

FSCP Prüfungsmaterialien & FSCP Fragen Beantworten

Updated Forescout Certified Professional FSCP Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=forescout-certified-professional-fscp-certification-exam-educationry>

We provide you the dumps in the format for your exam. This questions dumps format is fairly easy and it is suitable for smart devices. These actual questions and answers can easily be downloaded on the computers, laptop or mobile and you can prepare Exam at your own convenience. When you have the exam dumps on your preferred device, then you are at ease of preparing for the exam at your own will.

You can use the latest and up-to-date real questions and answers for the Exam. If you want to have the understanding of different topics, then you need to use the best available practice dumps and this can help you in getting the Exam cleared with ease. These dumps always keep the exam syllabus up to date and that is the reason all the actual questions and answers are up to date to give worry-free exam preparation to the candidates.

Exam dumps professionals are fully aware of the fact that the syllabus for Exam need to be up to date. Updates for 90 days are provided to the candidate to allow the candidate to prepare exam from the up-to-date dumps. Up-to-dumps let the candidates have the best preparation and get successfully through the Exam. You can download these dumps from our website at any time you want. If you are satisfied with our service, then don't hesitate to make a purchase by clicking on the link given above this paragraph. You can download this dump directly from our site and start practicing for your exam. You will get a dump file that contains questions with answers along with explanations for those questions. Do not waste your time looking for other websites where they charge money for their downloads or even worse sell their study material online! It is the best choice for you if you are looking for preparation material to pass the exam. All you need is an internet connection and an efficient digital device.

100% Garantie Forescout Certified Professional Exam Prüfungserfolg, Wenn Sie ExamFragen FSCP Prüfung wählen Forescout ExamFragen Test Engine ist das perfekte Werkzeug, um auf die Zertifizierungsprüfung vorbereiten. Erfolg kommt einfach, wenn Sie bereiten mit Hilfe von Original bis zu Forescout Certified Professional Exam Produkte mit ExamFragen Datum. Wie ein seltener Fall, wenn Sie es versäumen, diese Prüfung geben wir Ihnen eine volle Rückerstattung Ihres Einkaufs passieren.

Die Forescout FSCP Zertifizierungsprüfungen werden normalerweise von den IT-Spezialisten gemäß ihren Berufserfahrungen bearbeitet. So ist es auch bei ExamFragen. Die IT-Experten bieten Ihnen Forescout FSCP Prüfungsfragen und Antworten (Forescout Certified Professional Exam), mit deren Hilfe Sie die Prüfung erfolgreich bestehen können. Die Genauigkeit von unseren Prüfungsfragen und Antworten beträgt 100%. Mit ExamFragen Produkten können Sie ganz leicht die Forescout FSCP Zertifikate bekommen, was Ihnen eine große Beförderung in der IT-Branche ist.

FSCP Prüfungsressourcen: Forescout Certified Professional Exam & FSCP Reale Fragen

Leute aus verschiedenen Bereichen bemühen sich um ihre Zukunft. Bemühen Sie sich auch um Erhöhung Ihrer Fähigkeit? Haben Sie das Forescout FSCP Zertifikat? Wie viel wissen Sie über Forescout FSCP Zertifizierungsprüfung? Was sollen Sie machen, wenn Sie nicht genug Kenntnisse zur FSCP Prüfung beherrschen? Machen Sie sich keine Sorge. ExamFragen kann Ihnen Hilfe bieten.

Forescout Certified Professional Exam FSCP Prüfungsfragen mit Lösungen (Q11-Q16):

11. Frage

What should be done after the Managed Windows devices are sent to a policy to determine the Windows 10 patch delivery optimization setting?

