On AOS10 Gateways, which device persona is only available when configuring a Gateway-only group?

- A. Branch
- **B. VPN Concentrator**
- C. Mobility
- D. Edge

Answer: B

Explanation:

VPN Concentrator is the device persona that is only available when configuring a Gateway-only group on AOS10 Gateways. A device persona defines the role and functionality of a Gateway in a network. A Gateway-only group is a group that contains only Gateways and no APs. A VPN Concentrator persona enables a Gateway to terminate VPN tunnels from remote APs or clients and provide secure access to corporate resources.
