During the process of using our DP-300 study materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your DP-300 practice time, which will make you feel the actual exam environment and build up confidence. Not only that you can get to know the real questions and answers of the DP-300 Exam, but also you can adjust yourself

to the real pace of the DP-300 exam

## Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q227-Q232):

### NEW QUESTION # 227

You have an Azure virtual machine named VM1 on a virtual network named VNet1. Outbound traffic from VM1 to the internet is blocked.

You have an Azure SQL database named SqlDb1 on a logical server named SqlSrv1.

You need to implement connectivity between VM1 and SqlDb1 to meet the following requirements:

- Ensure that VM1 cannot connect to any Azure SQL Server other than SqlSrv1.

- Restrict network connectivity to SqlSrv1.

What should you create on VNet1?

- A. a private endpoint
- B. an ExpressRoute gateway
- C. a VPN gateway
- D. a service endpoint

**Answer: A**

Explanation:

A private endpoint is a network interface that uses a private IP address from your virtual network.

This network interface connects you privately and securely to a service powered by Azure Private Link. By enabling a private endpoint, you're bringing the service into your virtual network.

The service could be an Azure service such as:

- Azure Storage
- Azure Cosmos DB
- Azure SQL Database
- Your own service using a Private Link Service.

<https://docs.microsoft.com/en-us/azure/private-link/private-endpoint-overview>

### NEW QUESTION # 228

SIMULATION

You need to configure high availability for db1. The solution must tolerate the loss of an Azure datacenter without data loss or the need to modify application connection strings.

To complete this task, sign in to the virtual machine. You may need to use SQL Server Management Studio and the Azure portal.

**Answer:**

Explanation:

Configure a license-free standby replica (preview) for Azure SQL Database You can save on licensing costs by designating your secondary disaster recovery (DR) database for standby when using Azure SQL Database.

Configure a standby replica

You can designate a replica for standby when you configure a new active geo-replication relationship by using the Azure portal, PowerShell, or the Azure CLI.

To create a new active geo-replication relationship and designate your secondary database for standby in the Azure portal, follow these steps:

Step 1: Go to your SQL database [Here db1] resource in the Azure portal.

Step 2: Choose Replicas under Data management from the resource menu, and then select + Create replica to open the Create SQL Database - Geo Replica page.

Step 3: On the Create SQL Database - Geo Replica page, select Standby replica for Replica type under Replica configuration. Check the box to confirm you'll use the replica for standby.

Step 4: Provide a new or existing server for the new standby database and then use Review + create to do a final validation of your database and server details.

Step 5: Use Create to confirm your settings and create your new standby database replica.

### NEW QUESTION # 230

You have an Azure SQL database named DB1 in the General Purpose service tier.

You need to monitor DB1 by using SQL insights.

What should you include in the solution? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 231

You have an Azure SQL database named db1 on a server named server1.

You use Query Performance Insight to monitor db1.

You need to modify the Query Store configuration to ensure that performance monitoring data is available as soon as possible.

Which configuration setting should you modify and which value should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

### NEW QUESTION # 232

.....
