

# Juniper Vce JN0-105 File: Junos, Associate (JNCIA-Junos) - Itcertking Provides you a Simple & Safe Shopping Experience

P.S. Free & New JN0-105 dumps are available on Google Drive shared by Itcertking: [https://drive.google.com/open?id=1t6eXgQchSksVftEn5Az4Uo13ugcXfVi\\_](https://drive.google.com/open?id=1t6eXgQchSksVftEn5Az4Uo13ugcXfVi_)

We know deeply that a reliable JN0-105 exam material is our company's foothold in this competitive market. High accuracy and high quality are the most important things we always looking for. We understand our candidates have no time to waste, everyone wants an efficient learning. So we take this factor into consideration, develop the most efficient way for you to prepare for the JN0-105 exam, that is the real questions and answers practice mode, firstly, it simulates the real Junos, Associate (JNCIA-Junos) test environment perfectly, which offers greatly help to our customers. Secondly, it includes printable PDF Format, also the instant access to download make sure you can study anywhere and anytime. All in all, high efficiency of JN0-105 Exam Material is the reason for your selection.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device</li></ul>
Topic 4	<ul style="list-style-type: none"><li>User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>

## Vce JN0-105 File | Latest JN0-105: Junos, Associate (JNCIA-Junos)

About the JN0-105 Exam Certification, reliability can not be ignored. JN0-105 exam training materials of Itcertking are specially designed. It can maximize the efficiency of your work. We are the best worldwide materials provider about this exam.

### Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q41-Q46):

#### NEW QUESTION # 41

Which two statements are correct about Junos traceoptions? (Choose two.)

- A. Traceoptions are enabled through configuration.
- B. Traceoption output, by default, is stored in /var/log/<file-name>.
- C. Traceoptions cannot be enabled in a production environment.
- D. Traceoptions are enabled by default.

**Answer: A,B**

#### NEW QUESTION # 42

Which two statements are correct about firewall filters? (Choose two.)

- A. There can be only one firewall filter.
- B. There can be multiple firewall filters.
- C. "Accept" is the default action of packets that are not explicitly allowed.
- D. "Discard" is the default action of packets that are not explicitly allowed.

**Answer: B,D**

Explanation:

In Juniper Networks devices, firewall filters are used to control packet flow through the device. The default action for packets that do not match any of the specified criteria in the firewall filter is to discard them, enhancing network security by ensuring that only explicitly allowed traffic can pass through. Furthermore, it is possible to configure multiple firewall filters on a device, allowing for granular control over traffic based on various criteria such as source, destination, and protocol type.

#### NEW QUESTION # 43

Which three benefits occur when operating an interior gateway protocol (IGP) in an autonomous system (AS)? (Choose three.)

- A. IGP's learn everything about the subnets and best paths within your network.
- B. IGP's determine the optimal paths for data transmission.
- C. IGP's react very fast to network change.
- D. IGP's learn prefixes in the global Internet's routing table.
- E. IGP's automatically distribute static routing information.

**Answer: A,B,C**

Explanation:

Operating an Interior Gateway Protocol (IGP) within an Autonomous System (AS) provides several benefits, including determining the optimal paths for data transmission (B), reacting quickly to network changes (D), and learning all about the subnets and best paths within the network (E). IGP's are designed to manage routing within a single AS efficiently, adapting to changes and ensuring data is routed through the best available paths.

#### NEW QUESTION # 44

Which statement is correct when multiple users are configuring a Junos device using the configure private command?

- A. Each user gets their own candidate configuration.
- B. A commit by any user will commit changes made by all active users.
- C. Each user shares the same candidate configuration.

- D. A commit will not succeed until there is only a single user in configuration mode.

**Answer: A**

Explanation:

When multiple users are configuring a Junos device using the "configure private" command, each user gets their own candidate configuration (C). This allows for isolated configuration sessions, where changes made by one user do not impact or interfere with the changes made by another user in their private session.

#### NEW QUESTION # 45

You are logged in to a Junos OS device with SSH and issued the show protocols | compare command in the configuration, but no output is shown.

Which statement is correct in this scenario?

- A. You must commit the configuration before any output will be shown.
- B. The command only works for interface configuration differences.
- C. There are no changes to the candidate configuration.
- D. Someone accidentally deleted the active configuration.

**Answer: C**

Explanation:

The show | compare command in Junos OS is used to display the differences between the candidate configuration and the active configuration. If no output is shown when you issue this command, it means that there are no changes between the candidate configuration and the active configuration. This indicates that the candidate configuration is identical to the active configuration, and thus no differences are displayed.

#### NEW QUESTION # 46

.....

The JN0-105 PDF is the most convenient format to go through all exam questions easily. It is a compilation of actual Juniper JN0-105 exam questions and answers. The PDF is also printable so you can conveniently have a hard copy of Juniper JN0-105 Dumps with you on occasions when you have spare time for quick revision.
