

# **C-BCSBS-2502 Studienmaterialien: SAP Certified Associate - Positioning SAP Business Suite - C-BCSBS-2502 Torrent Prüfung & C-BCSBS-2502 wirkliche Prüfung**

Außerdem sind jetzt einige Teile dieser Zertpruefung C-BCSBS-2502 Prüfungsfragen kostenlos erhältlich:  
<https://drive.google.com/open?id=1Rz6D5EpwIWQbS5Qy10ZVHzK-N7pcPdY4>

Die Qualifikation ist nicht gleich wie die Fähigkeit eines Menschen. Die Qualifikation bedeutet nur, dass Sie dieses Lernerlebnis hat. Und die reale Fähigkeit sind in der Ppraxis entstanden. Sie hat keine direkte Verbindung mit der Qualifikation. Sie sollen niemals das Gefühl haben, dass Sie nicht exzellent ist. Sie sollen auch nie an Ihrer Fähigkeit zweifeln. Wenn Sie die Dumps zurSAP C-BCSBS-2502 Zertifizierungsprüfung wählen, sollen Sie sich bemühen, die Prüfung zu bestehen. Wenn Sie sich fürchten, C-BCSBS-2502 Prüfung nicht bestehen zu können, wählen Sie doch die Sulungsunterlagen zur SAP C-BCSBS-2502 Prüfung von Zertpruefung. Egal ob welche Qualifikation haben, können Sie ganz einfach die Inhalte der Fragenkataloge verstehen und die C-BCSBS-2502 Prüfung erfolgreich abschließen.

Wenn Sie finden, dass es ein Abenteuer ist, sich mit den Prüfungsmaterialien zur SAP C-BCSBS-2502 Zertifizierungsprüfung von Zertpruefung auf die Prüfung vorzubereiten. Das ganze Leben ist ein Abenteuer. Diejenigen, die am weitesten gehen, sind meistens diejenigen, die Risiko tragen können. Die Prüfungsmaterialien zur SAP C-BCSBS-2502 Prüfung von Zertpruefung werden von den Kandidaten durch Praxis bewährt. Zertpruefung hat den Kandidaten Erfolg gebracht. Es ist wichtig, Traum und Hoffnung zu haben. Am wichtigsten ist es, den Fuß auf den Boden zu setzen. Wenn Sie Zertpruefung wählen, können Sie sicher Erfolg erlangen.

## **C-BCSBS-2502 PrüfungGuide, SAP C-BCSBS-2502 Zertifikat - SAP Certified Associate - Positioning SAP Business Suite**

Wenn Sie Ihre IT-Fähigkeiten erhöhen und die SAP C-BCSBS-2502 Zertifizierungsprüfung einmalig bestehen möchten, können Sie auf Zertpruefung vertrauen. Denn Zertpruefung kann Ihnen helfen, das Prüfungszertifikat zu bekommen, indem wir Ihnen die zutreffendsten und genauesten Fragenkataloge zur SAP C-BCSBS-2502 Zertifizierungsprüfung anbieten. Wenn Sie mit dem

Kaufen noch zögern, können Sie die Demo auf unserer Webseite Zertprüfung herunterladen. Wir sind sicher, dass Sie nicht enttäuscht sein werden.

## SAP Certified Associate - Positioning SAP Business Suite C-BCSBS-2502 Prüfungsfragen mit Lösungen (Q17-Q22):

### 17. Frage

For installed base customers, what can RISE with SAP journeys include? Please choose the correct answer.

- A. Leveraging RISE with SAP methodology to drive complex core principles
- **B. A hybrid two-tier approach**
- C. Moving directly to public cloud without any intermediate steps
- D. Starting fresh with a greenfield ERP implementation on private cloud

**Antwort: B**

### 18. Frage

Which solution enables advanced AI and machine learning models on combined SAP and third-party data?

