	Mukdahan School MEP Department Final Exam Advance Science Subject Code SC21203 Mathayom One Name..... Class..... Number.....	
---	---	---

Section A: Cross X on the correct answer.

1. What is a carnivores?

A. Animal with four legs.
C. Animals that their bodies are cover with hair.

B. Animal that eat only meat.
D. Animals that eat only plants.
2. A rabbit represent which type of animal?

A. Predator
C. Herbivores

B. Carnivores
D. Producer
3. Which of this animal is an example of a carnivores?

A. Rabbits
C. Lion

B. Cow
D. Goat
4. Which of these component is consider abiotic factor?

A. Water
C. Air

B. All of them
D. Light
5. Animals that eat only plants are what king of animals?

A. Herbivores
C. Tiger

B. Carnivores
D. Producers
6. Which of these organism are consider producer in a food chain?

A. Rabbits
C. Rice

B. Lion
D. Chicken
7. Organisms that start the food chain, what are they called?

A. Consumers
C. Secondary producers

B. Producers
D. Secondary Consumers
8. Organisms that are at the bottom of the food chain that are producers, why are they called so?

A. Because all animal can easily eat them.

B. Because they are very small.

C. Because they are make food by themselves

D. Because they are not eaten by any other animals
9. An animals like a lion is in what level in the food chain?

A. Producers
C. Detrivores

B. Secondary consumers
D. Primary consumers

 LIVEWORKSHEETS

Having more competitive advantage means that you will have more opportunities and have a job that will satisfy you. This is why more and more people have long been eager for the certification of M2. Our M2 test material can help you focus and learn effectively. You don't have to worry about not having a dedicated time to learn every day. You can learn our M2 exam torrent in a piecemeal time, and you don't have to worry about the tedious and cumbersome learning content. We will simplify the complex concepts by adding diagrams and examples during your study. By choosing our M2 test material, you will be able to use time more effectively than others and have the content of important information in the shortest time.

International Code Council M2 Exam Syllabus Topics:

Section	Weight	Objectives
General Administration	18%	- Code authority and enforcement - Permits and inspections - Plan review and documentation - Manufacturer's instructions and listings
Heating, Cooling & Water Heaters	18%	- Solar thermal systems - Water heaters and storage tanks - HVAC equipment installation and clearance - Heat pumps and cooling equipment - Boilers and hydronic systems

Duct Systems	12%	- Duct construction and materials - Insulation and sealing - Duct installation and supports - Dampers and access doors
Chimneys & Vents	14%	- Vent systems and connections - Clearances and termination requirements - Factory-built chimneys and vents - Chimney construction and materials
Exhaust & Ventilation Systems	20%	- Ventilation rates and outdoor air requirements - Makeup air systems - Hazardous and special exhaust systems - Commercial kitchen exhaust systems
Combustion Air	8%	- Combustion air requirements - Air supply and venting - Confined spaces and equipment rooms
Fuel Supply Systems	10%	- Fuel gas piping materials and installation - Pressure regulation and overpressure protection - Gas appliances and connections - Piping testing and inspection

Reliable International Code Council M2 Real Test - Examinations M2 Actual Questions

PassReview proudly says that its product is accurate and trustworthy because it was formulated according to the prescribed content of the International Code Council M2 actual test. We offer International Code Council M2 Exam Questions free updates for up to 12 months after purchasing. These free updates of actual M2 questions will follow the fresh updates in the exam content.

International Code Council Commercial Mechanical Inspector Sample Questions (Q42-Q47):

NEW QUESTION # 42

Supports for hazardous exhaust duct shall be constructed of:

- A. material complying with UL 181.
- B. plastic.
- C. noncombustible material.
- D. fibrous material.

Answer: C

NEW QUESTION # 43

Unless listed for a greater or smaller dimension, mechanical draft venting systems shall terminate a minimum of _____ feet below an operable window.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:

For mechanical draft venting systems, unless the appliance is listed for a different clearance, the vent terminal must be located not less than 4 feet below, 4 feet horizontally from, or 1 foot above any door, operable window, or gravity air inlet into a building. Therefore, the required minimum distance below an operable window is 4 feet, so Option B is correct.

NEW QUESTION # 44

For the installation of listed fuel-burning appliances, the required clearances should be found:

- A. in the mechanical code.
- B. by using a calculation based on the Btu/h output rating of the appliance.
- C. on the approved plans and specifications for the building.
- D. on the nameplate of the appliance.

Answer: D

Explanation:

The IMC requires fuel-burning units to be marked with the hourly rating, approved fuel type, and required clearances. That means the appliance marking/nameplate is the direct source for the required clearance information for listed fuel-burning appliances. This is why B is the correct answer.

NEW QUESTION # 45

A cooling system with a condensate disposal system:

- A. shall have all horizontal sections of drain piping installed with a minimum of 1/4 inch per foot slope.
- B. shall not be less than 3/4-inch PVC pipe or equivalent approved material.
- C. shall be made of an approved pipe and be at least 1/2-inch in diameter.
- D. shall be made of approved corrosion-resistant material and shall not decrease in size from the drain pan connection to the place of condensate disposal.

Answer: D

Explanation:

The ICC mechanical code requires condensate disposal components to be of approved corrosion-resistant material, and the drain line shall not decrease in size from the drain pan connection to the place of disposal.

The code minimum size is 3/4 inch, so the 1/2-inch statement is incorrect, and the code is not limited to PVC only. Also, the slope requirement for horizontal drain piping is not less than 1/8 inch per foot, not 1/4 inch per foot. That makes Option A the only fully correct statement.

NEW QUESTION # 46

Termination of vents for appliances listed for and installed outdoors that incorporate integral venting shall:

- A. be installed in accordance with the design professional's plans as approved by the local building official.
- B. be installed in accordance with their listings and the manufacturer's installation instructions.
- C. terminate not less than 5 feet vertically above the lowest connected appliance draft hood outlet or flue collar.
- D. terminate not less than 5 feet vertically above the highest connected appliance draft hood outlet or flue collar.

Answer: B

Explanation:

For appliances listed for outdoor installation and incorporating integral venting, the IMC requires them to be installed in accordance with their listings and the manufacturer's installation instructions. That matches Option C exactly.

NEW QUESTION # 47

.....

Contrary to most of the M2 exam preparatory material available online, PassReview's dumps can be obtained on an affordable price yet their quality and benefits beat all similar products of our competitors. They will prove the best alternative of your time and money. What's more, our customers' care is available 24/7 for all visitors on our pages. You can put all your queries and get a quick and efficient response as well as advice of our experts on M2 Certification tests you want to take. Our professional online staff will attend you on priority.
