The high anxiety and demanding workload the candidate must face being qualified for the Salesforce Advanced-Administrator Certification are more difficult than only passing the Salesforce Advanced-Administrator exam.

Salesforce Certified Advanced Administrator Sample Questions (Q77-Q82):

NEW QUESTION # 77

Sales managers at Ursula Major Solar have asked for some additional automation around opportunity reminders. If the opportunity is in the Proposal stage a week before the close date, they want an email sent to the opportunity owner and manager. If the Budget Approved custom field is checked, the managers want to be notified immediately.

How should these requirements be met without using code?

- A. Create a schedule-triggered flow. Configure the trigger to flow weekly.

- B. Create a record-triggered flow with scheduled paths. Configure the trigger to flow after the record is saved.
- C. Create a record-triggered flow with scheduled paths. Configure the trigger to flow before the record is saved.
- D. Create a schedule-triggered flow for the Opportunity object. Configure the trigger to flow daily.

Answer: B

Explanation:

A record-triggered flow lets you automate actions when a record is created or updated. You can use scheduled paths to schedule actions relative to a date field on the record, such as close date. You should configure the trigger to flow after the record is saved so that you can access the updated field values. References:

NEW QUESTION # 78

AW Computing has a private sharing model for Its accounts, but a sales rep occasionally needs assistance from an engineer. What feature should be used to grant the engineer access to the necessary account, while maintaining the company's data security?

- A. Custom Profile
- B. Account Teams
- C. Permission Set
- D. Permission Set Group

Answer: B

NEW QUESTION # 79

Ursa Major Solar's administrator has configured multiple record-triggered flows to run before or after the record is saved on the Account object.

What should the administrator consider when a record-triggered flow executes first?

- A. The flow with the longest execution time will execute first.
- B. The flow with the shortest execution time will execute first.
- C. The order in which those flows are executed is not guaranteed.
- D. Assign the highest priority to the record-triggered flow which should execute first.

Answer: C

Explanation:

The order in which record-triggered flows are executed is not guaranteed. If there are multiple record-triggered flows on the same object and trigger type, Salesforce does not guarantee which one runs first. Therefore, the administrator should consider this when designing record-triggered flows that depend on each other's outcomes. References:
