Original Data-Architect Questions, Reliable Data-Architect Study Materials

We hope that you can use your time as much as possible for learning on the Data-Architect practice questions. So we have

considered every detail of the Data-Architect study guide to remove all unnecessary programs. If you try to download our Data-Architect study materials, you will find that they are so efficient! And even you free download the demos on the website, you can feel the convenience and efficiency. It is simple and easy to study with our Data-Architect learning braindumps.

Salesforce Certified Data Architect Sample Questions (Q17-Q22):

NEW QUESTION # 17
Developers at Universal Containers need to build a report for the business which displays Accounts opened in the past year grouped by industry. This report will also include information from contacts, opportunities, and orders. There are several million Accounts in the system. Which two options should be recommended to make this report perform well and satisfy the business need?

- A. Use an indexed data field with bounded data filters.
- B. Use Formula fields to surface information I related entities on the report.
- C. Use triggers to populate denormalized related fields on the Account.
- D. Use unbounded date ranges to filter the report.

Answer: A,B

Explanation:
Using an indexed data field with bounded data filters can improve the report performance by making the query more selective and reducing the number of records to scan. Using formula fields to surface information from related entities on the report can also enhance the report performance by avoiding joins and complex calculations

NEW QUESTION # 18
Universal Containers has a large volume of Contact data going into Salesforce.com. There are 100,000 existing contact records. 200,000 new contacts will be loaded. The Contact object has an external ID field that is unique and must be populated for all existing records. What should the architect recommend to reduce data load processing time?

- A. Load Contact records together using the Streaming API via the Upsert operation.
- B. Load all records via the Upsert operation to determine new records vs. existing records.
- C. Load new records via the Insert operation and existing records via the Update operation.
- D. Delete all existing records, and then load all records together via the Insert operation.

Answer: C

NEW QUESTION # 19
Due to security requirements, Universal Containers needs to capture specific user actions, such as login, logout, file attachment download, package install, etc. What is the recommended approach for defining a solution for this requirement?

- A. Use a field audit trail to capture field changes.
- B. Use a third-party AppExchange app to capture changes.
- C. Use Event Monitoring to capture these changes.
- D. Use a custom object and trigger to capture changes.

Answer: C

NEW QUESTION # 20
A company has 12 million records, and a nightly integration queries these records.
Which two areas should a Data Architect investigate during troubleshooting if queries are timing out? (Choose two.)

- A. Create a formula field instead of having multiple filter criteria.
- B. Make sure the query doesn't contain NULL in any filter criteria.
- C. Create custom indexes on the fields used in the filter criteria.
- D. Modify the integration users' profile to have View All Data.

Answer: B,C

NEW QUESTION # 21

Universal Containers would like to remove data silos and connect their legacy CRM together with their ERP and with Salesforce. Most of their sales team has already migrated to Salesforce for daily use, although a few users are still on the old CRM until some functionality they require is completed. Which two techniques should be used for smooth interoperability now and in the future.

- A. Do not connect Salesforce and the legacy CRM to each other during this transition period, but do allow both to interact with the ERP.
- B. Work with stakeholders to establish a Master Data Management plan for the system of record for specific objects, records, and fields.
- C. Specify the legacy CRM as the system of record during transition until it is removed from operation and fully replaced by Salesforce.
- D. Replicate ongoing changes in the legacy CRM to Salesforce to facilitate a smooth transition when the legacy CRM is eventually retired.

Answer: B,C

NEW QUESTION # 22

......

Our Data-Architect guide torrent not only has the high quality and efficiency but also the perfect service system after sale.
