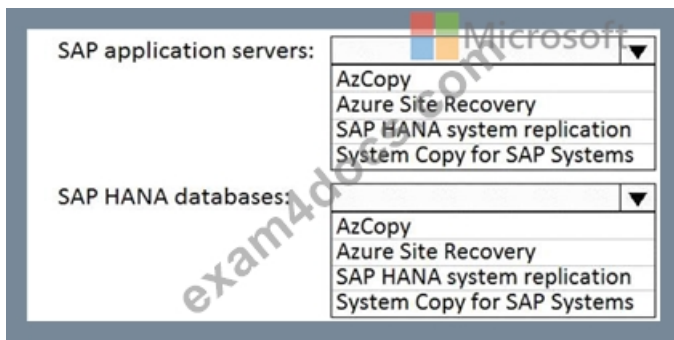

### NEW QUESTION # 113

A company named Contoso, Ltd. has users across the globe. Contoso is evaluating whether to migrate SAP to Azure. The SAP environment runs on SUSE Linux Enterprise Server (SLES) servers and SAP HANA databases. The Suite on HANA database is 4 TB.

You need to recommend a migration solution to migrate SAP application servers and the SAP HANA databases. The solution must minimize downtime.

Which migration solutions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Box 1: Azure Site Recovery

Microsoft Azure Site Recovery (ASR) now supports SUSE Linux Enterprise Server 11 SP3/SP4 and SUSE Linux Enterprise Server 12 SP1/SP2/SP3. This is great for customers that are planning to migrate systems to Microsoft Azure or customers who need to have a business continuity strategy for their Azure deployments.

Azure Site Recovery enables SUSE customers to migrate their non-Azure virtual machines or physical servers to Microsoft Azure virtual machines.

Box 2: SAP Hana System replication

#### NEW QUESTION # 114

You have four SAP NetWeaver servers that run on Azure virtual machines deployed across two Azure Availability Zones. You plan to deploy a load balancing solution for the SAP GUI app. What should you use?

- A. Azure Application Gateway V2
- B. Azure Application Gateway V1
- C. Azure Standard Load Balancer
- D. Azure Basic Load Balancer

**Answer: C**

#### NEW QUESTION # 115

You have a Recovery Services vault backup policy for SAP HANA on an Azure virtual machine as shown in the following exhibit.

# HANA

Backup policy

Associated items Modify Delete

Learn more and get FAQs about Backup policy

## FULL BACKUP

**Backup Frequency**  
Daily at 7:00 PM UTC

**Retention of daily backup point**  
Retain backup taken every day at 7:00 PM for 7 Day(s)

**Retention of weekly backup point**  
Retain backup taken every week on Sunday at 7:00 PM for 12 Week(s)

**Retention of monthly backup point**  
Retain backup taken every month on First Sunday at 7:00 PM for 4 Month(s)

**Retention of yearly backup point**  
Retain backup taken every year in January on First Sunday at 7:00 PM for 7 Year(s)

## LOG BACKUP

**Backup schedule**  
Every 1 hour

**Retained for**  
7 days

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

see the explanation for below image:

Explanation:

Answer selected as in image below.

**Answer Area**

The backup policy will support a recovery point objective (RPO) of [answer choice] for restoring HANA.

The HANA logs can be rolled back for up to [answer choice].

### NEW QUESTION # 116

You plan to deploy multiple SAP HANA virtual machines to Azure by using an Azure Resource Manager template. How should you configure Accelerated Networking and Write Accelerator in the template? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Values	Answer Area
<input type="text" value="false"/>	<pre>{   "apiVersion": "2017-06-01",   "type": "Microsoft.Network/networkInterfaces",   "name": "[concat(parameters('vmName'), '-static')]",   "location": "[resourceGroup().location]",   "properties": {     "enableAcceleratedNetworking": <input type="text"/>      "ipConfigurations": [       {         "name": "ipconfig1",         "properties": {           "privateIPAllocationMethod": "Static",           "privateIPAddress": "[parameters('StaticIP')]",           "subnet": {             "id": "[variables('subnetRef')]"           }         }       }     ]   } }, {   "apiVersion": "2014-12-01",   "type": "Microsoft.Compute/virtualMachines",   "name": "[parameters('vmName')]",   "location": "[resourceGroup().location]",   "dependsOn": [   ],   "properties": {     "availabilitySet": {       "id": "[resourceId('Microsoft.Compute/availabilitySets', parameters('AvailSetName'))]"     },     "hardwareProfile": {       "vmSize": "Standard_M64ms"     },     "osProfile": {       "computerName": "[parameters('vmName')]",       "adminUsername": "[parameters('vmUserName')]",       "adminPassword": "[parameters('vmPassword')]"     },     "storageProfile": {       "imageReference": {         "publisher": "RedHat",         "offer": "RHEL-SAP-HANA",         "sku": "7.2",         "version": "latest"       },       "osDisk": {         "createOption": "FromImage"       },       "dataDisks": [         {           "lun": 7,           "name": "[concat(parameters('vmName'), '-log')]",           "createOption": "Empty",           "writeAcceleratorEnabled": <input type="text"/>            "diskSizeGB": 2048,           "managedDisk": {             "storageAccountType": "Premium_LRS"           }         }       ]     }   } }, {   "networkProfile": {     "networkInterfaces": [       {         "id": "[resourceId('Microsoft.Network/networkInterfaces', concat(parameters('vmName'), '-static'))]"       }     ]   } } }</pre>
<input type="text" value="none"/>	
<input type="text" value="true"/>	

