

# API-936 Latest Test Fee | Test API-936 Preparation

The poster for the TBMOC 2024 competition features a central image of a female doctor in a white lab coat with a stethoscope, pointing upwards. To her right, a group of students and a teacher are gathered around a large human spine model. Below these images, a collage of hexagonal photos shows students in various settings, including a classroom and a competition stage. The text 'Final round with the medical camp in Thailand' is in a yellow speech bubble. The main title 'TBMOC THAILAND INTERNATIONAL BIOLOGY & MEDICAL OLYMPIAD CHALLENGE' is prominently displayed in blue and black. Below it, the Chinese title '國際生物與醫學奧林匹克挑戰賽' is shown. The competition is for 'Grade 4 to Grade 12' (小學四年級至中學六年級) and runs from '08/02/2026' to '08/02/2026'. It includes an online round and a school paper round. Logos for Miss Man International Education and Miss Man International Group are also present.

In order to provide the most effective API-936 exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the API-936 exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our API-936 Practice Test, and you can get the latest version of our study materials for free during the whole year. Do not lose the wonderful chance to advance with times.

API-936 certification program is a valuable credential for individuals involved in the installation, inspection, and testing of refractory materials in the petroleum and petrochemical industries. It provides a benchmark for employers to evaluate the knowledge and skills of their employees and helps ensure the safety and reliability of refractory installations. Refractory Personnel certification exam is a rigorous and comprehensive assessment of the candidate's knowledge and skills in the field of refractory materials, and passing it is a testament to the candidate's expertise and commitment to their profession.

## Test API-936 Preparation, API-936 Simulation Questions

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the API-936 appearances,

or in other words, candidates' educational background and relating API-936 professional skills. They develop the API-936 exam guide targeted to real exam. The wide coverage of important knowledge points in our API-936 latest braindumps would be greatly helpful for you to pass the exam.

## API Refractory Personnel Sample Questions (Q38-Q43):

### NEW QUESTION # 38

The lining surface should remain uncovered and free from contact with moisture during the curing period for what type of refractory?

- A. Chemically bonded
- B. Cement bonded
- C. Ceramic bonded
- D. Hydraulic bonded

**Answer: A**

Explanation:

Chemically bonded refractories, such as phosphate-bonded or acid-bonded types, develop strength through chemical reactions that require exposure to ambient air. These materials must remain uncovered and dry during curing, as moisture or covering may inhibit the required chemical bonding or lead to improper set.

Covering chemically bonded linings (e.g., with plastic sheeting or wet burlap) - practices appropriate for hydraulic bonded (cement-based) refractories - would trap moisture and interfere with the chemical reaction process in chemical bonds.

Reference:

API TR 980 -Monolithic Refractories: Installation and Dryout, Section on Chemically Bonded Refractories:

"Do not cover chemically bonded castables during the curing period. Keep surfaces exposed to air."

### NEW QUESTION # 39

Maximum allowable crack length, visible on the surface of a dense firebrick, is:

- A. 3/4 in. (19 mm)
- B. 3/8 in. (10 mm)
- C. 1/2 in. (12 mm)
- D. 1/4 in. (6 mm)

**Answer: C**

Explanation:

API Std 936 defines crack length acceptance as follows:

"Surface cracks in dense firebrick shall not exceed 1/2 in. (13 mm) in length and shall not extend through the thickness of the brick."

- API Std 936, Section 8.3.3

Therefore, Option C is the correct maximum allowable length for a visible crack on firebrick.

### NEW QUESTION # 40

Pre-turn around planning means

- A. At least 6 months prior to the turnaround
- B. Any of the above
- C. At least 12 months prior to the turnaround
- D. At least 8 months prior to the turnaround

**Answer: A**

### NEW QUESTION # 41

Refractories that are resistant to chemical attack by both acid and basic slags, refractories, or fluxes at high temperature is

- A. None of the above
- B. Neutral

- C. Acid
- D. Basic

**Answer: B**

#### NEW QUESTION # 42

Based on screen analysis the fines (cement, fumed silica, fine alumina) in typical modern castable is

- A. None of the above
- B. 30 - 40%
- C. 20 - 30%
- D. 40 - 50%

**Answer: B**

#### NEW QUESTION # 43

.....

“There is no royal road to learning.” Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of API-936 study materials will make you no longer afraid of learning. API-936 study material provides you with a brand-new learning method that lets you get rid of heavy schoolbags, lose boring textbooks, and let you master all the important knowledge in the process of making a question. Please believe that with API-936 Study Materials, you will fall in love with learning.
