## 2026 Valid Mule-101 Test Voucher 100% Pass | The Best Salesforce Salesforce Certified MuleSoft Integration Foundations Test Pattern Pass for sure

The Salesforce Certified MuleSoft Integration Foundations (Mule-101) exam questions are the real, valid, and updated Mule-101 Exam Questions that are specifically designed for quick and complete Mule-101 exam preparation. With ITPassLeader Salesforce Certified MuleSoft Integration Foundations (Mule-101) practice test questions you can start Salesforce Mule-101 exam preparation immediately.

### Salesforce Certified MuleSoft Integration Foundations Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

What is an example of data confidentiality?

- A. Providing a server's private key to a client for secure decryption of data during a two-way SSL handshake
- B. Signing a file digitally and sending it using a file transfer mechanism
- C. Encrypting a file containing personally identifiable information (PII)

- D. De-masking a person's Social Security number while inserting it into a database

**Answer: C**

Explanation:

Confidentiality: This security concept ensures that information is not made available or disclosed to unauthorized individuals, entities, or processes.

Encryption (Option A): Transforming readable data (plaintext) into unreadable data (ciphertext) is the primary technical control for confidentiality. 7If a file with PII is stolen but encrypted, the confidentiality is maintained89.10 Why others are incorrect:

Signing (C): Ensures Integrity (proving the data hasn't changed), not confidentiality (the data is still readable).

De-masking (B): Removes protection.

Providing Private Key (D): This is a severe security breach, not a protection mechanism.

#### NEW QUESTION # 45

According to MuleSoft, what action should an IT organization take regarding its technology assets in order to close the IT delivery gap?

- A. Focus project delivery efforts on custom assets that meet the specific requirements of each individual line of business
- **B. Make assets easily discoverable via a central repository**
- C. Create weekly meetings that all members of IT attend to present justification and request approval to use existing assets
- D. Hire additional staff to meet the demand for asset creation required for approved projects and timelines

**Answer: B**

Explanation:

The Key to Speed: You cannot close the delivery gap by working harder (hiring more staff) or by creating custom code for every project (custom assets). You must leverage Reuse.

Discoverability is Critical: Reuse is impossible if developers don't know that an asset exists.

Anypoint Exchange: By publishing assets (APIs, connectors, fragments) to a central repository (Exchange) and making them searchable and documented, organizations enable "Self-Service." Developers can find what they need instantly, drastically reducing the time to deliver new projects.

#### NEW QUESTION # 46

Which role is primarily responsible for building API implementations as part of a typical MuleSoft integration project?

- A. Integration Architect
- B. Operations
- C. API Designer
- **D. API Developer**

**Answer: D**

Explanation:

API Developer: This role is responsible for the actual coding and implementation of the API. They use Anypoint Studio to build the Mule flows, configure connectors, write DataWeave transformations, and ensure the API functions according to the design specification1.

Why others are incorrect:

API Designer: Responsible for writing the RAML/OAS contract (specification) in Design Center, usually before implementation begins2.

Integration Architect: Responsible for high-level design, pattern selection, and governance, not the day-to-day coding of flows3.

Operations: Responsible for deployment, monitoring, and maintenance after the application is built4.

#### NEW QUESTION # 47

In preparation for a digital transformation initiative, an organization is reviewing related IT integration projects that failed for various reasons.

- A. Reliance on an Integration-Platform-as-a-Service (iPaaS)
- B. Spending too much time on enablement

- C. Following an Agile delivery methodology
- **D. Lack of alignment around business outcomes**

**Answer: D**

Explanation:

MuleSoft Catalyst: This is MuleSoft's delivery methodology. It identifies that integration projects often fail not due to technology, but due to a lack of clear strategy and alignment.

Business Outcomes: A primary cause of failure is when IT builds projects in isolation without understanding the business value or specific outcomes (KPIs) required by the organization<sup>5</sup>.

Why others are incorrect:

Agile (C): Is generally recommended/beneficial.

Enablement (B): Is a core pillar of success (C4E), not a cause of failure.

#### NEW QUESTION # 48

According to the National Institute of Standards and Technology (NIST), which cloud computing deployment model describes a composition of two or more distinct clouds that support data and application portability?

- A. Community cloud
- B. Private cloud
- C. Public cloud
- **D. Hybrid cloud**

**Answer: D**

Explanation:

NIST Definition: The NIST definition of Hybrid Cloud is explicitly "a composition of two or more distinct cloud infrastructures (private, community, or public) that remain unique entities, but are bound together by standardized or proprietary technology that enables data and application portability." <sup>1</sup> MuleSoft Context: This is highly relevant to MuleSoft's Runtime Plane options. A customer might run some apps in CloudHub (Public Cloud) and others on Runtime Fabric (Private Data Center), creating a Hybrid deployment to ensure data portability and local processing where needed.

Why others are incorrect:

Public Cloud: Open for open use by the general public (e.g., AWS, Azure).

Private Cloud: Exclusive use by a single organization.

Community Cloud: Exclusive use by a specific community of consumers from organizations that have shared concerns.

#### NEW QUESTION # 49

.....

After decades of hard work, our products are currently in a leading position in the same kind of education market, our Mule-101 learning materials, with their excellent quality and constantly improved operating system, In many areas won the unanimous endorsement of many international customers. Advanced operating systems enable users to quickly log in and use, in constant practice and theoretical research, our Mule-101 learning materials have come up with more efficient operating system to meet user needs, so we can assure users here , after user payment , users can perform a review of the Mule-101 Exam in real time , because our advanced operating system will immediately send users Mule-101 learning material to the email address where they are paying , this greatly facilitates the user, lets the user be able to save more study time.
