## Huawei HCPA-IP Network (Datacom)-ENU(Huawei Certified Pre-sales Associate-IP Network(Datacom)-ENU) - H19-301-ENU FREE EXAM DUMPS QUESTIONS & ANSWERS

Question 6

AVX LAN solution has the following advantages:

- Low construction requirements: VXLAN can be built on any complex Layer 3 network.
- Easy for automation: After the underlay network is enabled, what need to do is configure the devices at both ends of tunnels and it is easier for the controller to orchestrate.
- High standard compliance: VXLAN is a standard virtual network bearer technology in the industry.

Which of the following statements are correct about VXLAN implementation in Huawei Cloud Campus?

☐ A. Fabric Extension supports third-party switches and Aps

☒ B. VXLAN-to-access is supported

☒ C. VXLAN-to-aggregation is supported

Hide answers/explanations Discussion 0

Correct Answer: B,C [Vote an answer](#)

Question 7

Each AP should be designed to cover as large area as possible in order to provide better coverage in a high density scenario

DOWNLOAD the newest Actual4Cert H19-308\_V4.0 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1CduAWJ\\_\\_3IyblAbGYF3uwRNlXkQvabM4](https://drive.google.com/open?id=1CduAWJ__3IyblAbGYF3uwRNlXkQvabM4)

Actual4Cert has created a real HCSA-Presales-Storage V4.0, H19-308\_V4.0 exam questions in three forms: Huawei H19-308\_V4.0 pdf questions file is the first form. The second and third formats are Web-based and desktop Huawei H19-308\_V4.0 practice test software. H19-308\_V4.0 pdf dumps file will help you to immediately prepare well for the actual Huawei HCSA-Presales-Storage V4.0. You can download and open the Huawei PDF Questions file anywhere or at any time. H19-308\_V4.0 Dumps will work on your laptop, tablet, smartphone, or any other device. You will get a list of actual Huawei H19-308\_V4.0 test questions in Huawei H19-308\_V4.0 pdf dumps file. Practicing with Web-based and desktop H19-308\_V4.0 practice test software you will find your knowledge gap.

## Huawei H19-308\_V4.0 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                      |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>Object Storage Basis: Object storage manages data as discrete units with metadata and unique identifiers for efficient retrieval. This scalable architecture suits unstructured data, cloud applications, and big data analytics requiring massive capacity.</li></ul> |

|         |                                                                                                                                                                                                                                                                                                                                                            |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 2 | <ul style="list-style-type: none"> <li>• NAS Storage Basis: Network-Attached Storage delivers file-level storage over standard networks, accessible to multiple users simultaneously. NAS systems offer cost-effective solutions for file sharing, collaboration, and centralized data management.</li> </ul>                                              |
| Topic 3 | <ul style="list-style-type: none"> <li>• OceanStor Dorado: OceanStor Dorado is Huawei's all-flash storage solution for mission-critical applications demanding ultra-low latency. This platform leverages NVMe technology and intelligent management to accelerate digital transformation.</li> </ul>                                                      |
| Topic 4 | <ul style="list-style-type: none"> <li>• Data Storage Basis: Data storage is the foundation of IT infrastructure, enabling efficient storage, management, and retrieval of digital information. Understanding storage fundamentals is essential for selecting solutions that meet business performance, capacity, and reliability requirements.</li> </ul> |
| Topic 5 | <ul style="list-style-type: none"> <li>• OceanStor Pacific: OceanStor Pacific is Huawei's distributed storage for massive-scale data management and cloud-native applications. It provides scalability, resilience, and performance for big data, AI workloads, and large-scale storage.</li> </ul>                                                        |
| Topic 6 | <ul style="list-style-type: none"> <li>• SAN Storage Basis: Storage Area Networks provide high-speed, block-level storage over dedicated networks for enterprise applications requiring low latency. SAN enables multiple servers to share storage resources while supporting advanced features like snapshots and replication.</li> </ul>                 |
| Topic 7 | <ul style="list-style-type: none"> <li>• OceanStor New Hybrid Flash Storage: OceanStor Hybrid Flash combines flash and disk storage to balance performance and cost-effectiveness. This architecture optimizes resources by placing performance-sensitive data on flash and capacity-oriented data on disk.</li> </ul>                                     |

## H19-308\_V4.0 Exam Dumps Provider | H19-308\_V4.0 Valid Mock Exam

Our company always feedbacks our candidates with highly-qualified H19-308\_V4.0 study guide and technical excellence and continuously developing the most professional H19-308\_V4.0 exam materials. You can see the high pass rate as 98% to 100%, which is unmarshced in the market. What is more, our H19-308\_V4.0 Practice Engine persists in creating a modern service oriented system and strive for providing more preferential activities for your convenience.

