

FCP_FSM_AN-7.2 Prepaway Dumps - Exam FCP_FSM_AN-7.2 Question

P.S. Free & New FCP_FSM_AN-7.2 dumps are available on Google Drive shared by PremiumVCEDump: https://drive.google.com/open?id=1NJc_L2pLhg-gSpVvJ-2QIBTh20AJ9nFa

The users of FCP_FSM_AN-7.2 exam reference materials cover a wide range of fields, including professionals, students, and students of less advanced culture. This is because the language format of our FCP_FSM_AN-7.2 study materials is easy to understand. No matter what information you choose to study, you don't have to worry about being a beginner and not reading data. And our FCP_FSM_AN-7.2 Test Questions are prepared by many experts. The content of our FCP_FSM_AN-7.2 study guide is very easy for you to understand for all the levels of the candidates.

The software keeps track of the previous FCP - FortiSIEM 7.2 Analyst (FCP_FSM_AN-7.2) practice exam attempts and shows the changes of each attempt. You don't need to wait days or weeks to get your performance report. The software displays the result of the Fortinet FCP_FSM_AN-7.2 Practice Test immediately, which is an excellent way to understand which area needs more attention.

FCP_FSM_AN-7.2 Prepaway Dumps - High-quality Fortinet FCP - FortiSIEM 7.2 Analyst - Exam FCP_FSM_AN-7.2 Question

Each IT person is working hard for promotion and salary increases. It is also a reflection of the pressure of modern society. We should use the strength to prove ourselves. Participate in the Fortinet FCP_FSM_AN-7.2 exam please. In fact, this examination is not so difficult as what you are thinking. You only need to select the appropriate training materials. PremiumVCEDump's Fortinet FCP_FSM_AN-7.2 Exam Training materials is the best training materials. Select the materials is to choose what you want. In order to enhance your own, do it quickly.

Fortinet FCP_FSM_AN-7.2 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Analytics: This section of the exam measures the skills of Security Analysts and covers the foundational techniques for building and refining queries. It focuses on creating searches from events, applying grouping and aggregation methods, and performing various lookup operations, including CMDB and nested queries to effectively analyze and correlate data.

Topic 2	<ul style="list-style-type: none"> • Incidents, notifications, and remediation: This section of the exam measures the skills of Incident Responders and encompasses the entire incident management lifecycle. This includes the skills required to manage and prioritize security incidents, configure policies for alert notifications, and set up automated remediation actions to contain and resolve threats.
Topic 3	<ul style="list-style-type: none"> • Machine learning, UEBA, and ZTNA: This section of the exam measures the skills of Advanced Security Architects and covers the integration of modern security technologies. It involves performing configuration tasks for machine learning models, incorporating UEBA (User and Entity Behavior Analytics) data into rules and dashboards for enhanced threat detection, and understanding how to integrate ZTNA (Zero Trust Network Access) principles into security operations.
Topic 4	<ul style="list-style-type: none"> • Rules and subpatterns: This section of the exam measures the skills of SOC Engineers and focuses on the construction and implementation of analytics rules. It involves identifying the different components that make up a rule, utilizing advanced features like subpatterns and aggregation, and practically configuring these rules within the FortiSIEM platform to detect security events.

Fortinet FCP - FortiSIEM 7.2 Analyst Sample Questions (Q62-Q67):

NEW QUESTION # 62

Refer to the exhibit.

Machine Learning - Train Configuration

▶ Run Mode: *Local*

▶ Task: *Regression*

▶ Algorithm: *DecisionTreeRegressor*

▼ Fields to use for Prediction:

AVG(CPU Util)

AVG(Memory Util)

AVG(Sent Bytes64)

AVG(Received Bytes64)

▼ Field to Predict:

AVG(CPU Util)

AVG(Memory Util)

AVG(Sent Bytes64)

AVG(Received Bytes64)

▼ Train factor

0%  100%

The configuration shown in the exhibit is incorrect.

What must you change to allow this configuration to be successfully applied to FortiSIEM?

- A. Only one AVG type field must be selected under Fields to use for Prediction.
- **B. Run Mode must be set to ML.**
- C. The Train factor must be 70% or greater.
- D. The selection in Fields to use for Prediction and Field to Predict must match.

Answer: B

Explanation:

The Run Mode is set to Local, which is not valid for training machine learning models in FortiSIEM. To apply this configuration correctly, the Run Mode must be set to ML, which enables proper model training and prediction using selected fields.

NEW QUESTION # 63

How does FortiSIEM update the incident table if a performance rule triggers repeatedly?

- A. FortiSIEM changes the incident status to Repeated, and updates the Last Seen timestamp.
- B. FortiSIEM generates a new incident based on the Rule Frequency value, and updates the First Seen and Last Seen timestamps.
- C. FortiSIEM generates a new incident each time the rule triggers, and updates the First Seen and Last Seen timestamps.
- **D. FortiSIEM updates the Incident Count value and Last Seen timestamp.**

Answer: D

Explanation:

When a performance rule triggers repeatedly, FortiSIEM updates the existing incident by incrementing the Incident Count and refreshing the Last Seen timestamp. This avoids flooding the incident table with duplicates while still tracking repeated occurrences.

NEW QUESTION # 64

Refer to the exhibit. Which value would be saved as the Event Type attribute by the default FortiSIEM parser?

- **A. PH_DEV_MON_SYS_UPTIME**
- B. diskUtil
- C. PHL_INFO
- D. sysUpTime

Answer: A

Explanation:

In FortiSIEM, the Event Type attribute is derived from the value preceding the colon in the raw message header. In this case, the raw message begins with [PH_DEV_MON_SYS_UPTIME], so the parser assigns PH_DEV_MON_SYS_UPTIME as the Event Type. This identifies the event as a system uptime monitoring message.

NEW QUESTION # 65

Refer to the exhibit.

Rule Subpattern

Edit SubPattern

Name: DomainAcctLockout

Filters:	Paren	Attribute	Operator	Value	Paren	Next	Row
	-	+ Event Type	IN	EventTypes: Domain Account Lockout	-	+ AND OR	+ -

Aggregate:	Paren	Attribute	Operator	Value	Paren	Next	Row
	-	+ COUNT(Matched Events)	>=	1	-	+ AND OR	+ -

Group By:

Attribute	Row	Move
Reporting Device	○ ○	↑ ↓
Reporting IP	○ ○	↑ ↓
User	○ ○	↑ ↓

Run as Query Save as Report Save Cancel

Which section contains the subpattern configuration that determines how many matching events are needed to trigger the rule?

- A. Aggregate
- B. Actions
- C. Group By
- D. Filters

Answer: A

Explanation:

The Aggregate section contains the condition COUNT(Matched Events) >= 1, which defines how many events must match the filter criteria for the rule to trigger. This is the subpattern configuration that determines the event threshold.

NEW QUESTION # 66

In FortiSIEM, which database stores discovery information?

- A. Profile DB
- B. Event DB
- C. CMDB
- D. SVN DB

Answer: C

Explanation:

FortiSIEM stores discovery information - such as device attributes, IPs, roles, and relationships - in the Configuration Management Database (CMDB). The CMDB maintains an up-to-date inventory of all discovered assets, serving as the central repository for device and infrastructure configuration data.

NEW QUESTION # 67

.....

Our products are global, and you can purchase FCP_FSM_AN-7.2 training guide is wherever you are. Believe us, our FCP_FSM_AN-7.2 exam questions will not disappoint you. Our global users can prove our strength in this career. Just look at the hot hit on the website and you can see how popular our FCP_FSM_AN-7.2 Study Materials are. And the numerous of the grateful feedbacks from our worthy customers as well as the high pass rate as 98% to 100%. What are you waiting for? Just rush to buy our FCP_FSM_AN-7.2 preparation quiz!
