Microsoft Endpoint Administrator Sample Questions (Q130-Q135):

NEW QUESTION # 130

You have a Microsoft 365 E5 subscription that contains a group named Group1.

You create a Conditional Access policy named CAPolicy1 and assign CAPolicy1 to Group1.

You need to configure CAPolicy1 to require the members of Group1 to reauthenticate every eight hours when they connect to Microsoft Exchange Online.

What should you configure?

- A. an assignment that uses a Sign-in risk condition
- B. an assignment that uses a User risk condition
- C. Session access controls
- D. Grant access controls

Answer: C

Explanation:

User sign-in frequency

Sign-in frequency defines the time period before a user is asked to sign in again when attempting to access a resource.

The Azure Active Directory (Azure AD) default configuration for user sign-in frequency is a rolling window of 90 days.

Sign-in frequency control

Sign in to the Azure portal as a global administrator, security administrator, or Conditional Access administrator.

Browse to Azure Active Directory > Security > Conditional Access.

Select New policy.

Give your policy a name. We recommend that organizations create a meaningful standard for the names of their policies.

Choose all required conditions for customer's environment, including the target cloud apps.

Under Access controls > Session.

Select Sign-in frequency.

Choose Periodic reauthentication and enter a value of hours or days or select Every time.

Save your policy.

NEW QUESTION # 131

Hotspot Question

You have a Microsoft 365 subscription that includes Microsoft Intune.

From the Microsoft Intune admin center, you add the apps shown in the following table.

Name	Type	Operating system
App1	Microsoft 365 Apps for Windows 10 and later	Windows 10 and later
App2	Line-of-business (LOB) app	Android

You need to configure the apps to meet the following requirements:

- App1 must automatically install for all users in the marketing department on any Windows 11 device enrolled in Intune. If a user receives a new device, App1 must install automatically.

- App2 must be available for download for any user in the HR department from a personal Android device that is not enrolled in Intune.

Which assignment should you configure for each app? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

App1:
- A Required assignment to a device group
- A Required assignment to a user group
- An Available assignment to a device group
