

Exam ZDTA Practice | ZDTA Reliable Test Topics

What's more, part of that VCEdumps ZDTA dumps now are free: https://drive.google.com/open?id=1dvNIOMIsyb6egDRWDHcfOUB_T1HyUEI

The Zscaler ZDTA web-based practice exam software can be easily accessed through browsers like Safari, Google Chrome, and Firefox. The customers do not need to download or install excessive software or applications to take the Zscaler Digital Transformation Administrator (ZDTA) web-based practice exam. The ZDTA web-based practice exam software format can be accessed through any operating system like Windows or Mac.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 2	<ul style="list-style-type: none">• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 3	<ul style="list-style-type: none">• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.

Topic 4	<ul style="list-style-type: none"> • Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. Data Protection Services
Topic 5	<ul style="list-style-type: none"> • Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 6	<ul style="list-style-type: none"> • Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.

Best Preparations of ZDTA Exam Zscaler Unlimited

An Zscaler Digital Transformation Administrator (ZDTA) practice questions is a helpful, proven strategy to crack the Zscaler ZDTA exam successfully. It helps candidates to know their weaknesses and overall performance. VCEdumps has hundreds of Zscaler Digital Transformation Administrator (ZDTA) exam dumps that are useful to practice in real time. The Zscaler ZDTA practice questions have a close resemblance with the actual ZDTA exam.

Zscaler Digital Transformation Administrator Sample Questions (Q72-Q77):

NEW QUESTION # 72

What does TLS Inspection for Zscaler Internet Access secure public internet browsing with?

- A. Storing connection streams for future customer review.
- B. Removing certificates and reconnecting client connection using HTTP.
- C. Logging which clients receive the original webserver certificate.
- **D. Intermediate certificates are created for each client connection.**

Answer: D

Explanation:

TLS Inspection in Zscaler Internet Access secures public internet browsing by creating intermediate certificates for each client connection. This Man-In-The-Middle approach enables Zscaler to decrypt and inspect encrypted traffic for threats and policy compliance while still maintaining secure connections with the client. The intermediate certificate acts as a trusted entity between the client and the real server during inspection.

NEW QUESTION # 73

Which Risk360 key focus area observes a broad range of event, security configurations, and traffic flow attributes?

- A. External Attack Surface
- B. Lateral Propagation
- **C. Prevent Compromise**
- D. Data Loss

Answer: C

Explanation:

Prevent Compromise analyzes device and network telemetry - including security configurations, event logs, and traffic flows - to gauge how well you're blocking initial intrusion attempts and misconfigurations.

NEW QUESTION # 74

What enables zero trust to be properly implemented and enforced between an originator and the destination application?

- A. Access is granted without sharing the network between the originator and the destination application.
- B. Cloud firewall policies ensure that only authenticated users are allowed access to destination applications.
- C. Connectivity between the originator and the destination application is over IPSec tunnels.
- D. Trusted network criteria designate the locations of originators which can be trusted.

Answer: A

Explanation:

Zero Trust is achieved by granting users application-level access without ever placing them on the same network as the destination, ensuring users can reach only the specific app and never the underlying network.

NEW QUESTION # 75

Zscaler Advanced Threat Protection (ATP) is a key capability within Zscaler Internet Access (ZIA), protecting users against attacks such as phishing. Which of the following is NOT part of the ATP workflow?

- A. Reporting high latency from the CEO's Teams call due to a low WiFi signal
- B. Preventing the download of a password protected zip file
- C. IPS coverages for client-side and server-side
- D. Comprehensive URL categories for newly registered domains

Answer: A

Explanation:

The ATP workflow focuses on protecting users from security threats such as phishing, malware, and malicious URLs through mechanisms including IPS coverage on client and server sides, categorization of URLs (especially newly registered domains), and prevention of risky file downloads like password-protected zip files. However, reporting on network performance issues such as high latency on a Teams call caused by low WiFi signal is outside the scope of ATP. This type of issue relates to digital experience or network performance monitoring, not threat protection.

NEW QUESTION # 76

Which filtering policy blocked access to the Network Application?

- A. Sandbox
- B. Firewall Filtering
- C. DLP
- D. Browser Control

Answer: B

Explanation:

Firewall Filtering policies govern network-level application traffic, so access to a Network Application is blocked by a Firewall Filtering rule.

NEW QUESTION # 77

.....

Our ZDTA practice questions are undetected treasure for you if this is your first time choosing them. These advantages help you get a thorough look in details. First of all, the price of our ZDTA exam braindumps is reasonable and affordable, no matter the office staffs or the students can afford to buy them. Secondly, the quality of our ZDTA Study Guide is high. You can just look the pass rate of our ZDTA training quiz, it is high as 98% to 100%.