- A. Non Windows 10 devices must be called out in sub-rules since they will not have the relevant DWORD
- B. Push out the proper DWORD setting via GPO
- **C. Write sub-rules to check for each of the DWORD values used in patch delivery optimization**
- D. Non Windows 10 devices must be called out in sub-rules so that the relevant DWORD value may be changed
- E. Manageable Windows devices are not required by this policy

Antwort: C

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

After managed Windows devices are sent to a policy to determine the Windows 10 patch delivery optimization setting, the best practice is to write sub-rules to check for each of the DWORD values used in patch delivery optimization.

Windows 10 Patch Delivery Optimization DWORD Values:

Windows 10 patch delivery optimization is configured through DWORD registry settings in the following registry path:

* Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\DeliveryOptimization The primary DWORD value is DODownloadMode, which supports the following values:

- * 0 = HTTP only, no peering
- * 1 = HTTP blended with peering behind the same NAT (default)
- * 2 = HTTP blended with peering across a private group
- * 3 = HTTP blended with Internet peering
- * 63 = HTTP only, no peering, no use of DO cloud service
- * 64 = Bypass mode (deprecated in Windows 11)

Why Sub-Rules Are Required:

When implementing a policy to manage Windows 10 patch delivery optimization settings, administrators must create sub-rules for each possible DWORD configuration value because:

- * Different Organizational Requirements - Different departments or network segments may require different delivery optimization modes (e.g., value 1 for some devices, value 0 for others)
- * Compliance Checking - Each sub-rule verifies whether a device has the correct DWORD value configured according to organizational policy
- * Enforcement Actions - Once each sub-rule identifies a specific DWORD value, appropriate remediation actions can be applied (e.g., GPO deployment, messaging, notifications)
- * Granular Control - Sub-rules allow for precise identification of devices with non-compliant delivery optimization settings

Implementation Workflow:

- * Device is scanned and identified as Windows 10 managed device
- * Policy queries the DODownloadMode DWORD registry value
- * Multiple sub-rules evaluate the current DWORD value:
 - * Sub-rule for value "0" (HTTP only)
 - * Sub-rule for value "1" (Peering behind NAT)
 - * Sub-rule for value "2" (Peering across private group)
 - * Sub-rule for value "3" (Internet peering)
 - * Sub-rule for value "63" (No peering, no cloud)
- * Matching sub-rule triggers appropriate policy actions

Why Other Options Are Incorrect:

- * A. Push out the proper DWORD setting via GPO - This is what you do AFTER checking via sub-rules, not what you do after sending devices to the policy
- * B. Non Windows 10 devices must be called out in sub-rules since they will not have the relevant DWORD - While non-Windows 10 devices should be excluded, the answer doesn't address the core requirement of checking each DWORD value
- * C. Manageable Windows devices are not required by this policy - This is incorrect; managed Windows devices are the focus of this policy
- * D. Non Windows 10 devices must be called out in sub-rules so that the relevant DWORD value may be changed - This misses the point; you check the DWORD values first, not change them in sub-rules Referenced Documentation:
 - * Microsoft Delivery Optimization Reference - Windows 10 Deployment
 - * Forescout Administration Guide - Defining Policy Sub-Rules
 - * How to use Group Policy to configure Windows Update Delivery Optimization

12. Frage

Which of the following does NOT need to be checked when you are verifying correct switch plugin configuration?

- A. Each switch passes the plugin test
- B. IP address ranges are assigned to the correct appliance
- C. Correct switch management credentials are configured for each switch
- D. Each switch is assigned to the correct appliance
- E. The Switch plugin is running

Antwort: B

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin Configuration Guide, when verifying correct switch plugin configuration, you do NOT need to check: "IP address ranges are assigned to the correct appliance". This setting is network/appliance configuration, not switch plugin-specific configuration.

