## Exam AD0-E725 Guide Materials - New AD0-E725 Test Experience

We keep a close watch at the most advanced social views about the knowledge of the test Adobe certification. Our experts will renovate the test bank with the latest AD0-E725 study materials and compile the latest knowledge and information into the questions and answers. In the answers, our experts will provide the authorized verification and detailed demonstration so as to let the learners master the latest information timely and follow the trend of the times. All we do is to integrate the most advanced views into our AD0-E725 Study Materials.

## Adobe Commerce Developer Expert Sample Questions (Q17-Q22):

### NEW QUESTION # 17

A multi-source merchant asks an Adobe Commerce Developer to prioritize inventory source selection based on shipping address and minimal delivery cost.

How should the Developer implement this task functionality?

- A. Use Source Priority Algorithm and utilize getSourceSelectionAlgorithmList.
- **B. Register new Source Selection Algorithms (SSA) via di.xml and implement SourceSelectionInterface.**
- C. Configure Distance Priority Algorithm and implement PlaceReservationsForSalesEventInterface.

**Answer: B**

Explanation:

To customize how inventory sources are prioritized, developers must create a new Source Selection Algorithm (SSA). This is done by registering a new SSA in di.xml and implementing SourceSelectionInterface. This allows developers to define rules such as shipping address proximity or delivery cost.

B is partially correct: Distance Priority Algorithm exists, but implementing PlaceReservationsForSalesEventInterface is not the right way to customize selection logic.

C Source Priority Algorithm is fixed (based on predefined priority), not custom.

Reference:

Adobe Commerce DevDocs - Inventory Source Selection Algorithm

Official Documentation Extracts:

"To customize source selection behavior, implement a custom Source Selection Algorithm (SSA). The algorithm must implement SourceSelectionInterface and be registered via dependency injection (di.xml)."- Adobe Commerce DevDocs: Custom Source Selection Algorithm

"Adobe Commerce provides default SSAs: Source Priority Algorithm and Distance Priority Algorithm.

Custom SSAs can be created to satisfy specific business requirements such as delivery costs."- Adobe Commerce Inventory Management Guide

#### NEW QUESTION # 18

An Adobe Commerce Developer is tasked with configuring a custom module to allow for different behaviors of a core class without altering the original class code.

How should the Developer achieve this flexibility by leveraging Magento's dependency injection system?

- **A. Use virtual types in the di.xml file.**
- B. Use a transient object in the di.xml file.
- C. Use constructor arguments in the di.xml file.

**Answer: A**

#### NEW QUESTION # 19

A customer asks for a new functionality which will allow them to see the total lifetime sales statistic of a product. This new data is to be made available for the API and traditional product exports. The technical architect of the company servicing the client decides that for this to be achieved, the first step is for an Extension Attribute to be created.

What are the next two steps that need to be taken? (Choose two.)

- A. Implement an after plugin on the Product Repository.
- B. Implement an around plugin on the Product Repository.
- **C. Declare the extension attribute in etc/webapi\_rest/extension\_attributes.xml.**
- **D. Declare the extension attribute in etc/extension\_attributes.xml.**

**Answer: C,D**

#### NEW QUESTION # 20

A client is setting up an Adobe Commerce B2B store and wants to start offering a Payment on Account option for their customers when placing orders.

How should the Developer achieve this?

- A. Create and implement a new Payment Method to provide credit accounts to customers.
- **B. Install and activate the native Adobe Commerce module which activates payment.**
- C. Repurpose the native Cash on Delivery method.

**Answer: B**

### NEW QUESTION # 21

In an Adobe Commerce store, there is a product attribute called `external_service_id`. A Developer must ensure the attribute is only available for specific users via the API.

How should the Developer achieve the required permissions?

- A. Setup a custom permission control at the attribute level because it is not supported out of the box.
- B. Configure the access control list (ACL) resource for the `external_service_id` attribute via etc/`extension_attributes.xml`.
- C. Implement an afterGet plugin and exclude the attribute for non-authorized users.

**Answer: A**

### NEW QUESTION # 22

.....

Do you often envy the colleagues around you can successfully move to a larger company to achieve the value of life? Are you often wondering why your classmate, who has scores similar to yours, can receive a large company offer after graduation and you are rejected? In fact, what you lack is not hard work nor luck, but AD0-E725 Guide question. If you do not have extraordinary wisdom, do not want to spend too much time on learning, but want to reach the pinnacle of life through AD0-E725 exam, then you must have AD0-E725 question torrent.
