

MB-820試験解答、MB-820日本語版参考資料

2026年CertJukenの最新MB-820 PDFダンプおよびMB-820試験エンジンの無料共有: https://drive.google.com/open?id=1y87DurNvr_oMv78YEZynyVxZMxYS_mm-

Microsoft試験問題は専門家によって編集され、認定された担当者によって承認され、さまざまな機能を強化するため、MB-820テストトレントを便利かつ効率的に学習できます。購入前に無料ダウンロードと試用を提供しています。MB-820試験の問題では、学生がシミュレーション問題を提供するプラットフォームで20〜30時間練習する必要があり、Microsoft Dynamics 365 Business Central DeveloperのMB-820試験に合格する自信を持たせることができます。MB-820試験に合格して目標を達成するための最良のツールでなければなりません。

Microsoft MB-820 認定試験の出題範囲:

トピック	出題範囲
トピック 1	Business Central の説明: Business Central のコンポーネントと機能、そして Business Central のコアソリューションと拡張アプローチについて説明することが、このトピックの焦点です。また、Business Central Online と Business Central オンプレミスの機能の違いについても説明します。
トピック 2	Business Central と他のアプリケーションの統合: このトピックでは、Representational State Transfer (REST) サービスへのアクセスについて説明します。また、API の実装についても説明します。
トピック 3	ALオブジェクトを使用した開発: このトピックでは、テーブルとレポートの構築と拡張について説明します。また、XMLポートの設計と作成についても説明します。最後に、エンタイトルメントオブジェクトと権限セットオブジェクトの操作方法について説明します。

Microsoft Dynamics 365 Business Central Developer 認定 MB-820 試験問題 (Q25-Q30):

質問 # 25

A company has a page named New Job Status connected to a source table named Job. The page has an action named Item Ledger Entries. The company requires the following changes to the page:

- * Filter the page to display only jobs with open or quote status.
- * Add the following comment for internal use: This page does not include completed jobs.
- * Item Ledger Entries action must open the selected job on the page and display it in the UI for users to modify.

You need to select the property selections to use for each requirement.

Which property selections should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Page modifications

Requirement

Display status of open or quote.

Add a comment for internal use.

Action must open selected job on the page.

Property selection

SourceTableView = sorting(Status) order(ascending)

SourceTableView = where(Status = filter(Open | Quote | Planning));

SourceTableView = where(Status = filter(Open | Quote));

Description = 'This page does not include completed jobs;'

ToolTip = 'This page does not include completed jobs;'

RunPageLink = 'Job No.' = FIELD('No.');

RunPageView = 'Job No.' = FIELD('No.');

正解:

解説:

Page modifications

Requirement

Display status of open or quote.

Add a comment for internal use.

Action must open selected job on the page.

Property selection

SourceTableView = sorting(Status) order(ascending)

SourceTableView = where(Status = filter(Open | Quote | Planning));

SourceTableView = where(Status = filter(Open | Quote));

Description = 'This page does not include completed jobs;'

ToolTip = 'This page does not include completed jobs;'

RunPageLink = 'Job No.' = FIELD('No.');

RunPageView = 'Job No.' = FIELD('No.');

Explanation:

Page modifications

Requirement

Display status of open or quote.

Add a comment for internal use.

Action must open selected job on the page.

Property selection

SourceTableView = sorting(Status) order(ascending)

SourceTableView = where(Status = filter(Open | Quote | Planning));

SourceTableView = where(Status = filter(Open | Quote));

Description = 'This page does not include completed jobs;'

ToolTip = 'This page does not include completed jobs;'

RunPageLink = 'Job No.' = FIELD('No.');

RunPageView = 'Job No.' = FIELD('No.');

質問 # 26

You have a per tenant extension that contains the following code.

```

10 interface "IDiscount Calculation"
11 {
12     procedure GetLine(var Line: Variant)
13     procedure GetDiscount() : Decimal
14 }
15 codeunit 50100 "Discount Mgmt." implements "IDiscount Calculation"
16 {
17     procedure GetLine(var VariantLine: Variant)
18     begin
19     end;
20     procedure GetDiscount() DiscountAmount : Decimal
21     begin
22     end;
23     procedure DiscountIsValid(DocumentDate: Date): Boolean
24     begin
25     end;
26 }

```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statement	Yes	No
Codeunit "Discount Mgmt." compiles successfully.	☐	☐
VariantLine in line 17 must be changed to Line and the DiscountAmount removed for the codeunit to compile.	☐	☐
The DiscountIsValid method must be defined in the interface for the code to compile.	☐	☐

正解:

解説:

Interface implementation		
Statement	Yes	No
Codeunit "Discount Mgmt." compiles successfully.	☐	☒
VariantLine in line 17 must be changed to Line and the DiscountAmount removed for the codeunit to compile.	☐	☒
The DiscountIsValid method must be defined in the interface for the code to compile.	☒	☐

Explanation:

* Codeunit "Discount Mgmt." compiles successfully. = NO

* VariantLine in line 17 must be changed to Line and the DiscountAmount removed for the codeunit to compile. = NO

* The DiscountIsValid method must be defined in the interface for the code to compile. = YES The codeunit "Discount Mgmt." will not compile successfully as is because the DiscountIsValid method is not defined in the "IDiscount Calculation" interface, yet it is being declared in the codeunit which implements this interface. AL requires that all procedures in the codeunit that implements an interface must be defined in the interface itself.

The VariantLine in line 17 does not need to be changed to Line, nor does the DiscountAmount need to be removed for the codeunit to compile. These are valid declarations in AL and they are correctly implemented in the codeunit. The Variant data type in AL is used to handle various data types and DiscountAmount is a valid return type for a procedure.

For the code to compile successfully, the DiscountIsValid method must be included in the interface because AL enforces that any codeunit implementing an interface must implement all the methods defined in that interface.

質問 # 27

You need to define the data types for the fields of the Non-conformity table.

Which two data types should you use? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Date for the Non-Conformity Date field
- B. Integer for the Non-conformity Number field
- C. Char for the Non-Conformity Number field
- D. Code for the Non-Conformity Number field
- E. Date Time for the Non-Conformity Date field

正解: C、D

質問 # 28

You need to download a stored picture from the Room Incident page.

How should you complete the code segment? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

InStream and OutStream

```

local procedure DownloadIncidentPicture(Incident : Record Incident)
var
    TempBlob : Codeunit "Temp Blob";
    IncidentOutStream : OutStream;
    IncidentInStream : InStream;
    ImageFilter, FileName : Text;
begin
    TempBlob. (IncidentOutStream);
    Incident.Image.ExportStream(IncidentOutStream);
    TempBlob. (IncidentInStream);
    ImageFilter := 'Image Files (*.bmp;*.jpg;*.gif)|*.bmp;*.jpg;*.gif';
    FileName := 'Customer Picture';
    if not DownloadFromStream(, 'Download Incident Picture', '', ImageFilter, FileName) then
        exit;

```