- **A. SAP Databricks**
- B. SAP Datasphere
- C. SAP AI Launchpad
- D. SAP Analytics Cloud

**Antwort: A**

Begründung:

The question asks which solution within the SAP ecosystem enables advanced AI and machine learning (ML) models using both SAP and third-party data. The correct answer is SAP Databricks, as it is specifically designed to provide advanced data engineering, AI, and ML capabilities within the SAP Business Data Cloud platform, seamlessly integrating SAP and non-SAP data. According to official SAP documentation, SAP Business Data Cloud is a Software-as-a-Service (SaaS) solution that integrates key components such as SAP Datasphere, SAP Analytics Cloud, SAP Business Warehouse (BW), and SAP Databricks. Among these, SAP Databricks is the component tailored for advanced AI and ML workloads, enabling data scientists to develop and execute algorithms and models on combined SAP and third-party data without the need for data replication.

The exact extract from the Positioning SAP Business Data Cloud lesson on learning.sap.com states:

"SAP Databricks is a data intelligence platform that provides advanced data engineering capabilities, including artificial intelligence (AI) and machine learning (ML). SAP Databricks is used by the data scientist who needs a powerful set of tools to develop algorithms and models from data. ... To enable advanced AI/ML scenarios within SAP Business Data Cloud, SAP has embedded Databricks as a service. The name of the embedded version of Databricks is SAP Databricks." learning.sap.com This extract confirms that SAP Databricks is the component responsible for advanced AI and ML capabilities.

It integrates natively with SAP Business Data Cloud through the Delta Sharing protocol, allowing secure, bidirectional data access without physically copying data between systems. This enables data teams to blend SAP data with external data sources for AI and ML use cases, as further supported by:

"SAP Databricks integrates natively with SAP Business Data Cloud through Delta Sharing, enabling secure, bidirectional data access without physically copying data between systems. This shared foundation allows data teams to: Blend SAP data with external data: Data teams can blend their SAP data with data from other applications, databases, and object storage systems." databricks.com In contrast, the other options do not primarily focus on advanced AI and ML model development:

\* SAP AI Launchpad: This is a tool for managing and deploying AI models across SAP solutions but is not the primary platform for developing advanced AI/ML models on combined SAP and third-party data. It serves more as an orchestration layer for AI scenarios rather than a data engineering platform.

\* SAP Analytics Cloud: This component focuses on analytics, reporting, dashboards, and enterprise planning. While it supports some AI-driven insights (e.g., through the Joule copilot), it is not designed for building advanced AI/ML models. The documentation states:

"SAP Analytics Cloud delivers enterprise analytics, reporting, dashboards, and unified planning." learning.sap.com

\* SAP Datasphere: This component provides data integration, federation, and semantic modeling, forming the foundation for data products in SAP Business Data Cloud. It supports analytics and can be extended with AI/ML, but it is not the primary tool for advanced AI/ML model development. The documentation notes:

"At the heart of SAP Business Data Cloud is SAP Datasphere, which provides the foundational structures that define the data model on top of the data products. ... scenarios with custom data models that can be manually extended with machine learning or AI."

learning.sap.com The integration of SAP Databricks with SAP Business Data Cloud is further emphasized as a key innovation for AI-driven use cases, particularly for handling both structured and unstructured data from SAP and non-SAP sources. For example: "The integration with Databricks enables advanced Artificial Intelligence (AI) and Machine Learning (ML) models, leveraging both SAP and third-party data." learning.sap.com This partnership with Databricks, a market leader in AI and ML, ensures that SAP Databricks provides robust tools for data scientists to work with harmonized data, making it the definitive solution for the question's requirements.

## 19. Frage

What is the key advantage of SAP data products?

- A. Self-service analytical modeling within a data fabric architecture
- B. Ready-to-run insights that leverage planning and analysis
- C. Consistency and business context embedded in SAP-managed dataset and semantics

**Antwort: C**

Begründung:

SAP data products are standardized, curated datasets within SAP Business Data Cloud (BDC) that encapsulate business data with embedded semantics and context, designed to enable advanced analytics, AI, and seamless data sharing across SAP and non-SAP systems. The question asks for the key advantage of SAP data products, with one correct answer. Below, each option is evaluated based on official SAP documentation, SAP Learning materials, and relevant web sources from the provided search results, ensuring alignment with the "Positioning SAP Business Suite" and "SAP Business Data Cloud" narratives.

