Questions (Q43-Q48):

NEW QUESTION # 43

An organization is using an adaptive security policy where a Data Center Object was imported and used in some rules. When the cloud resource represented by this object changes its IP address, how will the change be effected on the Security Gateway

- A. The Data Center Object needs to be refreshed in the SmartConsole and then a policy install will be required
- **B. With a property functioning configuration, the change will automatically be done on the Security Gateway without any action required by the administrator**
- C. The change is automatically updated to the Security Management Server and so only a policy install from SmartConsole or with API will be required
- D. If CloudGuard Controller is enabled on the Security Gateway, the gateway will connect with the Cloud account and synchronize all the Data Center Objects used on

Answer: B

Explanation:

CGC dynamically learns about objects and attributes in Workloads, such as changes in subnets, security groups, virtual machines, IP addresses and tags. After using the vendor's API to establish a trust relationship with a datacenter, CGC regularly polls the connected environments for changes to objects and object attributes used in security policy. Changes are automatically pushed to the security gateway.
