Which are located at several data centers in different physical locations. The engineer configured PIM-SSM within a single domain from a single source. However, during the testing phase, the video conference failed to work for any of the users. The IPs are reachable and firewalls in the network are configured correctly to allow the traffic.

Which action resolves the issue?

- A. Configure PIM dense mode with multidomain multicast
- B. Configure the devices to send join messages toward a multicast SPT
- C. Configure PIM dense mode to replace PIM-SSM.
- D. Configure PIM sparse mode to replace PIM-SSM.
