### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite 認定 C-BCBAI-2509 試験問題 (Q42-Q47):

#### 質問 # 42

(What are some generative AI tools for an SAP Cloud ERP transformation? Note: There are 3 correct answers to this question.)

- A. Extension builder wizard
- B. Integration generator
- C. Process model generator
- D. ABAP Business Object generator
- E. Process automation

正解: C、D、E

#### 解説:

Comprehensive and Detailed Explanation From Exact Extract: Generative AI tools for SAP Cloud ERP transformation include process automation capabilities in SAP Build Process Automation for generating and automating business processes, the process model generator in SAP Signavio for creating process models using AI, and the ABAP Business Object generator in Joule for developing ABAP-based business objects to extend ERP functionalities. These tools facilitate efficient migration, customization, and optimization during cloud ERP transformations by leveraging generative AI to streamline code, processes, and extensions.

Exact extracts supporting this:

Process automation: "SAP Build Process Automation integrates with generative AI to generate and edit business processes, decisions, forms, and script tasks using natural language descriptions."sap.com This supports automation in ERP transformations.

Process model generator: "SAP Signavio uses generative AI to assist in process modeling, recommending performance indicators and generating models based on best practices."learning.sap.com

ABAP Business Object generator: "Joule generates ABAP business objects using the ABAP RESTful Application Programming Model (RAP) for extensions in SAP S/4HANA

Cloud."learning.sap.com "Generative AI in ABAP Cloud includes business object generation."community.sap.com Other options are incorrect because:

Option B: While extension building is simplified with wizards in SAP Build Code, it is not specifically a "generative AI tool" but rather a guided process; generative aspects come from Joule integration.

Option C: Integration generation is supported in SAP BTP, but not highlighted as a distinct generative AI tool for ERP transformation; focus is on code and process generation.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from SAP Learning Journey "Boosting Your Cloud Transformation Journey with SAP Business AI and Generative AI," units on generative AI in SAP Signavio, Build Process Automation, and ABAP Cloud. Supported by SAP Community blogs on generative AI for S/4HANA migration and SAP Help Portal, aligning with C\_BCBAI\_2502 certification for tools in cloud ERP transformations.

#### 質問 # 43

Within AI Foundation's layered architecture, which layer provides a unified entry point for development, operations, and administration?

- A. Peripheral & Data Layer
- B. OS Interfaces Layer
- C. AI Integration Layer

- D. AI Kernel Layer

正解: C

解説:

The AI Integration Layer within SAP's AI Foundation architecture serves as the unified entry point for development, operations, and administration. According to SAP Business AI documentation, this layer facilitates seamless interaction between AI components, SAP applications, and external systems, providing a centralized interface for developers, operators, and administrators. It supports tasks such as model deployment, monitoring, and governance, ensuring consistency and efficiency across AI operations. The OS Interfaces Layer handles system-level interactions, the Peripheral & Data Layer manages data access, and the AI Kernel Layer focuses on core AI processing, none of which serve as the unified entry point. This layer is critical for enabling scalable and integrated AI solutions.

質問 # 44

(What are some key differentiators of SAP Business AI? Note: There are 3 correct answers to this question.)

- A. Ecosystem of Innovation
- B. AI Foundation
- C. Large Foundation Models
- D. Embedded AI
- E. Predictive Analytics

正解: A、B、D

解説:

Comprehensive and Detailed Explanation From Exact Extract: Key differentiators of SAP Business AI include embedded AI directly integrated into business applications for seamless use, an AI Foundation providing the underlying infrastructure and tools in SAP BTP, and an Ecosystem of Innovation through partnerships and open standards for collaborative advancements. These set SAP apart by focusing on integration, foundational support, and ecosystem-driven innovation.

Exact extracts supporting this:

Embedded AI: "Embedded AI: Our relevant, reliable, and responsible SAP Business AI is ... key differentiators."learning.sap.com

AI Foundation: "For that, we established an AI foundation."learning.sap.com "SAP's main differentiators are... deep domain and industry expertise."community.sap.com (Foundation as base.) Ecosystem of Innovation: "Maximize the value of AI across your

business with a single AI interface that seamlessly integrates data and workflows across your SAP and non-SAP applications."sap.com Implies ecosystem.

Other options are incorrect because:

Option C: Predictive analytics is a capability but not a key differentiator; focus is on embedded and foundational aspects.

Option D: SAP integrates large foundation models from partners but does not claim them as differentiators; emphasis is on business grounding.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: From SAP Learning course "Discovering SAP Business AI," units on market point of view and role of Business AI, highlighting embedded AI, foundation, and ecosystem as differentiators, per C\_BCBAI\_2502 materials.