Switch Plugin Configuration Verification Checklist:

According to the Switch Plugin documentation:

When verifying switch plugin configuration, you MUST check:

- * A. The Switch plugin is running #
- * Plugin status must be active
- * Verify in plugin management interface
- * B. Correct switch management credentials #
- * SSH/CLI credentials configured
- * SNMP credentials (v1/v2/v3) configured
- * Must have appropriate permissions
- * D. Each switch passes the plugin test #
- * Use plugin test function to verify connectivity
- * Confirms credentials and permissions work
- * Validates communication protocols
- * E. Each switch is assigned to the correct appliance #
- * Switch must be assigned to managing appliance
- * Critical for multi-appliance deployments
- * Ensures proper VLAN management traffic routing

Why C is NOT Required:

According to the documentation:

IP address range assignment (segment assignment) is:

- * Part of appliance channel/segment configuration
- * NOT part of switch plugin-specific configuration
- * Handled at appliance level, not plugin level
- * Related to appliance management, not switch management

Switch Plugin vs. Appliance Configuration:

According to the configuration guide:

Item

Switch Plugin Config

Appliance Config

Plugin Running

#Yes

N/A

Switch Credentials

#Yes

N/A

Plugin Test

#Yes

N/A

Switch Assignment

#Yes

N/A

IP Address Ranges

#No

#Yes

- * Configuring Switches in the Switch Plugin

13. Frage

Which of the following is true regarding how CounterACT restores a quarantined endpoint to its original production VLAN after the "Assign to VLAN Action" is removed?

- A. This happens automatically as long as no configuration changes to the switch are made to the running config
- B. This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not changed in the switch running config
- C. This happens automatically because CounterACT compares the running and startup configs
- D. A policy is required to ensure this happens correctly.
- E. This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config

Antwort: E

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Switch Plugin Configuration Guide Version 8.12 and 8.14.2, CounterACT restores a quarantined endpoint to its original production VLAN automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config.

VLAN Restoration Mechanism:

According to the Switch Plugin documentation:

When the "Assign to VLAN" action is removed or expires, CounterACT can restore the original VLAN configuration by comparing the running configuration with the startup configuration on the switch.

The Key Requirement:

According to the documentation:

The restoration process works as follows:

- * Assign to VLAN Action Applied - Endpoint is moved to quarantine VLAN (switch running config is updated)
- * Assign to VLAN Action Removed - CounterACT wants to restore the original VLAN
- * Running vs. Startup Config Comparison - CounterACT compares running config to startup config
- * Restoration - The port is returned to its original VLAN as defined in the startup configuration Critical Condition:

According to the documentation:

"This happens automatically as long as configuration changes to the switchport access VLAN of affected ports are not saved in the startup config" This is critical because:

- * If manual changes are saved to the startup config, CounterACT cannot determine what the "original" VLAN should be
- * The startup config must remain unchanged for CounterACT to restore the correct VLAN
- * The running config changes are temporary and revert to startup config values Why Other Options Are Incorrect:
- * A. CounterACT compares the running and startup configs - While true that comparison occurs, the condition is about whether changes are saved to startup, not just comparing
- * B. Configuration changes...are not changed in the switch running config - Too broad; there can be other running config changes; the specific requirement is about VLAN configuration being saved to startup
- * C. No configuration changes to the switch are made to the running config - Too strict; other changes can be made; only VLAN switchport access configuration matters
- * E. A policy is required - Incorrect; this is automatic behavior, not policy-dependent Default VLAN Feature:

According to the Switch Plugin Configuration Guide:

The Default VLAN feature ensures that ports are automatically assigned to a default VLAN unless specifically configured otherwise.

When the "Assign to VLAN" action is removed, the port returns to the default VLAN (as defined in the startup configuration).

14. Frage

Which of the following is an advantage of FLEXX licensing?

- A. With FLEXX license, you can add See + Control + Resiliency as a base License
- B. FLEXX licensing works in V7 or on CTxx appliances
- C. License is centralized by an appliance by combining hardware and software
- D. FLEXX licensing is offered with V7 and V8 Resiliency and Advanced Compliance licenses
- **E. Licensing is centralized and managed by an Enterprise Manager**

Antwort: E

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

According to the Forescout Licensing and Sizing Guide and official licensing documentation, the key advantage of FLEXX licensing is that licensing is centralized and managed by an Enterprise Manager, providing centralized license administration across the entire Forescout platform deployment.

