## NCP-CI-AWS Reliable Test Syllabus - Latest NCP-CI-AWS Exam Fee

At the beginning of the launch of our NCP-CI-AWS exam torrent, they made a splash in the market. We have three versions which are the sources that bring prestige to our company. Our PDF version of Nutanix Certified Professional - Cloud Integration - AWS prepare torrent is suitable for reading and printing requests. You can review and practice with it clearly just like using a professional book. It can satisfy the fundamental demands of candidates with concise layout and illegible outline. The second one of NCP-CI-AWS Test Braindumps is software versions which are usable to windows system only with simulation test system for you to practice in daily life. The last one is app version of NCP-CI-AWS exam torrent suitable for different kinds of electronic products.

## Nutanix Certified Professional - Cloud Integration - AWS Sample Questions (Q141-Q146):

### NEW QUESTION # 141

What role is needed to create a cluster?

- A. Customer Administrator
- B. Cluster Administrator
- C. Cluster Super Admin
- D. Customer Security Administrator

**Answer: C**

Explanation:

To create a cluster in Nutanix Cloud Integration with AWS, the role needed is Cluster Super Admin.

The Cluster Super Admin role provides the highest level of privileges required to perform critical operations such as creating, managing, and deleting clusters.

This role is essential for overseeing the cluster setup and configuration processes, ensuring the user has full control over the cluster lifecycle.

Reference:

Refer to the Nutanix documentation on roles and permissions for NC2 on AWS for further details on the capabilities and required permissions for cluster creation.

### NEW QUESTION # 142

An administrator is planning to reserve Nutanix licenses for NC2 usage. Which two considerations should the administrator follow? (Choose two.)

- A. Nutanix Database Service (NDB) does not need manual license application.
- B. Nutanix Unified Storage (NUS) add-on can be selected for both the Pro and Ultimate tiers.
- C. Nutanix Cloud Infrastructure (NCI) ultimate licensing includes the Advanced Replication, NUS, and Security add-ons by default.
- D. Nutanix Cloud Infrastructure (NCI) ultimate licensing does not need a manual license application and it includes the Advanced Replication and Security add-ons by default.

**Answer: B,D**

Explanation:

When reserving licenses for Nutanix Cloud Clusters (NC2), administrators must understand the inclusion of add-ons within different tiers. For organizations requiring multi-protocol storage, the Nutanix Unified Storage (NUS) add-on is flexible and can be associated with either the NCI Pro or NCI Ultimate licensing tiers.

Furthermore, the NCI Ultimate tier is designed to be comprehensive; it automatically includes high-value features such as Advanced Replication and Security (Microsegmentation) by default. This simplifies the licensing process because these features do not require separate manual applications once the Ultimate tier is selected. While NCI Ultimate is feature-rich, it does not include the NUS add-on by default, which remains a capacity-based selection that must be specifically managed alongside the base license tier.

### NEW QUESTION # 143

Which entity should be contacted for AOS software support related to NC2?

- A. Partner
- B. Public Cloud Vendor
- C. Nutanix
- D. Internal IT Operations team

**Answer: C**

Explanation:

For AOS software support related to NC2, the appropriate entity to contact is Nutanix. Nutanix provides comprehensive support for their software, including the Acropolis Operating System (AOS) used in NC2 deployments.

Support Scope:

Nutanix offers support for the deployment, configuration, and management of NC2 clusters, including any issues related to AOS software.

This includes troubleshooting, updates, and technical assistance.

Why Not Other Options:

Internal IT Operations team: Typically handles internal issues but does not have the specialized knowledge or resources for AOS software support.

Partner: May provide support but would ultimately escalate issues to Nutanix for software-specific concerns.

Public Cloud Vendor: Manages infrastructure-related issues but does not provide support for Nutanix AOS software.

#### NEW QUESTION # 144

An administrator needs to backup Prism Central configuration data to an Amazon S3 bucket.

Which pcdr-cli command parameters is needed to satisfy this task?

- A. protect
- B. deployment-info
- C. list-protection-targets
- D. recover

**Answer: A**

Explanation:

To backup Prism Central configuration data to an Amazon S3 bucket, the pcdr-cli command with the protect parameter is used. This parameter is specifically designed for creating protection policies and backing up Prism Central data.

#### NEW QUESTION # 145

Which two features or services can an administrator ensure are protected by cluster protect within an NC2 environment? (Choose two.)

- A. Flow Network Security
- B. VM Templates
- C. Nutanix Files
- D. Virtual Machine Disks

**Answer: C,D**

Explanation:

Within an NC2 environment, the Cluster Protect feature can ensure the protection of:

Nutanix Files: This provides file services within the Nutanix ecosystem, and Cluster Protect can safeguard the data stored in Nutanix Files.

Virtual Machine Disks: This ensures that the data stored on virtual machine disks is protected, providing backup and recovery options for the virtual machines running within the cluster.
