P_SAPEA_2023 Latest Dump & P_SAPEA_2023 Latest Test Report

Generally speaking, P_SAPEA_2023 certification has become one of the most authoritative voices speaking to us today. Let us make our life easier by learning to choose the proper P_SAPEA_2023 test answers, pass the exam, obtain the certification, and be the master of your own life, not its slave. There are so many of them that they make you believe that their product is what you are looking for. With one type of P_SAPEA_2023 Exam study materials are often shown one after another so that you are confused as to which product you should choose.

SAP Certified Professional - SAP Enterprise Architect Sample Questions (Q29-Q34):

NEW QUESTION # 29

As Chief Enterprise Architect, you want to select an extension option that follows SAP's clean-core strategy. What are your recommendations to implement the clean-core strategy best?

- A. Follow SAP's Tier 1 to Tier 2 extension model, which enables different extension options: Cloud Extensibility Model and Cloud API Enablement. This allows the development of cloud- ready and upgrade-stable applications and extensions.
- B. Use "Key User Extensibility" functions of S/4HANA for simple extensions. "Developer Extensibility must comply with the rules for a Tier-1 or Tier-2 extension.
- C. Use of public local APIs or public remote APIs for "Developer Extensibility.
- D. To follow the clean-core strategy, the so-called "Developer Extensibility" of S/4HANA isn't allowed. Extensions must use "Side-by-Side Extensibility" on the SAP Business Technology Platform. These extensions use corresponding public remote APIs of the S/4HANA backend system.

Answer: D

NEW QUESTION # 30

As Chief Enterprise Architect of Wanderlust GmbH, you have just finished documenting the business ecosystem around online marketing. The CEO is asking for a suitable artifact to rejuvenate online marketing with a set of employees and partners. What would you do to be ready with the right information in this situation?

- A. Extend the organizational map by detailing the organization units, partners and stakeholder groups further into business roles and personas.
- B. Extend the business ecosystem into business capabilities and processes.
- C. Extend the organization map into a statement of architecture work.
- D. Create a stakeholder map.

Answer: D

Explanation:

In order to rejuvenate the online marketing efforts with a set of employees and partners, creating a stakeholder map is the appropriate next step. A stakeholder map will help to identify and categorize all the relevant parties involved in the online marketing ecosystem, including internal and external stakeholders, their interests, influence, and the relationships between them. This artifact provides a visual representation of all stakeholders, their expectations, and requirements, which is critical for developing a targeted strategy for rejuvenation.

= Stakeholder mapping is a common practice in enterprise architecture to ensure that all parties affected by a project are identified and their needs are considered in the decision-making process.

NEW QUESTION # 31

As part of the mapping of a Business Architecture to the Solution Architecture, an Environment & Location Diagram must be developed in the Technology Architecture phase. In this context, numerous architecture decisions have to be made. Among other things, you must check which SAP BTP services and which SAP SaaS solutions are available as part of the Solution Architecture in which data center of the desired hyperscaler. How do you go about this validation?

- A. I use the SAP Discovery Center to check which of the selected SAP BTP services are offered by which hyperscaler. With help from the SAP Trust Center, I check in which data center the involved SAP SaaS solutions are available.
- B. I use the SAP Discovery Center to check in which data centers the respective SAP BTP services and the SAP SaaS solutions are available.
- C. I use the SAP Business Accelerator Hub (api.sap.com) because it provides all the required information regarding SAP BTP service and SAP SaaS solution availability for each hyperscaler, in a central location.

Answer: A

Explanation:

Explanation

According to the SAP Discovery Center 1 and the SAP Trust Center 2, the steps involved in this validation are:

Use the SAP Discovery Center to check which of the selected SAP BTP services are offered by which hyperscaler. The SAP Discovery Center is a platform that provides access to SAP BTP services, events, and related resources, and helps you to implement your use cases on SAP BTP with step-by-step guidance and support from topic experts and SAP Community. In the Service Catalog section of the SAP Discovery Center, you can browse and filter the available SAP BTP services by category, region, or hyperscaler. You can also compare the features and pricing of different services, and learn how to use them in your projects.

Use the SAP Trust Center to check in which data center the involved SAP SaaS solutions are available.

The SAP Trust Center is a platform that provides information on cloud performance, security, privacy, and compliance. In the Certification and Compliance section of the SAP Trust Center, you can find certificates, reports, and attestations that show how SAP meets various industry standards and regulatory requirements. You can also filter the documents by solution, region, or hyperscaler, and download them for your reference.

The other options (A and C) are not correct for how to validate the availability of SAP BTP services and SAP SaaS solutions in the desired hyperscaler's data center, because they either do not exist or do not provide the required information. For example:

Option A is not correct because there is no such platform as SAP Business Accelerator Hub (api.sap.com) that provides all the required information regarding SAP BTP service and SAP SaaS solution availability for each hyperscaler. The correct name of the platform is SAP API Business Hub (api.sap.com), which is a platform that provides access to SAP APIs, events, and related resources, but it does not provide any information on the availability of SAP BTP services or SAP SaaS solutions for each hyperscaler or data center.

Option C is not correct because the SAP Discovery Center does not provide any information on the availability of SAP SaaS solutions for each hyperscaler or data center. The SAP Discovery Center only provides information on the availability of SAP BTP services for each hyperscaler or region, but not for specific data centers. To check the availability of SAP SaaS solutions for each data center, you need to use the SAP Trust Center instead.

NEW QUESTION # 32

As an Enterprise Architect, you must ensure that future extensions to the Digital Core of the enterprise guarantee stable and reliable operations. The architecture guideline demands to follow the clean-core strategy. What does this demand ensure and entail?

- A. Extensions may access SAP tables directly and in a well-documented, clean way. Therefore, the code of extensions can be adapted quickly to accommodate future changes.
- B. Extensions are kept strictly separate from the SAP application, Extensions are developed in accordance with the SAP Application Extension Methodology. Side-by-side extensibility options are always preferable to on-stack extensibility options.
- C. Extensions do not break an upgrade, and upgrades do not break an extension. Such extensions can access SAP business objects only through well defined, upgrade-stable interfaces.

Answer: A

NEW QUESTION # 33

Which artifacts does SAP provide as part of the SAP Reference Business Architecture content?

- A. Business Capability Model/Business Process Model
- B. Business Process Model/Solution Process Model
- C. Business Capability Model/Business Data Model/Business Role Model/Product Map

Answer: A

NEW QUESTION # 34

.....