### Huawei HCSA-Presales-Storage V4.0 Sample Questions (Q74-Q79):

#### NEW QUESTION # 74

When two OceanStor Dorado 18000 controller enclosures are used, data access is not affected even if multiple controllers are faulty. Which of the following can be tolerated by OceanStor Dorado 18000? (Choose all that apply.)

- A. Failure of one controller enclosure
- B. Failure of seven controllers
- C. Simultaneous failure of two controllers
- D. Failure of one controller

**Answer: A,C,D**

Explanation:

OceanStor Dorado 18000 is designed with high fault tolerance, allowing it to continue data access in the event of multiple failures. It can tolerate the simultaneous failure of two controllers.

If one controller enclosure fails, the other enclosure can continue to provide access. A single controller failure is manageable due to redundancy within the system.

#### NEW QUESTION # 75

Which innovative deduplication and compression technologies are used by OceanProtect backup storage to achieve ultimate data reduction? (Choose all that apply.)

- A. Backup data preprocessing
- B. Byte-level compaction
- C. Feature-based compression
- D. Multi-layer inline variable-length deduplication

**Answer: A,B,C,D**

Explanation:

OceanProtect backup storage uses all these innovative technologies - backup data preprocessing, byte-level compaction, multi-layer inline variable-length deduplication, and feature-based compression - to maximize data reduction and storage efficiency.

#### NEW QUESTION # 76

RAID 0 is actually a mirroring technology.

- A. TRUE
- B. FALSE

**Answer: B**

Explanation:

This statement is false because RAID 0 and Mirroring (RAID 1) are fundamentally different concepts in Huawei storage technology. As defined in the Huawei technical manual, RAID 0 is "Striping." It breaks data into chunks and spreads them across multiple disks to increase performance. It has no redundancy.

"Mirroring" is the terminology specifically used for RAID 1. In a RAID 1 configuration, the system writes the exact same data to two separate physical disks simultaneously. This creates a 100% redundant copy (a mirror). If one disk fails, the other continues to provide data, ensuring zero downtime and no data loss.

Huawei's RAID 2.0+ virtualization technology can implement striping and mirroring across different "chunks" or "extents" within a storage pool, but it maintains the technical distinction: RAID 0 is for performance through striping, while mirroring is for reliability through duplication. Therefore, characterizing RAID 0 as a mirroring technology is a technical inaccuracy.

#### NEW QUESTION # 77

With adaptive data locality rearrangement on writes, the data dispersion is calculated in real time when backup data is written and data distribution on disks is adjusted. During backup data recovery, only a few sequential reads are required, improving HDD recovery performance.

- A. TRUE
- B. FALSE

**Answer: A**

Explanation:

The statement accurately describes Huawei's Adaptive Data Locality Rearrangement technology used in OceanProtect systems.

Backup data is often deduplicated and compressed, which traditionally leads to high data fragmentation (dispersion) across physical disks. When it comes time to recover that data, the disk heads on an HDD would normally have to perform thousands of "seek" operations to find the scattered blocks, resulting in very slow recovery speeds.

Huawei solves this by calculating the data dispersion in real-time during the write process. The system intelligently rearranges and groups related data blocks together on the disk media. Because the data is stored in a physically optimized, sequential manner, the recovery process can utilize sequential reads rather than random reads. This allows OceanProtect to deliver recovery performance that is significantly higher than traditional backup appliances, ensuring that businesses can restore services rapidly after an outage or data loss event.

#### NEW QUESTION # 78

Which of the following technologies are used in the OceanProtect ransomware protection solution to prevent data tampering and deletion? (Choose all that apply.)

- A. Air Gap
- B. WORM
- C. Detection and analysis

- D. Secure snapshot

**Answer: A,B,D**

Explanation:

The OceanProtect ransomware protection solution uses WORM (Write Once Read Many), secure snapshot, and Air Gap technologies to prevent data tampering and deletion, ensuring the integrity and safety of backup data. Detection and analysis focus on identifying threats, not preventing tampering or deletion.

## NEW QUESTION # 79

.....

With all this reputation, our company still take customers first, the reason we become successful lies on the professional expert team we possess, who engage themselves in the research and development of our H19-308\_V4.0 learning guide for many years. So we can guarantee that our H19-308\_V4.0 exam materials are the best reviewing material. As for candidates who possessed with a H19-308\_V4.0 professional certification are more competitive. The current word is a stage of science and technology, social media and social networking has already become a popular means of H19-308\_V4.0 exam materials. As a result, more and more people study or prepare for exam through social networking. By this way, our H19-308\_V4.0 learning guide can be your best learn partner.
