Valid Salesforce AP-219 exam pdf & AP-219 practice exam & AP-219 braindumps2go dumps

This is a mutually beneficial learning platform, that's why our AP-219 study materials put the goals that each user has to achieve on top of us, our loyal hope that users will be able to get the test AP-219 certification, make them successful, and avoid any type of unnecessary loss and effortless harvesting that belongs to their success. Respect the user's choice, will not impose the user must purchase the AP-219 Study Materials. We can meet all the requirements of the user as much as possible, to help users better pass the qualifying exams.

Salesforce Order Management Administrator Accredited Professional Sample Questions (Q109-Q114):

NEW QUESTION # 109

What two tools can an administrator use to debug an issue with an Apex trigger?

- A. Apex Logs in Setup
- B. Log Inspector in the Developer Console
- C. Error Logs in the Developer Console
- D. Debug Logs in Setup

Answer: B,D

Explanation:

The administrator can use two tools to debug an issue with an Apex trigger: Log Inspector in the Developer Console and Debug Logs in Setup. The Log Inspector is a tool that displays a graphical representation of a debug log, which is a record of database

operations, system processes, and errors that occur when executing a transaction or running unit tests. The Log Inspector helps you analyze and troubleshoot your code by highlighting errors, checkpoints, and execution times. The Debug Logs page in Setup lets you monitor and retain debug logs for users, Apex classes, Apex triggers, and Lightning components. You can view, download, or delete debug logs from this page.

NEW QUESTION # 110

What type of relationship exists between FulfillmentOrder and Location?

- A. One-to-One Lookup (Location) FulfilledFrom Location
- B. One-to-Many Lookup (Location) FulfilledFrom Location Id
- C. Many-to-One Lookup (Location) Fulfilled from Location Id
- D. Junction (Many to Many)

Answer: C

Explanation:

The type of relationship that exists between FulfillmentOrder and Location is Many-to-One Lookup (Location) FulfilledFrom Location Id. A Lookup field is a type of custom field that creates a relationship between two objects, but does not support rollup summary fields. A Many-to-One relationship means that many child records can be related to one parent record, but not vice versa. In this case, a FulfillmentOrder has a Lookup field named FulfilledFrom Location Id that references a Location record. A Location is a record that represents a physical location from which order product items are fulfilled, such as warehouses and retail stores. A Location can have many FulfillmentOrders associated with it, but a FulfillmentOrder can only have one Location. NEW QUESTION # 111

Based on some changes in Universal Containers' Commerce engine, new Orders are expected to have two additional attributes at the header level. In Order Management, which other Object besides Order also needs to be extended?

- A. Delivery Groups
- B. Change Order
- C. Order Summary
- D. Payment Summary

Answer: C

Explanation:

Based on some changes in Universal Containers' Commerce engine, new Orders are expected to have two additional attributes at the header level. In Order Management, besides Order, the other object that also needs to be extended is Order Summary. An Order Summary is a record that stores information about an order, such as the total amount, the number of items, and the fulfillment status. An Order Summary is created by a process called Create Order Summary Process, which runs whenever an order is created or updated. The process calls a flow called Create Order Summary Flow, which calculates the order summary fields and creates or updates the order summary record. To extend an object in Order Management, an administrator can create custom attributes on that object that match the API name and data type of the corresponding attributes in B2C Commerce. Reference: Order Management Objects

NEW QUESTION # 112

An administrator suspects that recent changes to a flow have created a defect. The administrator wants to test the flow with input data that they believe will cause the error. What can the developer do next?

- A. Open the Flow and select Attach to Live Session and Provide the Order Number
- B. Open the Flow, Select Debug with inputs. Provide the input values, select Run
- C. Open the Flow and select Attach to Live Session. Provide the Session Id. Select Attach
- D. Open the Flow, Select Debug, Provide the input values, Select Run

Answer: D

NEW QUESTION # 113

A company's sales team wants the Total Amount field to be included in the Highlights panel at the top of the Credit Memo record page. How can the administrator meet this requirement?

- A. Modify the sales team profile's assigned record type to include the Total Amount field in the Highlights Panel
- B. Edit the properties of the Highlights Panel component on the Credit Memo lightning record page
- C. Edit the Credit Memo page layout to include the Total Amount field in the Highlights Panel
- **D. Modify the compact layout on the Credit Memo object**

Answer: D

Explanation:

The best way for the administrator to meet this requirement is to modify the compact layout on the Credit Memo object. A Credit Memo is a record that represents a refund or credit issued to a customer for an order or part of an order. A Credit Memo has various fields and related lists that display information such as the credit amount, status, reason, etc. A compact layout is a type of layout that determines which fields appear in the highlights panel at the top of a record page in Lightning Experience or Salesforce mobile app. The administrator can use the Object Manager to modify the compact layout on the Credit Memo object and add the Total Amount field to the compact layout. This way, the sales team can see the Total Amount field in the highlights panel at the top of the Credit Memo record page. Verified Reference: https://help.salesforce.com/s/articleView?id=sf.order_management_credit_memo.htm&type=5 https://help.salesforce.com/s/articleView?id=sf.compact_layouts_overview.htm&type=5
