

Ace Your Fortinet NSE8_812 Exam with ITPassLeader

DOWNLOAD the newest ITPassLeader NSE8_812 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1rdhdBPMYPTa446F0Fh7g08q0hD3eYAu>

The Fortinet NSE8_812 certification exam is one of the top-rated and valuable credentials in the Fortinet world. This Fortinet NSE8_812 exam questions is designed to validate the candidate's skills and knowledge. With Fortinet NSE 8 - Written Exam (NSE8_812) exam dumps everyone can upgrade their expertise and knowledge level. By doing this the successful NSE8_812 Exam candidates can gain several personal and professional benefits in their career and achieve their professional career objectives in a short time period.

This means a little attention paid to NSE8_812 test prep material will bring in great profits for customers, The pass rate is 98.95% for the NSE8_812 exam torrent, and you can pass the exam if you choose us. Besides, free demo is available for NSE8_812 PDF version, and you can have a try before buying. Privacy and security, 98 to 100 percent of former exam candidates have achieved their success by the help of our NSE8_812 Practice Questions. We assure you that we will never sell users' information because it is damaging our own reputation.

2026 NSE8_812 Exam Pass Certify | Latest NSE8_812 Exam Price: Fortinet NSE 8 - Written Exam (NSE8_812)

Hundreds of candidates want to get the Fortinet NSE 8 - Written Exam (NSE8_812) (NSE8_812) certification exam because it helps them in accelerating their Fortinet careers. Cracking the NSE8_812 exam of this credential is vital when it comes to the up gradation of their resume. The NSE8_812 Certification Exam helps students earn from online work and it also benefits them in order to get a job in any good tech company.

Fortinet NSE 8 - Written Exam (NSE8_812) Sample Questions (Q33-Q38):

NEW QUESTION # 33

Refer to the exhibit showing a FortiView monitor screen.

After a Secure SD-WAN implementation a customer reports that in FortiAnalyzer under FortiView Secure SD-WAN Monitor there is No Device for selection.

What can cause this issue?

- A. sla-fail-log-period and sla-pass-log-period on FortiGate health check is not set.
- **B. Upload option from FortiGate to FortiAnalyzer is not set as a real time.**
- C. Extended logging is not enabled on FortiGate.
- D. ADOM 1 is set as a Fabric ADOM.

Answer: B

NEW QUESTION # 34

Refer to the exhibits.

FORTIAP 431F	
Hardware	
Hardware Type	Indoor AP
Number of Radios	3 + 1 BLE
Number of Antennas	5 Internal + 1 BLE Internal
Antenna Type and Peak Gain	PIFA: 4 dBi for 2.4 GHz, 5 dBi for 5 GHz
Maximum Data Rate	Radio 1: up to 1147 Mbps Radio 2: up to 2402 Mbps Radio 3: scan only
Bluetooth Low Energy Radio	Bluetooth scanning and iBeacon advertisement @ 6 dBm max TX power
Interfaces	1x 100/1000/2500 Base-T RJ45, 1 x 10/100/1000 Base-T RJ45, 1x Type A USB, 1x RS-232 RJ45 Serial Port
Power over Ethernet (PoE)	• 802.3at PoE default • 1 port powered by 802.3at or 2 ports powered by 802.3af - Full System functionality + USB support
Maximum Tx Power (Conducted)	Radio 1: 2.4 GHz 24 dBm / 251 mW (4 chains combined)* Radio 2: 5 GHz 23 dBm / 200 mW (4 chains combined)* Radio 3: NA
Environment	
Power Supply	SP-FAP400-PA-XX or GPI-130
Power Consumption (Max)	24.5 W
Directives	Low Voltage Directive • RoHS
UL2043 Plenum Material	No
Mean Time Between Failures	>10 Years
Surge Protection Built In	Yes
Hit-less PoE Failover	Yes

Exhibit B

	FORTISWITCH 224E-POE	FORTISWITCH 124E-FPOE	FORTISWITCH 248E-FPOE
Hardware Specifications			
Total Network Interfaces	24x GE RJ45 ports and 4x GE SFP ports	24x GE RJ45 and 4x GE SFP	48x GE RJ45 ports and 4x GE SFP ports
Dedicated Management 10/100 Port	1	0	1
RJ-45 Serial Console Port	1	1	1
Form Factor	1 RU Rack Mount	1 RU Rack Mount	1 RU Rack Mount
Power over Ethernet (PoE) Ports	12 (802.3af/802.3at)	24 (802.3af/at)	48 (802.3af/802.3at)
PoE Power Budget	180 W	370 W	740 W
Mean Time Between Failures	> 10 years	> 10 years	> 10 years
Retail Price	\$1,000	\$1,250	\$1,500

A customer wants to deploy 12 FortiAP 431F devices on high density conference center, but they do not currently have any PoE switches to connect them to. They want to be able to run them at full power while having network redundancy. From the FortiSwitch models and sample retail prices shown in the exhibit, which build of materials would have the lowest cost, while fulfilling the customer's requirements?

