Everyone wants to have a good job and decent income. But if they don't have excellent abilities and good major knowledge they are hard to find a decent job. Passing the test AD0-E725 certification can make you realize your dream and find a satisfied job. Our AD0-E725 study materials are a good tool that can help you pass the AD0-E725 Exam easily. You needn't spend too much time to learn it. Our AD0-E725 exam guide is of high quality and if you use our product the possibility for you to pass the AD0-E725 exam is very high as 99% to 100%.

It is acknowledged that there are numerous AD0-E725 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for AD0-E725 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our AD0-E725 Actual Exam is. To let you have a general idea about the shining points of our training materials I would like to list three of the advantages of our training for you.

AD0-E725 Latest Exam Discount & Prep AD0-E725 Guide

Our AD0-E725 training materials are famous for the instant download. If you buy from us, you can get the downloading link and password for the AD0-E725 exam dumps within ten minutes after purchasing. In this way, you can just start your learning

immediately. What's more, we have online and offline chat service stuff, if you have any questions about the AD0-E725 training dumps, you can ask help from us, and we will give you reply as quickly as possible. We also offer free update for one year if you buy AD0-E725 exam dumps from us.

Adobe Commerce Developer Expert Sample Questions (Q15-Q20):

NEW QUESTION # 15

A Developer is working on an Adobe Commerce store, and the security team has flagged certain inline scripts in the store as vulnerable to potential attacks. The Developer decides to implement Content Security Policies (CSP) to secure the store's environment.

What will the Developer achieve by taking this action?

- A. Prevent users from accessing certain areas of the website based on their IP address.
- B. Ensure that all user input is sanitized before being processed by the application.
- C. **Restrict which resources (scripts, styles, images) are allowed to load on the website.**

Answer: C

Explanation:

Comprehensive and Detailed Explanation (with official references):

The correct answer is C. Restrict which resources (scripts, styles, images) are allowed to load on the website.

Adobe Commerce supports Content Security Policy (CSP), a browser-level security feature that mitigates certain types of attacks such as Cross-Site Scripting (XSS) and data injection attacks.

By defining a CSP in Adobe Commerce, developers can control:

- * Which scripts can be executed (script-src).
- * Which stylesheets can be applied (style-src).
- * Which images and media can be loaded (img-src, media-src).
- * Whether inline scripts or styles are allowed.

This does not sanitize user input (A) nor restrict user access based on IP addresses (B). Instead, it focuses on restricting the sources of content that the browser can load.

Official Documentation Extracts:

* "Content Security Policy (CSP) is an added layer of security that helps to detect and mitigate certain types of attacks, including Cross-Site Scripting (XSS) and data injection attacks. CSP works by restricting the sources from which content can be loaded." - Adobe Commerce DevDocs: Content Security Policy

* "A CSP allows developers to define approved sources of content that browsers can load. These policies help reduce the risk of malicious content injection in Magento storefronts." - Adobe Commerce Security Guide

NEW QUESTION # 16

An Adobe Commerce Developer creates a before plugin for the save() method from the Magento\Framework\App\Cache\Proxy class to manipulate with cache identifiers and data before it is saved to the cache storage. An example of the code is shown below:

```
namespace Magento\Framework\App\Cache;  
use Magento\Framework\App\Cache\CacheInterface;  
use Magento\Framework\ObjectManager\NoninterceptableInterface;  
class Proxy implements  
CacheInterface,  
NoninterceptableInterface  
{  
...  
public function save($data, $identifier, $tags = [], $lifeTime = null)  
{  
    return $this->getCache()->save($data, $identifier, $tags, $lifeTime);  
}  
...  
}
```

Why is the plugin not working as expected?

- A. **The plugin cannot be created for this class.**
- B. An after plugin defined for the same function affects the results.
- C. An around plugin defined for the same function prevents the execution.

Answer: A

NEW QUESTION # 17

A Developer is notified that custom API results are not cached, which is causing additional delays. What are two potential causes for this behavior? (Choose two.)

- A. The request is using HTTP POST.
- B. The request is using HTTP GET.
- C. The request is using HTTP PUT.
- D. The request is using HTTP HEAD.

Answer: A,C

NEW QUESTION # 18

A Developer is tasked with extending the GraphQL capabilities of a client's Adobe Commerce project by adding custom attributes to the product query.

Which step should the Developer take to correctly implement this GraphQL customization?

- A. Add new attributes in the Adobe Commerce admin panel to reflect the additions.
- B. Extend the ProductInterface by creating a schema.graphqls file in the custom module's etc directory.
- C. Add aroundGetList and afterGetList plugins to the ProductRepositoryInterface to reflect the new attributes.

Answer: B

Explanation:

The correct way to extend GraphQL is to extend the schema via schema.graphqls.

Define new fields for ProductInterface.

Provide a resolver class to return the attribute values.

B is incorrect: adding attributes in admin does not automatically expose them in GraphQL.

C is incorrect: repository plugins affect service contracts, not GraphQL schema definitions.

Reference:

Adobe Commerce DevDocs - Extend GraphQL schema

NEW QUESTION # 19

A Developer creates daily cron jobs to automate a client's business processes, including automated stock imports via CSV files once per day. After a few days, it is noted that the cron jobs do not run daily. The Developer discovers the cron jobs are sometimes assigned a missed status and do not execute, and other cron jobs become stuck during the execution time of the custom cron jobs. Which option should the Developer use to ensure the cron jobs consistently run each day?

- A. In the execute() function, implement a lock checker to make sure the cron runs alone.
- B. Set the cron jobs to run multiple times per day instead of once daily.
- C. Implement a custom group for the cron jobs in the crontab.xml.

Answer: C

Explanation:

The correct solution is to create a custom cron group.

By default, Magento cron jobs run in shared groups (default, index, etc.). If a heavy/long-running job blocks the queue, other jobs in the same group may become delayed or marked as "missed." By assigning heavy processes (such as stock imports) to a dedicated group, developers ensure that the job is managed separately, avoiding conflicts.

Option B does not solve the root scheduling issue; it just increases runs.

Option C (lock checker) prevents overlaps but does not prevent the missed status caused by shared cron queue congestion.
