C-SIGDA-2403 Reliable Test Bootcamp - Free C-SIGDA-2403 Exam Dumps

Our C-SIGDA-2403 quiz torrent boost 3 versions and they include PDF version, PC version, App online version. Different version boosts different functions and using method. For example, the PDF version is convenient for the download and printing our C-SIGDA-2403 exam torrent and is easy and suitable for browsing learning. It can be printed on the papers which are convenient for you to take notes and learn at any time and place. You can practice C-SIGDA-2403 Quiz prep repeatedly and there are no limits for the amount of the persons and times. And the PC version of C-SIGDA-2403 quiz torrent can stimulate the real exam's scenarios, is stalled on the Windows operating system and runs on the Java environment. You can use it any time to test your own Exam stimulation tests scores and whether you have mastered our C-SIGDA-2403 exam torrent.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q40-Q45):

NEW QUESTION # 40

What features does the SQL Query Editor offer? Note: There are 2 correct answers to this question.

- A. Creates inner joins
- B. Queries data from multiple tables
- C. Provides custom functions
- D. Avoids manipulation of process data

Answer: C,D

Explanation:

The SQL Query Editor in SAP Signavio Process Intelligence allows users to write custom queries to analyze process data. The documentation details its capabilities:

* Exact Extract:"The SQL Query Editor in SAP Signavio Process Intelligence provides:

* Protection against data manipulation by restricting queries to read-only operations.

* Support for custom functions to perform advanced calculations or data transformations within queries." (SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor Features").

* Explanation:

* Option B (Avoids manipulation of process data):The SQL Query Editor is designed to ensure data integrity by allowing only read-only queries, preventing accidental or unauthorized changes to the underlying process data.

* Option D (Provides custom functions):Users can define custom functions within the SQL Query Editor to perform specific calculations or transformations, such as aggregating data in unique ways or applying complex logic.

* Option A (Queries data from multiple tables)is incorrect because, while the editor can query data, it typically operates on a single event log or case attributes table within an investigation, not multiple unrelated tables.

* Option C (Creates inner joins)is incorrect as inner joins are not a primary feature of the SQL Query Editor in Process Intelligence, which focuses on querying pre-structured process data.

Reference:SAP Signavio Process Intelligence User Guide, section on "SQL Query Editor Features"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Data Querying.

NEW QUESTION # 41

What is the goal of Process Mining?Note: There are 2correct answers to this question.

- A. To transform business data into actionable insights
- B. To create reports for analysis
- C. To simulate business processes
- D. To reveal the current state of processes in a system

Answer: A,D

Explanation:

The goal of Process Mining includes:

* Option C (To reveal the current state of processes in a system): One of the primary goals of Process Mining is to provide transparency into the actual execution of processes within an organization. By analyzing event logs, Process Mining uncovers the real, as-is state of business processes, revealing

* inefficiencies, deviations, and opportunities for optimization.

* Option D (To transform business data into actionable insights): Process Mining lever

NEW QUESTION # 42

What are some benefits of using metrics in SAP Signavio Process Intelligence? Note: There are 2 correct answers to this question.

- A. Visualize important KPI's in the Process Discovery Widget
- B. Define the purpose of an investigation
- C. Share metrics between workspaces
- D. Add and customize metrics from the library

Answer: C,D

NEW QUESTION # 43

What are some possible configurations for a task created in SAP Signavio Process Governance? Note: There are 3 correct answers to this question.

- A. Assign it to dictionary categories.
- B. Assign it to a specific user.
- C. Store attributes.
- D. Add subtasks.
- E. Set a due date.

Answer: B,D,E

Explanation:

In SAP Signavio Process Governance, tasks can be configured with specific settings to enhance management and tracking. Key configurations include assigning tasks to a specific user, setting a due date to ensure timely completion, and adding subtasks to break down the main task into more manageable components. These configurations help in detailed task management and accountability in process governance.

NEW QUESTION # 44

What elements are part of the official BPMN 2.0 notation? Note: There are 2 correct answers to this question.

- A. Stakeholders
- B. Pool
- C. Additional Participant
- D. Lane

Answer: B,D

Explanation:

In the official Business Process Model and Notation (BPMN) 2.0, both "Lane" and "Pool" are integral components. A "Lane" is a sub-division within a "Pool" and is used to organize and categorize activities within a business process, often by function or role. A "Pool," on the other hand, represents a participant within a process and encapsulates a set of activities performed by that participant. These elements are fundamental in BPMN for illustrating the flow of processes across various roles and organizations, thereby promoting clarity and efficiency in business process modeling. "Additional Participant" and "Stakeholders" are not standard terminology within the BPMN 2.0 specification for defining specific elements of a process diagram. References: BPMN 2.0 Specification