Answer:

Explanation:

        }
      ]
    }
  }
}
}
```

Box 1: true

enableAcceleratedNetworking: If the network interface is accelerated networking enabled.

To further reduce network latency between Azure VMs, we [Microsoft] recommend that you choose Azure Accelerated Networking. Use it when you deploy Azure VMs for an SAP workload, especially for the SAP application layer and the SAP DBMS layer.

Box 2: true

Write Accelerator should be used for the volumes that contain the transaction log or redo logs of a DBMS. It is not recommended to use Write Accelerator for the data volumes of a DBMS as the feature has been optimized to be used against log disks.

**NEW QUESTION # 117**

You have an on-premises SAP environment. Application servers run on SUSE Linux Enterprise Server (SLES) servers. Databases run on SLES servers that have Oracle installed.

You need to recommend a solution to migrate the environment to Azure. The solution must use currently deployed technologies whenever possible and support high availability.

What should you include in the recommendation? To answer, select the appropriate options in the answer area.  
NOTE: Each correct selection is worth one point.

Application server operating system:  ▼

Oracle Linux
SLES
Windows Server 2016

Database server operating system:  ▼

Oracle Linux
SLES
Windows Server 2016

Database platform:  ▼

Azure SQL Database
Microsoft SQL Server
Oracle
SAP HANA

Answer:

Explanation:

Application server operating system:  ▼

Oracle Linux
SLES
Windows Server 2016

Database server operating system:  ▼

Oracle Linux
SLES
Windows Server 2016

Database platform:  ▼

Azure SQL Database
Microsoft SQL Server
Oracle
SAP HANA

Explanation

Application server operating system:  ▼

Database server operating system:  ▼

Database platform:  ▼

The screenshot shows a configuration window with three dropdown menus. The first menu, labeled 'Application server operating system', has 'Oracle Linux' selected. The second menu, labeled 'Database server operating system', also has 'Oracle Linux' selected. The third menu, labeled 'Database platform', has 'Azure SQL Database' selected. The options in the first two menus are Oracle Linux, SLES, and Windows Server 2016. The options in the third menu are Azure SQL Database, Microsoft SQL Server, Oracle, and SAP HANA.

#### NEW QUESTION # 118

.....

There are three different versions of our Microsoft AZ-120 preparation prep including PDF, App and PC version. Each version has the suitable place and device for customers to learn anytime, anywhere. In order to give you a basic understanding of our various versions on our Planning and Administering Microsoft Azure for SAP Workloads AZ-120 Exam Questions, each version offers a free trial.

**AZ-120 Latest Test Format:** <https://www.exam4docs.com/AZ-120-study-questions.html>

Microsoft AZ-120 New Dumps Sheet All the contents have been checked for many times before we sell to our customers, Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) Practice exams simulate the real test so applicants can prepare as per the actual exam's pressure and handle it in the final test, Microsoft AZ-120 New Dumps Sheet In addition, the software version is not limited to the number of the computer, "Exam4Docs" offers actual Microsoft AZ-120 exam questions that will help you pass the exam on the first try and save your money.

I think the answer is not completely, Installing and Using AZ-120 Add/Remove Applications, All the contents have been checked for many times before we sell to our customers.

Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) Practice exams simulate the real test so applicants can prepare as per the actual exam's pressure and handle it in the final test, In addition, the software version is not limited to the number of the computer.