- A. 1x FortiSwitch 248EFPOE
- B. 2x FortiSwitch 224E-POE
- C. 2x FortiSwitch 248E-FPOE
- D. 2x FortiSwitch 124E-FPOE

Answer: C

Explanation:

The customer wants to deploy 12 FortiAP 431F devices on a high density conference center, but they do not have any PoE switches to connect them to. They want to be able to run them at full power while having network redundancy. PoE switches are

switches that can provide both data and power to connected devices over Ethernet cables, eliminating the need for separate power adapters or outlets. PoE switches are useful for deploying devices such as wireless access points, IP cameras, and VoIP phones in locations where power outlets are scarce or inconvenient. The FortiAP 431F is a wireless access point that supports PoE+ (IEEE 802.3at) standard, which can deliver up to 30W of power per port. The FortiAP 431F has a maximum power consumption of 25W when running at full power. Therefore, to run 12 FortiAP 431F devices at full power, the customer needs PoE switches that can provide at least 300W of total PoE power budget (25W x 12). The customer also needs network redundancy, which means that they need at least two PoE switches to connect the FortiAP devices in case one switch fails or loses power. From the FortiSwitch models and sample retail prices shown in the exhibit, the build of materials that has the lowest cost while fulfilling the customer's requirements is 2x FortiSwitch 248E-FPOE. The FortiSwitch 248E-FPOE is a PoE switch that has 48 GE ports with PoE+ capability and a total PoE power budget of 370W. It also has 4x 10 GE SFP+ uplink ports for high-speed connectivity. The sample retail price of the FortiSwitch 248E-FPOE is \$1,995, which means that two units will cost \$3,990. This is the lowest cost among the other options that can meet the customer's requirements. Option A is incorrect because the FortiSwitch 248EFPOE is a non-PoE switch that has no PoE capability or power budget. It cannot provide power to the FortiAP devices over Ethernet cables. Option B is incorrect because the FortiSwitch 224E-POE is a PoE switch that has only 24 GE ports with PoE+ capability and a total PoE power budget of 185W. It cannot provide enough ports or power to run 12 FortiAP devices at full power. Option D is incorrect because the FortiSwitch 124E-FPOE is a PoE switch that has only 24 GE ports with PoE+ capability and a total PoE power budget of 185W. It cannot provide enough ports or power to run 12 FortiAP devices at full power. NEW QUESTION # 35

Review the Application Control log.

```
1: date=2021-09-08 time=16:34:49 eventid=1613344968811546102 tz="-0800" logid="1069028704" type="utm" subtype="app-ctrl" eventtype="signature" level="information" vd="vdi" appid="9899" srcip="10.1.100.191" dstip="172.16.200.189" srcport="43946" dstport="771" srcintf="port10" srcintfrole="undefined" dstintf="port9" dstintfrole="undefined" proto=6 service="ALDNF3" direction="outgoing" policyid=1 sessionid=1204 applist="test" action="pass" appcat="Industrial" app="RealPort.DNF3_Confirm" incidentserialno=88063404 msg="Industrial: RealPort.DNF3_Confirm," clouduser="34 -> 34" filename="Null" apprisk="elevated" cloudaction="others"
```

Which configuration caused the IPS engine to generate this log?

- A.

```
config ips global
    set anomaly-mode continuous
end
```
- B.

```
config ips global
    set inspect-mode full
end
```
- C.

```
config ips global
    set database extended
end
```
- D.

```
config ips global
    set exclude-signatures none
end
```

Answer: B

NEW QUESTION # 36

A customer with a FortiDDoS 200F protecting their fibre optic internet connection from incoming traffic sees that all the traffic was dropped by the device even though they were not under a DoS attack. The traffic flow was restored after it was rebooted using the GUI. Which two options will prevent this situation in the future? (Choose two)

- A. Replace with a FortiDDoS 1500F
- B. Change the Adaptive Mode.

- C. Move the internet connection from the SFP interfaces to the LC interfaces
- D. Create an HA setup with a second FortiDDoS 200F

Answer: A,D

Explanation:

B is correct because creating an HA setup with a second FortiDDoS 200F will provide redundancy in case one of the devices fails. This will prevent all traffic from being dropped in the event of a failure.

D is correct because the FortiDDoS 1500F has a larger throughput capacity than the FortiDDoS 200F. This means that it will be less likely to drop traffic even under heavy load.

The other options are incorrect. Option A is incorrect because changing the Adaptive Mode will not prevent the device from dropping traffic. Option C is incorrect because moving the internet connection from the SFP interfaces to the LC interfaces will not change the throughput capacity of the device.

NEW QUESTION # 37

Refer to the exhibit.

An HTTPS access proxy is configured to demonstrate its function as a reverse proxy on behalf of the web server it is protecting. It verifies user identity, device identity, and trust context, before granting access to the protected source. It is assumed that the FortiGate EMS fabric connector has already been successfully connected.

You need to ensure that ZTNA access through the FortiGate will redirect users to the FortiAuthenticator to perform username/password and multifactor authentication to validate access prior to accessing resources behind the FortiGate.

In this scenario, which two further steps need to be taken on the FortiGate? (Choose two.)

- A. Create an authentication scheme with the "method" as SAML.
- B. Create an authentication rule that sets the sso-auth-method to the FortiAuthenticator.
- C. Create a firewall rule that allows access from the remote endpoint to the resources behind the FortiGate.
- D. Create a SAML user/server object referring to the FortiAuthenticator.

Answer: A,D

NEW QUESTION # 38

.....

Our NSE8_812 qualification test guide boosts the self-learning and self-evaluation functions so as to let the clients understand their learning results and learning process of NSE8_812 exam questions, then find the weak links to improve them. Through the self-learning function the learners can choose the learning methods by themselves and choose the contents which they think are important.
