

New CT-UT Test Preparation, PDF CT-UT Cram Exam

P.S. Free 2026 ISTQB CT-UT dumps are available on Google Drive shared by PDFBraindumps: <https://drive.google.com/open?id=1J5IO-CLI36krPFpDdif9IQ3AG3OTx00>

If you are interested in Soft test engine of CT-UT practice questions, you should know below information better. Soft test engine should be downloaded in personal computer first time online, and then install. After installment you can use CT-UT practice questions offline. You can also copy to other electronic products such as Phone, Ipad. On the hand, our exam questions can be used on more than 200 personal computers. If you purchase Soft test engine of CT-UT Practice Questions for your companies, it will be very useful.

ISTQB CT-UT Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Usability Reviews: This domain evaluates the skills of Usability Testers in conducting reviews of software interfaces without user involvement. It differentiates informal reviews from expert reviews and introduces heuristic evaluation as a structured method. The section describes step-by-step approaches to preparing for and conducting reviews, emphasizing the importance of consensus and clear communication of findings.
Topic 2	<ul style="list-style-type: none">• Risks in Usability, User Experience and Accessibility: This domain assesses the ability of Risk Analysts to identify and analyze common risks that can affect usability, user experience, and accessibility. It differentiates between product risks—such as users being unable to use a product effectively—and project risks, including lack of expertise or insufficient usability evaluation processes. Understanding these risks helps in planning effective usability testing and evaluation.
Topic 3	<ul style="list-style-type: none">• Selecting Appropriate Methods: This domain helps Test Managers make decisions on which usability evaluation methods to apply depending on project context, resources, and maturity. It discusses criteria for selecting usability, user experience, and accessibility evaluation methods suited to different stages of development and organizational needs, including agile development scenarios.

Our ISTQB CT-UT practice exam simulator mirrors the CT-UT exam experience, so you know what to anticipate on CT-UT certification exam day. Our ISTQB Certified Tester Usability Tester (CT-UT) practice test software features various question styles and levels, so you can customize your ISTQB CT-UT exam questions preparation to meet your needs.

ISTQB Certified Tester Usability Tester Sample Questions (Q29-Q34):

NEW QUESTION # 29

You're conducting a user survey and you have reached the third stage, selecting an appropriate questionnaire. You have decided to use a standardized questionnaire as you want to benchmark against previous usability measurements. Which of the following user questionnaires allow benchmarking against previous usability measurements?

- i. SUS
- ii. SUMI
- iii. WAMMI

- A. i, ii and iii are true
- B. i is true, ii & iii are false
- C. ii & iii are true, i is false
- D. i & ii are true, iii is false

Answer: A

Explanation:

SUS (System Usability Scale), SUMI (Software Usability Measurement Inventory), and WAMMI (Website Analysis and Measurement Inventory) are all validated, standardized usability questionnaires that support benchmarking. They allow comparison against known usability scores from a wide variety of systems. These instruments provide numeric scores that can be interpreted using benchmark datasets or industry standards.

Therefore, all three-i, ii, and iii-are true, making D the correct answer.

Here are the verified answers and detailed explanations for Questions 22 through 25, formatted in your specified structure:

#####

NEW QUESTION # 30

Which of the following are common mistakes made in usability testing?

- i. The user is too active
- ii. Critical results are ignored
- iii. No observers involved
- iv. Scheduling too late
- v. Incorrect focus

- A. ii, iv & v are true, i & iii are false
- B. i, ii & iii are true, iv & v are false
- C. ii & iv are true, i, iii & v are false
- D. i & iii are true, ii, iv & v are false

Answer: A

Explanation:

Common mistakes in usability testing include:

Ignoring critical results (ii): A significant issue if findings are not acted upon.

Scheduling the test too late (iv): This can lead to usability problems being discovered too late to be addressed effectively.

Having the wrong focus (v): For instance, focusing on aesthetics instead of usability goals.

Option i ("user is too active") is not a problem-active participation is necessary. Option iii ("no observers involved") is not a typical mistake, since tests can still be valid even with recorded sessions and later review.

Hence, the correct answer is A: ii, iv & v are true.

#####

NEW QUESTION # 31

A company distributes its products over a web shop where users can put items in their shopping cart. After they click on "checkout", the checkout process starts and users cannot go back anymore to correct possible mistakes. The only way is to hit the "back" button of the browser, which might lead to an expired session and therefore losing all items in the shopping cart. Which of the following heuristics would best describe this usability issue?

- A. Help and documentation
- B. Visibility of system status
- C. Aesthetic and minimalist design
- **D. User control and freedom**

Answer: D

Explanation:

The described issue violates the usability heuristic "User control and freedom," as defined by Jakob Nielsen.

This principle emphasizes that users should have the ability to undo and redo actions and navigate freely without being trapped in irreversible sequences. In the scenario, users are forced into the checkout process without a clear way to return or correct mistakes, except through the unreliable and disruptive back button.

This design flaw undermines user autonomy and can result in lost progress or frustration.

#####

NEW QUESTION # 32

Which of the following statements about usability test scripts is wrong?

- A. It contains pre-session interview questions.
- B. It contains post-session interview questions.
- C. It is a checklist used by the moderator of a usability test.
- **D. It contains answers to the test questions.**

Answer: D

Explanation:

A usability test script is a structured document used by the moderator to ensure consistency across test sessions. It typically includes pre-session briefing text, pre- and post-session interview questions, and the specific usability tasks to be performed. However, it does not include answers to the test questions, as usability tests focus on observing user behavior and performance-not testing users' knowledge. Providing answers would bias results and invalidate findings. Thus, option D is incorrect and the best choice.

#####

NEW QUESTION # 33

What is the System Usability Scale (SUS)?

- A. A usability test execution activity specified by the moderator that needs to be accomplished by a usability test participant within a given period of time.
- B. Testing to evaluate the degree to which the system can be used by specified users with effectiveness, efficiency and satisfaction in a specified context of use.
- **C. A simple, ten-item attitude scale giving a global view of subjective assessments of usability.**
- D. A requirement on the usability of a component of system

Answer: C

Explanation:

The System Usability Scale (SUS) is a standardized, reliable tool used to measure perceived usability. It consists of 10 items with five response options (from strongly agree to strongly disagree). It is widely used due to its simplicity and effectiveness in providing a

single score to reflect a user's overall satisfaction with a system. Option A refers to ISO's definition of usability testing, B describes a task in usability testing, and D refers to a usability requirement, not SUS. Therefore, the correct description of SUS is option C.
