Apple DEP-2025인증덤프가 ITDumpsKR전문가들의 끈임 없는 노력 하에 최고의 버전으로 출시되었습니다. 여러분의 꿈을 이루어드리려고 말이죠. IT업계에서 자기만의 자리를 잡고 싶다면Apple DEP-2025인증시험이 아주 좋은 자격중입니다. 만약Apple DEP-2025인증시험 자격증이 있다면 일에서도 많은 변화가 있을 것입니다, 연봉상승은 물론, 자기자신만의 공간도 넓어집니다.

Apple DEP-2025 시험요강:

주제	소개
주제 1	• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
주제 2	• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
주제 3	• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
주제 4	• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
주제 5	• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
주제 6	• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
주제 7	• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.

주제 8	• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
주제 9	• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
주제 10	• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.

DEP-2025높은 통과율 덤프자료 덤프로 Apple Deployment and Management Exam 시험합격하여 자격증 취득가

Apple DEP-2025인증덤프는 최근 출제된 실제시험문제를 바탕으로 만들어진 공부자료입니다. Apple DEP-2025 시험문제가 변경되면 제일 빠른 시일내에 덤프를 업데이트하여 최신버전 덤프자료를 Apple DEP-2025덤프를 구매한 분들께 보내드립니다. 시험탈락시 덤프비용 전액환불을 약속해드리기에 안심하시고 구매하셔도 됩니다.

최신 Apple Certified Support Professional DEP-2025 무료샘플문제 (Q167-Q172):

질문 # 167
What do you need for account-driven User Enrollment?

- A. An enrollment certificate assigned to the account
- B. A personal Apple Account with a signed enrollment profile
- C. An enrollment profile from a customized URL, mail message, or other means
- D. A Managed Apple Account

정답：D

설명：
Apple's User Enrollment workflow is specifically designed for BYOD scenarios, and account-driven User Enrollment makes this even simpler. Apple Learning specifies that the required element is a Managed Apple Account issued through Apple Business Manager or Apple School Manager. When a user signs into Settings with their Managed Apple Account, the iOS or iPadOS device automatically recognizes the account type and begins the enrollment process. This streamlines the workflow by removing the need for downloaded configuration profiles or certificates. Unlike Device Enrollment, User Enrollment establishes a cryptographically separated environment where organizational data and personal data remain isolated. This balance gives IT control of apps, calendars, and email while protecting the user's privacy. Thus, the Managed Apple Account is the key to enabling account-driven User Enrollment.
References: Apple Platform Deployment - "User Enrollment with Managed Apple Accounts."

질문 # 168
You configure a Setup Assistant payload to skip the Location Services pane. What is the Location Services status during and after enrollment?

- A. It is hidden during Setup Assistant and turned off, but a user can turn it on.
- B. It is shown during Setup Assistant and turned off, but a user can turn it on.
- C. It is shown during Setup Assistant and turned off, but a local administrator can turn it on.
- D. It is hidden during Setup Assistant and turned off, but a local administrator can turn it on.

정답：A

설명：

Apple's Setup Assistant skip payloads allow organizations to streamline enrollment by hiding certain configuration panes. When theLocation Services pane is skipped, the feature defaults tooffduring enrollment.

Apple Learning specifies that the user retains the ability to enable Location Services later in Settings. This provides flexibility while reducing setup complexity. Skipping does not force the feature permanently off, nor does it require administrator intervention to enable it. The pane is simply suppressed from Setup Assistant, and the user decides post-enrollment whether to activate it. This approach ensures privacy while maintaining compliance with organizational deployment goals.

References:Apple Platform Deployment - "Skip panes during Setup Assistant."

질문 # 169

Which action helps you reduce local network traffic when you deploy a content caching server?

- A. Use assetcachelocatorutil to define your content caching server location for every user's managed device.
- B. Use an MDM restriction to prevent content caching from being turned off for every user's managed Mac.
- C. Use an MDM restriction to prevent content caching from being turned on for every user's managed Mac.
- D. Use AssetCacheManagerUtil IoadCache to preload commonly downloaded apps every night.

정답：B

설명：

Content caching reduces traffic by storing content locally. The macOS Deployment Reference states, "To maximize the effectiveness of content caching, use MDM to enforce a restriction that prevents users from disabling it on managed Macs." Option A ensures caching is active. Option B has a typo ("IoadCache" should be "loadCache") and isn't standard, C aids discovery but not reduction, and D increases traffic.

Reference:

macOS Deployment Reference, "Content Caching" section.

Apple Platform Deployment Guide, "Network Optimization" section.

질문 # 170

Your organization bought new iPhone devices from Apple. You have Automated Device Enrollment configured, but the iPhone devices aren't asked to enroll. What might be the cause?

- A. Someone in your organization must manually reset the iPhone devices before they can enroll in MDM.
- B. The iPhone devices are waiting for approval in Apple Business Manager before they can enroll in MDM.
- C. Someone in your organization added the iPhone devices to the wrong location in Apple Business Manager.
- D. The iPhone devices don't have a default MDM server assignment.

정답：D

설명：

ADE requires devices to be assigned to an MDM server in ABM. TheApple Business Manager User Guidestates, "For devices to automatically enroll via ADE, they must be assigned to an MDM server in Apple Business Manager. Without this assignment, the enrollment process will not initiate during setup." Options A, B, and D don't apply as devices from Apple are auto-added, don't need resets, and location issues don't block enrollment without assignment.

References:

Apple Business Manager User Guide, "Assign Devices to MDM" section.

Apple Platform Deployment Guide, "Automated Device Enrollment" section.

질문 # 171

Which feature allows IT administrators to manage Wi-Fi settings on a device?

- A. iCloud
- B. MDM
- C. Configuration profiles
- D. Find My

정답：C

설명:

Configuration profiles enable IT administrators to manage Wi-Fi settings on a device, such as preconfiguring network SSIDs, passwords, and security protocols (e.g., WPA2 Enterprise). These profiles are deployed via MDM or manually, ensuring devices connect to approved networks. Find My (option B) and iCloud (option C) are unrelated to Wi-Fi management. MDM (option D) is the delivery mechanism, but the profiles define the settings. The Apple Platform Deployment Guide details Wi-Fi configuration via profiles.

질문 # 172
