## Sample Questions (Q101-Q106):

### NEW QUESTION # 101

A phlebotomist needs to draw SST, red top, gray top, and sterile blood specimens. Which of the following correctly describes the recommended order of draw when using a syringe?

- A. Sterile specimens are last
- B. Gray top is first
- C. Redtop is last
- D. SST follows red top

**Answer: D**

Explanation:

In the recommended order of draw for venipuncture, including when using a syringe, sterile specimens are first followed by light-blue tops. Next are the tubes with no additives, which are red tops, followed by SSTs, green tops, purple/lavender tops, and finally gray tops.

### NEW QUESTION # 102

For blood cultures, if using iodophors for the main disinfectant, how long does it take for the iodophors to adequately disinfect the skin?

- A. 60-90 seconds
- B. 15-30 seconds
- C. 30-60 seconds
- D. 90-120 seconds

**Answer: D**

Explanation:

Iodophors take 90-120 seconds to adequately disinfect the skin for blood cultures. The usual procedure is to cleanse the skin with a 30-second friction rub with 70% isopropyl alcohol, allow the alcohol to dry completely, then apply the main disinfectant and let it dry for the time recommended by the manufacturer. If the phlebotomist needs to palpate the vein after applying the disinfectant, sterile gloves must be worn.

### NEW QUESTION # 103

Which stopper color indicates the correct tube for a CBC?

- A. Pink
- B. Green
- C. Light blue
- D. Lavender/purple

**Answer: D**

Explanation:

The stopper color that indicates the correct tube for a complete blood count (CBC) is lavender/purple (EDTA). This tube is used for CBC, differential, reticulocyte count, sedimentation (sed) rate, platelet count, Coombs test, cyclosporine test, and flow cytometry. The light-blue-top tube (3.2% sodium citrate) is used for coagulation tests such as PT, PTT, and thrombin clotting time. The pink-top tube (K2EDTA) is used for blood typing and screening, direct Coombs, and HIV viral load. The green-top tube (sodium heparin) is used for ammonia, lactate, and human leukocyte antigen typing.

### NEW QUESTION # 104

Droplet transmission may result from:

- A. Throat swab collection

- B. Contaminated food or water
- C. Mosquito bites
- D. Kissing

**Answer: A**

Explanation:

Droplet transmission may result from transfer of an infectious agent by coughing, sneezing, or talking, or through procedures such as throat swab collection. Vector transmission may result from mosquito or flea bites. Vehicle transmission is the transfer of an infectious agent through contaminated food or water. Transfer of an infectious agent through kissing or touching is known as direct contact transmission.

#### **NEW QUESTION # 105**

Which of the following is NOT a reason to avoid removing stoppers from blood specimen tubes prior in the precentrifugation period?

- **A. To prevent a decrease in pH**
- B. To prevent a loss of CO<sub>2</sub>
- C. To prevent concentration of the specimen
- D. To prevent contamination

**Answer: A**

Explanation:

Removing the stoppers from blood specimen tubes during the precentrifugation period can result in an increase-not a decrease-of pH because of a loss of carbon dioxide (CO<sub>2</sub>). Other problems that may occur if a stopper is removed are due to evaporation of the specimen, which can result in concentration and possibly alter the test results. An opened specimen container also always runs the risk of contamination. Containers should be maintained in an upright position with the stoppers in place.

#### **NEW QUESTION # 106**

.....

If you are working all the time, and you hardly find any time to prepare for the Medical Technology PTC-AMCA exam, then ExamcollectionPass present the smart way to Medical Technology PTC-AMCA exam prep for the exam. You can always prepare for the PTC-AMCA test whenever you find free time with the help of our PTC-AMCA Pdf Dumps. We have curated all the PTC-AMCA questions and answers that you can view the exam Medical Technology PTC-AMCA brain dumps and prepare for the PTC-AMCA exam. We guarantee that you will be able to pass the PTC-AMCA in the first attempt.

**PTC-AMCA Exam Forum:** <https://www.examcollectionpass.com/Medical-Technology/PTC-AMCA-practice-exam-dumps.html>

They are reliable and effective PTC-AMCA Exam Forum - AMCA Phlebotomy Technician Certification Exam practice materials which can help you gain success within limited time, Last but not the least we will say that we will be with you in every stage of your PTC-AMCA VCE file preparation to give you the most reliable help, With the help of our PTC-AMCA latest study resource, you will have clear thinking about the study knowledge, then you can make detail study plan for better preparation, ExamcollectionPass provide latest PTC-AMCA questions answers in PDF Format along with a PTC-AMCA practice exam which makes you familiar with the exam.

Like many traders, I became very interested in PTC-AMCA Exam Forum trading professionally after I read Jack D, My primary goal in developing these books has been to bring together fundamental methods from Exam PTC-AMCA Collection Pdf diverse areas, to provide access to the best methods known for solving problems by computer.