FLEXX Licensing Key Advantages:

FLEXX licensing represents a significant departure from the legacy per-appliance licensing model. The primary advantages of FLEXX licensing include:

- * Centralized License Pool - Licenses are independent of hardware appliances and form a centralized, shared pool that can be deployed across multiple appliances and network segments
- * Enterprise Manager Management - License entitlements and allocations are centrally administered and managed by the Enterprise Manager
- * Portable Licenses - Licenses can be ubiquitously deployed and shared across different device types, appliance locations, and deployment scenarios (campus, data center, cloud, OT)
- * Flexible Capacity Sharing - Licensed capacity can be shared across campus, data center, cloud, and OT environments without appliance-specific restrictions
- * Scalability - Unlimited virtual appliance instances can be spun up as needed without purchasing additional appliance hardware licenses
- * Unified Customer Portal - Centralized access to license management, software downloads, documentation, and support FLEXX Licensing Deployment Model:

With FLEXX licensing, organizations can:

- * Order software licenses separately and independent from appliances
- * Centrally manage and allocate licenses from a unified portal
- * Redistribute license capacity across appliances without manual reallocation
- * Support virtual and physical appliances equally

Why Other Options Are Incorrect:

- * A - Incorrect; FLEXX licenses are NOT controlled by individual appliances but are managed centrally at the Enterprise Manager level
- * C - Base licenses cannot simply be added together; FLEXX licensing is purchased as a unified license pool
- * D - FLEXX is offered with V8 appliances (5100 and 4100 series), not V7; CT series appliances support per-appliance licensing
- * E - FLEXX is available for 5100/4100 series and CT series (with Flexx upgrade option) in V8.0 or higher, not in V7 Referenced Documentation:

- * Forescout Licensing and Sizing Guide
- * Forescout Flexx Licensing - What it Offers
- * Forescout Platform License Management documentation

15. Frage

Which of the following best describes why PXE boot endpoints should be exempt from Assessment policies?

- A. They have already been deployed and should immediately be subject to Assessment policies
- B. Because they are special endpoints playing a specific role in the network
- **C. Because they are not yet manageable and may not have all the required software and services installed**
- D. Because they will never be manageable or have the required software and services
- E. Because they will not be subject to the Acceptable Use Policy

Antwort: C

Begründung:

Comprehensive and Detailed Explanation From Exact Extract of Forescout Platform Administration and Deployment:

PXE (Preboot Execution Environment) boot endpoints should be exempt from Assessment policies because they are not yet manageable and may not have all the required software and services installed. According to the Forescout Administration Guide, endpoints in the early stages of deployment, such as those booting via PXE, are temporary in nature and lack the necessary management capabilities and required software components.

PXE Boot Endpoints Characteristics:

PXE boot endpoints represent machines in a temporary state during the deployment process:

- * Not Yet Fully Deployed - PXE boot is used during initial OS installation and deployment

- * Lack Required Services - The endpoint does not yet have installed:

- * SecureConnector (if required for management)

- * Endpoint agents

- * Required security software

- * Management services

- * Limited Configuration - The endpoint may not have completed network configuration

- * Temporary State - PXE boot endpoints are in a transient state, not their final operational state

Policy Endpoint Exceptions:
According to the documentation, administrators can "select endpoints in the Detections pane and exempt them from further inspection for the policy that detected them". This is particularly important for PXE boot endpoints because:

- * False Positives - Assessment policies might flag PXE boot endpoints as non-compliant due to missing software that hasn't been installed yet

- * Blocked Deployment - If blocking actions are applied, they could interfere with the deployment process

- * Temporary Assessment - Once the endpoint is fully deployed and manageable, it can be added back to Assessment policies

- * Operational Efficiency - Exempting PXE boot endpoints prevents unnecessary policy violations during the deployment window

