

高質量的HPE0-J68參考資料，真實還原HP HPE0-J68考試內容

BONUS!!! 免費下載NewDumps HPE0-J68考試題庫的完整版: <https://drive.google.com/open?id=1-AwnAe8sxxpfX4YacdUPcX6PYJ--vSc0>

我們瞭解到所有想考 HPE0-J68 的考生都希望能有一份可以保證自己順利通過考試的題庫，但事實往往並不如大家想的那麼簡單，偏偏 HPE0-J68 這科科目的題庫一直都沒有最新包過的版本在網上出現，這真的是一件讓廣大考生非常苦惱的事情。一些正在準備 HPE0-J68 考試的考生，也不必感到茫然失措。因為 NewDumps 題庫網帶來了真正可以保證考生通過考試的 HP HPE0-J68 題庫，只要根據最新的題庫來緊緊抓住考試的動態資訊，就可以輕鬆通過這科考試了。

你肯定聽說過NewDumps的HPE0-J68考古題吧？但是，你用過嗎？我們經常會聽到“NewDumps的考古題真是好資料，多虧了它我才通過了考試”這樣的話。NewDumps從使用過考古題的人們那裏得到了很多的好評。這是因為它確實能幫助考生們節省很多時間，並保證大家順利通過考試。

HP HPE0-J68最新試題 - HPE0-J68學習指南

在當今這個社會，人才到處都是。在IT領域更是這樣。隨著電腦的普及，已經幾乎沒有不會使用電腦的人了。同樣在IT行業工作的你難道沒有感覺到壓力嗎？不管你的學歷有多高都不能代表你的實力。學歷只是一個敲門磚，真正能保住你地位的是你的實力。作為IT職員，你是怎麼培養自己的實力的呢？參加IT認證考試是一個不錯的選擇。既可以掌握更多的技能，又可以取得可以證明自己能力的認證資格。最近HP的HPE0-J68認證考試很受歡迎，想參加嗎？

最新的 HPE ASE HPE0-J68 免費考試真題 (Q271-Q276):

問題 #271

Refer to the exhibit.

You are configuring a new HPE array and verifying properties of a set of volumes.
Which RAID level is used on the VMwareDatastores-GF volume?

- A. RAID 0
- B. RAID 6
- C. Triple Parity+
- **D. RAID 5**

答案: D

解題說明:

The exhibit refers to a configuration scenario where properties of a volume set, specifically VMwareDatastores-GF, are being verified. The question focuses on identifying the RAID level used on this volume.

RAID 5 is a common configuration in many storage arrays because it provides a balance of performance, capacity, and data

protection. In RAID 5, data is striped across multiple disks with parity information distributed among the disks. This parity allows for the recovery of data in the event of a single disk failure, making it a preferred choice for environments that require efficient storage utilization with a degree of fault tolerance.

HPE storage solutions, such as HPE Nimble Storage and HPE 3PAR, often employ RAID 5 for use cases involving virtualized environments like VMware datastores. These solutions are optimized for high performance and data protection, ensuring that even with a single drive failure, the data remains accessible and the system can continue to operate without significant performance degradation.

These resources provide comprehensive information on HPE's RAID configurations, data protection mechanisms, and how they integrate with enterprise storage environments.

問題 #272

A solution architect is sizing the required capacity for an HPE Alletra 9000. Customer requirements include:

- 200TB base volumes
- Regular snapshots being taken every hour with one-week retention
- 10% daily change rate

How much capacity is needed for snapshots after one week?

- A. 20TB
- **B. 140TB**
- C. 200TB
- D. 480TB

答案: B

解題說明:

With a 10% daily change rate on 200 TB, you generate 20 TB of new data each day. Over seven days, hourly snapshots still only capture those daily changes incrementally, totaling $20 \text{ TB} \times 7 \text{ days} = 140 \text{ TB}$ of snapshot storage.

問題 #273

A customer has an existing configuration consisting of first class and nearline SAS drive in an 8000 SFF enclosure. They add two SFF 8000 enclosure that are fully populated with nearline drives to an existing HPE 3Par storeserv 8400 array. What should the customer do to optimize their storage configuration?

- A. Create new CPG for the newly installed drivers
- **B. Run tunesys and on the array (275)**
- C. Defrag the CPG and run align drive on their system
- D. Enable space reclamation

答案: B

問題 #274

Which HPE 3PAR StoreServ feature allows a host to continue I/O uninterrupted during a firmware upgrade?

- **A. Persistent Ports**
- B. Persistent Cache
- C. Peer Persistence
- D. Persistent Memory

答案: A

問題 #275

What information should be collected for creating a proper host entry within Data Ops Manager when using an HPE Alletra MP

solution?

- **A. Port World Wide Name**
- B. HBA vendor
- C. Data protection policy
- D. LUN ID

答案： A

解題說明：

When creating a proper host entry within Data Ops Manager while using an HPE Alletra MP solution, it is crucial to collect the Port World Wide Name (WWN). The WWN is a unique identifier for each port on a host's HBA (Host Bus Adapter) and is essential for configuring storage connectivity, zoning, and mapping between the storage system and the host. Accurate WWN information ensures correct and secure access to the storage resources.
