

# SC-401 Online Test, SC-401 Cost Effective Dumps

P.S. Free 2026 Microsoft SC-401 dumps are available on Google Drive shared by ValidExam: <https://drive.google.com/open?id=1dntSILy1agwUod8yP7w2838PiskZFbqR>

we believe that all students who have purchased SC-401 practice materials will be able to successfully pass the professional SC-401 qualification exam as long as they follow the content provided by our SC-401 study materials, study it on a daily basis, and conduct regular self-examination through mock exams. Of course, before you buy, our SC-401 Study Materials offer you a free trial service, as long as you log on our website, you can download our trial questions bank for free. I believe that after you try SC-401 test engine, you will love them.

## Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Implement Data Loss Prevention and Retention:</b> This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Protect Data Used by AI Services:</b> This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Implement Information Protection:</b> This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Manage Risks, Alerts, and Activities:</b> This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.</li> </ul>

## ValidExam SC-401 Administering Information Security in Microsoft 365 Exam Questions are Available in Three Different

By contrasting with other products in the industry, our SC-401 test guide really has a higher pass rate, which has been verified by many users. As long as you use our SC-401 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. SC-401 learning guide hopes to progress together with you and work together for their own future. The high passing rate of Administering Information Security in Microsoft 365 exam training guide also requires your efforts. If you choose SC-401 test guide, I believe we can together contribute to this high pass rate.

### Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q199-Q204):

#### NEW QUESTION # 199

##### HOTSPOT

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

##### Answer:

Explanation:

Explanation:

To detect and protect confidential documents, we need a custom rule to identify project codes that start with 999 (since they are classified as confidential).

Box 1: A Sensitive Info Type (SIT) allows Microsoft Purview DLP policies to recognize structured data (e.g., project codes). DLP policies require a sensitive info type to detect content based on patterns, keywords, or dictionary terms. A sensitivity label alone does not define detection logic-it is used for classification and protection after content is identified.

Box 2: Since project codes follow a structured 10-digit pattern, we should use a Regular Expression (Regex) to match project codes that start with 999.

Example Regex pattern:

`999\d{7}`

This pattern detects a 10-digit number starting with "999".

#### NEW QUESTION # 200

You have a Microsoft 365 sensitivity label that is published to all the users in your Microsoft Entra tenant as shown in the following exhibit.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

##### Answer:

Explanation:

Explanation:

Statement 1 - No. The sensitivity label includes content marking (watermark: INTERNAL), but it only applies to documents where the label is manually or automatically applied, not to all documents by default.

Statement 2 - No. The sensitivity label only specifies a watermark, not a header. If a header marking was configured, it would explicitly appear in the label settings.

Statement 3 - No. There is no indication that auto-labeling is configured to apply the label only to documents with the word 'rebranding'. Auto-labeling is an optional setting that needs explicit configuration.

### NEW QUESTION # 201

#### SIMULATION

Username and password

Use the following login credentials as needed:

To enter your username, place your cursor in the Sign in box and select the username below.

To enter your password, place your cursor in the Enter password box and select the password below.

Microsoft 365 Username:

admin@WWLx121586.onmicrosoft.com

Microsoft 365 Password: XXXXXXXXXXX

If the Microsoft Edge browser or Microsoft 365 portal does not load successfully, select the Microsoft Edge browser icon from the task bar, type the URL "https://admin.microsoft.com", and press Enter.

The following information is for technical support purposes only:

Lab Instance: XXXXXXXXXXX

Task 4

You need reduce the number of false-positives generated by the General Data Protection Regulation (GDPR) data loss prevention (DLP) policy.

#### Answer:

Explanation:

To reduce false-positives with a GDPR DLP policy, run the policy in audit-only mode first to identify issues, continuously refine the rules based on this data, and train employees on proper data handling.

To run an existing GDPR DLP policy in audit mode, you need to edit the policy in your Microsoft Purview portal and set the policy mode to "simulation" or "test". In the policy configuration, select the option to "Run the policy in simulation mode" or "Test mode" instead of enabling enforcement immediately. This will log any violations without blocking them, allowing you to review the results before a full deployment.

Steps to run a policy in audit (simulation) mode

Step 1: Navigate to DLP policies: Sign in to the Microsoft Purview portal and go to Data loss prevention > Policies.

Step 2: Edit the policy: Select the existing GDPR policy you want to run and choose to edit it.

Step 3: Locate the policy mode settings: In the policy configuration workflow, find the page for policy mode, which may be labeled as "Policy Mode" or "Simulate or turn on the policy".

Step 4: Enable simulation mode: Choose the option to "Run the policy in simulation mode".

Step 5: Configure optional settings: You can also choose to "Show policy tips" in simulation mode to help educate users about potential violations without actually blocking them. [Skip] Step 6: Save and submit: Proceed through the rest of the wizard and select Next and Submit to save your changes.