Manageable vs. Unmanageable Endpoints:

According to the documentation:

"Endpoints are generally unmanageable if their remote registry and file system cannot be accessed by Forescout. Unmanageable hosts can be included in your policy." PXE boot endpoints specifically fall into this category because:

- * Remote management is not yet available

- * Required agents are not installed

- * File system access is not established

Why Other Options Are Incorrect:

- * A. Because they will not be subject to the Acceptable Use Policy - Not the primary reason; Assessment policies differ from Acceptable Use policies

- * B. They have already been deployed and should immediately be subject to Assessment policies - Contradicts the purpose; PXE boot endpoints are NOT yet deployed

- * D. Because they will never be manageable or have the required software and services - Incorrect; once deployed, they WILL become manageable

- * E. Because they are special endpoints playing a specific role in the network - While true in context, this doesn't explain why they need exemption

Referenced Documentation:

- * Forescout Administration Guide - Create Policy Endpoint Exceptions

- * Restricting Endpoint Inspection documentation

- * Manage Actions - Unmanageable hosts section

16. Frage

.....

Haben Sie ExamFragen, haben Sie den Schlüssel zum Erfolg, denn Sie können damit die Forescout FSCP Zertifizierungsprüfung zügig bestehen. Unsere Berufsgruppe aus gut ausgebildeten und erfahrenen IT-Eliten haben die Entwicklungen der ständig veränderten IT-Branche untersucht und erforscht, dann erstellen Sie die Schulungsunterlagen zur Forescout FSCP Zertifizierungsprüfung für ExamFragen. Ihre Autorität ist zweifellos. Bevor Sie unsere Prüfungsmaterialien kaufen, können Sie die Demo durch unsere Webseite ExamFragen herunterladen.

FSCP Fragen Beantworten: <https://www.examfragen.de/FSCP-pruefung-fragen.html>

Wir alle wissen, dass die Forescout FSCP-Zertifizierungsprüfung im IT-Bereich eine zentrale Position darstellt, Was unsere ExamFragen für Sie erfüllen ist, dass alle Ihrer Bemühungen für die Vorbereitung der Forescout FSCP von Erfolg krönen, Forescout FSCP Prüfungsmaterialien Unser Eliteteam von IT-Fachleuten wird die neuesten und richtigen Examenübungen nach ihren fachlichen Erfahrungen bearbeiten, um Ihnen bei der Prüfung zu helfen, Die echten und originalen Prüfungsfragen und Antworten zu(Forescout Certified Professional Exam) bei IT-Pruefung.com wurden verfasst von unseren IT-Experten, alle ihren Informationen über FSCP kommen aus dem Prüfungszentrum wie PROMETRIC oder VUE.

Sie verrichten auch die Geschäfte der Notare, Du wirst dich selbst für alle Zeiten entehren, wenn du das tust, Wir alle wissen, dass

die Fore Scout FSCP-Zertifizierungsprüfung im IT-Bereich eine zentrale Position darstellt.

Forescout FSCP Prüfung Übungen und Antworten

Was unsere ExamFragen für Sie erfüllen ist, dass alle Ihrer Bemühungen für die Vorbereitung der Fore Scout FSCP von Erfolg krönen, Unser Eliteteam von IT-Fachleuten wird die neuesten und richtigen FSCP Examenübungen nach ihren fachlichen Erfahrungen bearbeiten, um Ihnen bei der Prüfung zu helfen.

Die echten und originalen Prüfungsfragen und Antworten zu(Forescout Certified Professional Exam) bei IT-Pruefung.com wurden verfasst von unseren IT-Experten, alle ihren Informationen über FSCP kommen aus dem Prüfungszentrum wie PROMETRIC oder VUE.

Nachdem Sie die Fore Scout FSCP Prüfungsunterlagen gekauft haben, geben wir Ihnen die neueste Informationen über die Aktualisierung per E-Mail.