\* Option A: Consistency and business context embedded in SAP-managed dataset and semantics The primary advantage of SAP data products is their ability to provide consistency and embedded business context within SAP-managed datasets and semantics. These data products are pre-curated, semantically rich datasets that preserve the business meaning and context of data from SAP applications (e.g., SAP S

/4HANA, SAP SuccessFactors) and integrate with non-SAP data. This ensures that data is consistent, trusted, and ready for analytics and AI without requiring extensive re-engineering or external transformation. The documentation explicitly highlights this as the key advantage, emphasizing how SAP data products eliminate the need to rebuild business logic and maintain data integrity across use cases. Extract: "SAP Business Data Cloud offers several capabilities for connecting and harmonizing data. By leveraging an SAP-managed Lakehouse, users can maintain rich business semantics for SAP-sourced data products right out-of-the-box. ... Data products are curated and managed by SAP, ensuring consistency and business context for advanced analytics and AI." Extract: "Built-In Business Semantics: Because SAP data already carries deep business context and semantics, Databricks can provide powerful analytics and machine learning without forcing customers to re-invent data pipelines or guess at the meaning of fields." Extract: "SAP data products provide a consistent, semantically rich foundation for data sharing, ensuring that business context is preserved across SAP and non-SAP systems, reducing complexity and enabling trusted insights." This option is correct.

\* Option B: Ready-to-run insights that leverage planning and analysis While SAP Business Data Cloud provides ready-to-run insights through its Intelligent Applications, which combine planning and analysis, this is a feature of the broader SAP BDC platform, not a specific advantage of SAP data products. SAP data products are the underlying datasets that feed these applications, but their primary role is to provide a consistent, semantically rich data foundation, not to deliver insights directly. The documentation distinguishes between data products (data layer) and intelligent applications (analytics layer), making this option less accurate as the key advantage. Extract: "New to SAP Business Data Cloud (SAP BDC) are context-aware SAP Business Data Cloud Intelligent Applications. These pre-configured dashboards provide ready-to-run insights by combining planning and analysis, all infused with trusted Artificial Intelligence (AI) to drive smarter, faster decisions." This option is incorrect.

\* Option C: Self-service analytical modeling within a data fabric architecture SAP Business Data Cloud supports self-service analytical modeling through SAP Datasphere, which operates within a data fabric architecture to enable business users to create data models. However, this capability is not a primary advantage of SAP data products themselves. SAP data products are focused on delivering curated, SAP-managed datasets with embedded semantics, not on enabling self-service modeling. The data fabric architecture is a broader feature of SAP BDC, and self-service modeling is a function of tools like SAP Datasphere, not the data products. Extract: "SAP Datasphere: This works as central component in BDC by creating consumption ready data models on top of Data Products while also managing analytical roles, access controls etc." This option is incorrect.

Summary of Correct answer:

\* A: The key advantage of SAP data products is their consistency and business context embedded in SAP-managed datasets and semantics, ensuring trusted, semantically rich data for analytics and AI without the need for external re-engineering.

## 20. Frage

Which SAP solutions enhance supplier management and procurement? There are 3 correct answers to this question.

- A. SAP Ariba
- B. SAP Transportation Management
- C. SAP Business Network
- D. SAP SCM
- E. SAP Predictive Analytics

Antwort: A,C,D

## 21. Frage

How does SAP Business Suite improve customer relationship management? There are 3 correct answers to this question.

- A. Predicting customer demand using analytics
- B. Enabling sales and service automation
- C. Managing supplier networks
- D. Streamlining customer interactions
- E. Automating procurement approvals

Antwort: A,B,D

## 22. Frage
