PMI CAPM Exam is designed to assess an individual's knowledge and understanding of the five process groups and ten knowledge areas that are outlined in the PMBOK (Project Management Body of Knowledge) Guide. The five process groups include initiating, planning, executing, monitoring and controlling, and closing. The ten knowledge areas include integration, scope, time, cost, quality, resource, communication, risk, procurement, and stakeholder management. CAPM exam consists of 150 multiple-choice questions and must be completed within three hours.

PMI CAPM Exam is designed to test the fundamental knowledge and skills required for effective project management. It covers the basic principles of project management, including project scope, cost, quality, time, risk, and procurement management. CAPM exam also tests the candidate's understanding of project management processes and methodologies, such as Agile and Waterfall.

- D. Products, services, and improvements.

Answer: D

NEW QUESTION # 1022

Which input provides suppliers with a clear set of goals, requirements, and outcomes?

- A. Procurement statement of work
- B. Purchase order
- C. Bidder conference
- D. Source selection criteria

Answer: A

Explanation:

Explanation/Reference:

Explanation:

12.1.3.2 Procurement Statement of Work

The statement of work (SOW) for each procurement is developed from the project scope baseline and defines only that portion of the project scope that is to be included within the related contract. The procurement SOW describes the procurement item in sufficient detail to allow prospective sellers to determine if they are capable of providing the products, services, or results. Sufficient detail can vary based on the nature of the item, the needs of the buyer, or the expected contract form. Information included in a SOW can include specifications, quantity desired, quality levels, performance data, period of performance, work location, and other requirements.

The procurement SOW is written to be clear, complete, and concise. It includes a description of any collateral services required, such as performance reporting or post-project operational support for the procured item. In some application areas, there are specific content and format requirements for a procurement SOW. Each individual procurement item requires a SOW; however, multiple products or services can be grouped as one procurement item within a single SOW.

The procurement SOW can be revised and refined as required as it moves through the procurement process until incorporated into a signed agreement.

NEW QUESTION # 1023

The process of defining how the project scope will be validated and controlled is known as:

- **A. Plan Scope Management.**
- B. Plan Quality Management.
- C. Define Scope.
- D. Develop Project Management Plan.

Answer: A

Explanation:

Explanation/Reference:

Explanation:

Process: 5.1 Plan Scope Management

Definition: The process of creating a scope management plan that documents how the project scope will be defined, validated, and controlled.

Key Benefit: The key benefit of this process is that it provides guidance and direction on how scope will be managed throughout the project.

Inputs

1. Project management plan
2. Project charter
3. Enterprise environmental factors
4. Organizational process assets

Tools & Techniques

1. Expert judgment
2. Meetings

Outputs

1. Scope management plan
2. Requirements management plan

NEW QUESTION # 1024

.....
