The C\_ACDET\_2506 certificate is hard to get. If you really crave for it, our C\_ACDET\_2506 guide practice is your best choice. We know it is hard for you to make decisions. You will feel sorry if you give up trying. Also, the good chance will slip away if you keep standing still. Our price is reasonable and inexpensive. You totally can afford for our C\_ACDET\_2506 Preparation engine. And we give some discounts from time to time, so you can buy at a more favorable price.

### SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li> </ul>

### SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q38-Q43):

#### NEW QUESTION # 38

Which key technical activities occur during the Deploy phase? (Select 3 correct answers)

- A. Apply the bundle in production
- B. Execute change management plans
- C. Rebuild all custom header fields in production
- D. Go-live
- E. Migration to production

**Answer: A,D,E**

Explanation:

During the Deploy phase, key technical activities include:

\* A. Apply the bundle in production: Using Intelligent Configuration Manager (ICM) to migrate configuration bundles to the production environment.

\* B. Go-live: Transitioning from project mode to operational live usage of the SAP Ariba solution.

\* D. Migration to production: Performing final configuration migration, data loads, and cutover activities per the deployment plan. Rebuilding custom header fields manually (C) is not required because configuration is migrated rather than rebuilt. Executing change management plans (E) is important but considered a business/change activity, not a technical migration activity. These technical tasks ensure the system is correctly configured and operationally ready for end users.

### NEW QUESTION # 39

You have a custom string field with a list of values. The values are represented as an Enumeration. Which of the following applies to this scenario?

- A. The display order of the values is alphabetical
- B. The display order in the drop down matches the order defined in the enumeration file
- C. The user can filter the values using the search box in the chooser
- D. In the enumeration file, the Value column must only contain whole numbers

**Answer: B,C**

### NEW QUESTION # 40

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.
- B. Publish the form template within the test site in order to add the form fields in the package.
- C. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- D. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- E. Discard any other packages that appear in My Action Items.

**Answer: A,C,D**

Explanation:

When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.

\* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

\* String Resource Files (C): These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.

\* Flex Master Data (E): Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

### NEW QUESTION # 41

During which SAP Activate Methodology phase do you migrate the configuration to Production?

- A. Push
- B. Migrate
- C. Move
- D. Deploy

**Answer: D**

Explanation:

The Deploy phase is when final cutover activities take place, including migrating configurations and master data to production, running final system tests, and performing the go-live. The other options are not standard SAP Activate phases for Ariba.

### NEW QUESTION # 42

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? (Select 2 correct answers)

- A. SAP Ariba Contracts
- B. SAP Ariba Category Management

- C. SAP Ariba Buying and Invoicing
- D. SAP Ariba Supplier Lifecycle and Performance

Answer: A,D

Explanation:

The SAP Ariba Strategic Sourcing Suite typically includes SAP Ariba Contracts and SAP Ariba Supplier Lifecycle and Performance (SLP) solutions. These modules, along with SAP Ariba Sourcing and Supplier Risk, form the core sourcing suite for supplier management, contract lifecycle management, and performance analytics. Category Management and Buying and Invoicing belong to different SAP Ariba product suites focused on procurement and spend management rather than strategic sourcing.

### NEW QUESTION # 43

.....

It is not hard to find that there are many different kinds of products in the education market now. It may be difficult for users to determine the best way to fit in the complex choices. We can tell you with confidence that the C\_ACDET\_2506 study materials are superior in all respects to similar products. First, users can have a free trial of C\_ACDET\_2506 Learning Materials, to help users better understand the C\_ACDET\_2506 study materials. If the user discovers that the product is not appropriate for him, the user can choose another type of learning material.
